Listing

The INVL Baltic Fund has been listed on OMX Stock Exchange with effect from September 2013.

Reporting period

From 1 January 2023 to 30 June 2023

23.3.2. Accounting policies:

Regulatory legislation adopted in the preparation of the financial statements

INVL Asset Management UAB manages the assets of the fund, keeps the fund's accounting records and prepares its financial statements in compliance with Lithuanian Financial Reporting Standards (BAS), Lithuanian Law on Accounting, Lithuanian Law on Collective Investment Undertakings and other legal acts.

Generally accepted accounting principles

The financial year of the Fund coincides with the calendar year. Assets and liabilities reported in the Fund's financial statements as at the end of the reporting period are presented at the value as at 2023 June 30

The Fund's financial statements are prepared within four months following the end of the financial year. All amounts in these financial statements are presented in the euros (EUR).

Investment policy and structure of investment portfolio

The objective of the Fund is to ensure the maximum growth of assets for the benefit of the Fund's participants by assuming average or higher level of risk.

From 50 to 100 per cent of the Fund's net assets might be invested into the securities of companies quoted on Lithuania, Latvian, and Estonian stock exchanges. The remaining portion of the Fund's net assets might be invested into the shares of companies developing a major part of their activities in the Baltic countries and quoted in other markets, as well as into other investment instruments defined in the Fund's rules.

Investment portfolio of the Company must be diversified in accordance with the procedure established under the laws of the Republic of Lithuania and rules of the Fund.

The structure of investment portfolio is presented in Note 4.

Financial risk management

The Fund's exposure to financial risks is managed through the diversification of the investment portfolio based on diversification principles defined in the Fund's rules.

The Investment Committee decides on the composition of the Fund's investment portfolio in view of the current risk level of the portfolio and the effects of decisions made on the overall risk level of the portfolio.

The Fund's portfolio risk and liquidity are assessed periodically and reported to the Investment Committee.

The Fund's investment portfolio risk is assessed on the basis of constituent securities in view of:

- issuer's credit rating;
- price sensitivity to interest rate shifts;
- nominal currency risk;
- maturity;
- yield;
- weight of securities in total investment portfolio;
- liquidity.

23.3.2. Accounting policies (continued)

Policies for recognition of increase and decrease in assets and liabilities

Difference between the value of the Fund's net assets and the value of the Fund's liabilities reflects the value of net assets (NA).

Calculation of assets and liabilities is based on their fair value, which reflects the NA value, at which the sale of these assets are mostly probable.

Financial assets are recorded when the Fund receives or obtains a contractual right to receive cash or any other financial assets, i.e. following the selected trade date approach, when the receivable financial asset and the liability to pay for it are recorded in the buyer's books of account at the date of the transaction. In the seller's books of account, the financial asset sold is written off, and a receivable amount and the result of disposal (gain or loss) are recorded at the date of the transaction. Planned transactions, guarantees and sureties received are not recognised as the Fund's assets for as long as they do not meet the definition criteria of financial assets.

Financial liabilities are recorded when the Fund assumes a commitment to pay cash or any other financial assets (the selected trade date approach). Planned transactions, guarantees and sureties granted but not yet executable are not recognised as the Fund's liabilities for as long as they do not meet the definition criteria of financial liabilities.

Liabilities are recorded in line with the requirements of Business Accounting Standards. Liabilities (or part of them) should be written off only when they extinguish, i.e. when contractual liabilities are settled, annulled or have expired.

When calculating the NA value in foreign currency, the value of assets and liabilities is determined using a foreign exchange reference rate of EUR against other currencies published by the European Central Bank, and where such foreign exchange reference rate is not published by the European Central Bank, using the foreign exchange reference rate published on the date of estimation by the Bank of Lithuania. For the purpose of accounting, the most recent foreign exchange rate effective before the economic event or economic transaction should be applied.

Rules on deductions to the accumulation undertaking and the depository

The maximum rates of deductions from the Fund's assets charged for the management of the Fund and the services provided by the Depository are presented in the Fund's rules.

The specific rates of deductions for the management of the Fund are set by the decision of the Board of the Management Company and they are available to public on the Management Company's official website at address www.invl.com.

Any other costs not specified in the Fund's rules (including expenses related to the services provided by the depository) or in excess of the defined limits are born by the Management Company at its own expense.

The Fund's deductions over the reporting period are presented in 7 herein.

Investment valuation methods, investment revaluation intervals

The Fund's net assets are measured at fair value in accordance with the procedure prescribed by legal acts of the Republic of Lithuania and in line with the net assets calculation procedures approved by the Management Company.

Valuation of net assets (NA) is based on the following principles for determining the fair value of investments:

- The fair value of financial instruments traded on regulated markets is determined with reference to the quoted closing price of the instrument or, in case the closing price is not available, with reference to the average market price quoted on that regulated market and/or multilateral trading system, which has a higher liquidity, regularity and frequency of trade in these financial instruments, except for the cases defined in the Methodology for Calculation of Net Assets approved by the Bank of Lithuania;

- The fair value of financial instruments not traded on regulated markets is determined with reference to the Methodology for Calculation of Net Assets approved by the Bank of Lithuania;

The fair value of non-equity securities is determined by calculating the price without the accumulated interest and adding the accumulated interest in accordance with the following procedure:

23.3.2. Accounting policies (continued)

- Valuation of investment units (shares) of collective investment undertakings is carried out with reference to the NAV determined by the collective investment undertaking or the last quoted redemption price;
- Valuation of time deposits is based on the amortised cost;
- Valuation of cash on hand and cash held at credit institutions, except for time deposits, is based on the nominal value;
- The value of forwards is calculated using the discounted cash flow method. The fair value of forwards or the current market value (CMV) is the difference between the payable and receivable amounts of the transaction discounted by the interbank offered rate (LIBOR) of the revaluation date and recalculated into euro at the official exchange rate of the revaluation date.

The value of all other derivative financial instruments is determined based on the most recent market value of an analogous previous transaction if there were no significant changes in economic circumstances during the period after the transaction date until the valuation date. In case of changes in economic circumstances, valuation is made based on the expected sale price determined according to the chosen valuation model which is generally applicable and accepted and in the financial market;

- Valuation of other assets is based on the most probable selling price determined by the selected valuation model, which is generally accepted in the financial market.

Valuation of liabilities

Valuation of liabilities is based on the requirements of Business Accounting Standards:

- Liabilities initially are recognised at cost;
- Liabilities related to market prices are measured at fair value;
- Liabilities not related to market prices are carried at amortised cost, which approximates to the fair value.

Rules on valuation of investment units

The initial value of the Fund's unit, which was available before the first calculation of net asset value, was equal to EUR 28,9620.

The value of the Fund's unit is calculated by dividing the Fund's net asset value by the number of all Fund's units in issue as at the date of calculation. The total value of all units of the Fund is always equal to the Fund's net asset value. The value of the Fund's unit is determined as four figures after the decimal point and rounded according to the mathematical rules of rounding.

The value of the Fund's unit is announced not later than by 14 p.m. of the following day after the calculation of net asset value, on the website at address www.invl.com.

Cash and time deposits

Cash includes cash balances at accounts opened with credit institutions, overnight deposits and deposits with undefined maturity the repayment of which may be demanded in full or in part at any time without losing accumulated interest thereon (demand deposits).

Time deposits include a deposit amount with the specific deposit repayment date indicated in the deposit agreement, including the deposits with maturity of three months or less that cannot be taken from the account opened with the credit institutions without losing accumulated interest thereon. Time deposits are shown with accumulated interest thereon.

Amounts receivable and amounts payable

Amounts receivable represent amounts due to the fund on sale of assets, amounts due on guarantee contributions; amounts due on dividends; prepayments under assets due; amounts due from the Company that upon receipt are deducted from expenses for the reporting period, other than those defined in the Fund's rules or which exceed the established limits; other amounts receivable under contracts or registered under accounting documents.

Amounts payable represent amounts payable on sale of assets; amounts due to other funds to which the participant move; amounts due to the participants or their beneficiaries, accrued and unpaid deductions from the Fund's assets; amounts payable under the service agreement, and other amounts payable and receivable not specified elsewhere.

Subsequent events

All significant subsequent events that occurred after the end of the reporting period are disclosed in Note 15 of the explanatory notes.

Change in value of unit and benchmark index during the period between 1 January 2023 and 30 June 2023:

Disclosure of sustainability-related information

According to Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector (“SFDR”) and Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment (“Taxonomy”), the information on how and to what extent environmental or social characteristics are ensured (where the Fund discloses information according to Article 8 of SFDR) or information about the environmental targets to which it is contributed and a description of investments into sustainable economic activity (where the Funds discloses information according to Article 9 of SFDR) shall be provided by a financial product (Fund) in a periodic report.

In the first half of 2023, the Fund did not promote specific environmental and/or social characteristics and did not have a sustainable investment objective and therefore made disclosures under Article 6 of the SFDR. As a result, the Fund’s investments did not take into account the EU’s criteria for environmentally sustainable economic activity.

In making investment decisions, the Fund has not taken into account the principal adverse impacts of investment decisions on sustainability factors as defined in the SFDR. According to the managers, the possibilities for collecting information were limited at the time.

In making investment decisions during the reporting period, the aim was to assess all risks and factors that could affect the value and performance of investments. Accordingly, ESG (environmental, social, and governance) factors and risks relevant to the specific investment were also assessed, alongside an assessment of all other risks and factors that may have a real or potential negative impact on the value of the investments.
