Report of the Investment Management Company

On 11 July 2007, the subfund ABLV Global EUR ETF Fund of the open-end investment fund ABLV Global ETF Fund (hereinafter referred to as the Fund) was registered as a stock fund with the investment currency EUR.

ABLV Asset Management, IPAS (ABLV Asset Management, IPAS new name registered with the Register of Enterprises on 27.05.2011, hereinafter referred to as the Company) was registered with the Republic of Latvia Register of Enterprises on 4 August 2006 under No 40003814724, licence for investment management activities No 06.03.07.263/204, and it is located in Riga, at Elizabetes iela 23.

The Fund is established with the aim of generating long-term income, mostly by investing the Fund's assets in index funds traded on the US and European exchanges (ETFs) and other instruments, which represent the value of stocks, as well as that of particular sectors of economy of various countries. Investment is possible in particular equities that have substantial weight in the main index of the chosen country as well. The Fund's investment portfolio is diversified by investing in different countries, thus ensuring higher investment safety and protection against fluctuations in the value of the Fund's assets associated with investments in securities of one country only.

The year 2013 is the seventh year of operations of ABLV Global EUR ETF Fund. As at the end of June 2013, the Fund's net assets amounted to EUR 3,481,181 (LVL 2,446,588) and its 6-month yield was - 4.83%.

In the first half of 2013, global stock markets showed ambiguous trends. The main feature was different dynamics obvious on the stock markets of developed and emerging countries. While most of the developed countries, primarily the US, demonstrated sufficiently strong growth, stock markets of emerging countries slumped. The growth on the markets of developed countries was caused mostly to the enormous influx of funds from investors due to improved macroeconomic indicators and the negative dynamics of global bond markets. In their turn, stock markets of emerging countries, most of them being raw materials exporters, felt a pressure from the sellers' part due to the slow-down of China's economic growth rate. As a result of such developments, the difference between the MSCI World (where the markets of developed countries account for more than 80%) and the MSCI Emerging Markets indices reached a record high level of 18% (plus 7% and minus 11% respectively) in the first half of the year.

The minimum amount of investment in the Fund is EUR 1,000.

The company performs regular analysis of current political and economic situation, as well as comparative and technical analysis, analysis of various macroeconomic indicators, and summarizing analysis of recommendations given by the world leading brokerage and analytics companies on different financial markets.
