Agricultural company "Gustoniai" is consolidated by the Group as of 30 June 2010, as the Group acquired control of subsidiary as of that date. The initial acquisition of controlling stake happened in 2007, however the Group up to 2010 did not have control over the entity. All agricultural entities of the Group (except for UAB „Grūduva“, ŽŪB „Gustonys“, Panevėžio region ŽŪB „Gustoniai“, and ŽŪB „Žemės fondas“) are undergoing Restructuring, during which the companies can not pay dividends until they have settled all the debts.

As of 30 September 2013 the Group had 612 employees, 31 December 2012 – 540 employees. Main operations of the Group – production and sales of milk and different grain and rapeseed crops, as well as land management activities.

Basis of preparation

Except as described below, the accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2012, as described in those annual financial statements. Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

The accompanying interim financial information for the period ended 30 September 2013 has been prepared in accordance with IAS 34, 'Interim financial reporting'. The consolidated financial information have been prepared on the historical cost basis, as modified by the revaluation of property, plant and equipment, investment property and biological assets (livestock and crops). This financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2012, which have been prepared in accordance with IFRS as adopted by the EU.

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below.

Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities in future periods are addressed below.

Income taxes

Tax authorities have right to examine accounting records of the Company and its Lithuanian subsidiaries at anytime during the 5 year period after the current tax year and account for additional taxes and fines. In the opinion of the Group's management, currently there are no circumstances which would raise substantial liability in this respect to the Group.

The Group has created deferred tax liability on revaluation amounts of investment property and own assets. The applicable tax rate used was 15%, as it is planned that assets will be realized (if will be realized) after 2012 when the 15% corporate tax effect will be applicable to all Group's entities (except for the agricultural subsidiaries which are currently taxed at lower transition tax rate of 5%).

Revenues

Group's revenues breakdown by type was the following:

	9 month period ended 30 September	
	2013	2012
Milk sales	18,338	12,890
Crop sales	25,076	24,108
Cattle sales	2,790	3,316
Other revenues	3,944	3,060
Total	50,148	43,374

During the first three quarters of 2013 revenues of the Group increased compared to the same period previous year. The largest growth was seen in milk sales – the growth came from increased production and sale of milk in 2013 as well as higher milk prices. The revenues from milk sales for the 9 month period ended September 30, 2013 were over 40% higher than for the corresponding period of 2012. Revenues from crop sales also increased during the reporting period of 2013 despite lower grain prices in global markets. This is because, compared to 2012, a larger proportion of this years harvest was sold during the first nine months of 2013. Cattle sales decreased slightly during the period, mostly due to lower prices of meat and cattle.

Cost of sales

Group's cost of sales breakdown by type was the following:

	9 month period ended 30 September	
	2013	2012
Milk cost of sales	15,054	12,331
Crop cost of sales	23,651	18,685
Cattle cost of sales	4,652	5,627
Other revenues	2,082	1,483
Less: State subsidies	(6,948)	(7,936)
Total	38,491	30,190

The gross profitability of the Group for the 9 month period ended September 30, 2013 was circa 7 percentage points lower compared to the corresponding period of 2013. The main cause of this development was the decrease in crop sales profitability due to lower grain prices and higher costs of inputs. The Group's gross profitability was further decreased by the decrease in state subsidies by almost one million Litass. However, the gross profitability of milk sales increased by over 17 per cent owing to higher milk prices, improved production efficiency and successful cow herd expansion.

Operating expenses

Group's operating expenses breakdown by type of expenses was the following:

	9 month period ended 30 September	
	2013	2012
Payroll expenses	3,824	3,006
Social security expenses	1,187	933
Depreciation and amortization	2,303	1,978
Write-off of inventory	1,601	1,203
Consultation services	762	978
Fuel and transportation expenses	513	624
Tax and insurance expenses	650	459
Rent and utilities	210	150
Impairment of accounts receivable	36	-
Other expenses	1,623	2,122
Total	12,709	11,453

Operating expenses of the Group increased by around 10 per cent as compared to same period of 2012 mainly due to higher payroll expenses, increased depreciation and amortization as well as higher inventory write-offs in 2013.
