## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

### II. MANAGEMENT REPORT

During the first nine months of 2019, AUGA group, AB and its subsidiaries' (hereinafter - the Group) sales revenue amounted to EUR 47.05 million, a 12% increase compared to the same period of 2018, when it was EUR 42.16 million.

The Group's gross profit for the three quarters of 2019 amounted to EUR 8.00 million and was EUR 6.24 million higher compared to the same period of 2018 (gross profit for the three quarters of 2018 - EUR 1.76 million).

<b>Main financial results, million EUR</b>	<b>9 months of 2019</b>	<b>9 months of 2018</b>
<b>Revenues</b>	47,054	42,164
<b>Gross profit (loss)</b>	8,000	1,756
<b>Net profit (loss) (eliminating IFRS 16 effect)</b>	(782)	(4,878)
<b>Net profit (loss) (without elimination of IFRS 16 effect)</b>	(1,279)	(4,878)
<b>EBITDA (eliminating IFRS 16 effect)</b>	7,858	1,740
<b>EBITDA (without elimination of IFRS 16 effect)</b>	12,434	data not available

During the first nine-month period of 2019, the Group incurred EUR 1.28 million net loss compared to EUR 4.88 million loss a year earlier. It should be noted that the financial results of the first nine months of 2018 were highly impacted by several one-off events which had a positive net effect: (a) sale of Karakash Agro OOO and Karakash OOO in the second quarter of 2018 and the reversal of impairment loss of the assets of Karakash Agro OOO and Karakash OOO prior to the sale (total positive effect of EUR 1.99 million); (b) accrued expenses related to the termination of the acquisition of shares of UAB Arginta Engineering in the first quarter of 2018 (negative effect of EUR 0.71 million). Total positive net effect of the aforementioned one-off effects was EUR 1.28 million in 2018.

Excluding one-off effects from financial results for the first nine months of 2018 (positive EUR 1.28 million) as well as IFRS 16 (negative EUR 0.50 million) and accounting of employee share option plan (negative EUR 0.15 million) impacts from financial results for the first nine months of 2019 the net result significantly improved year on year basis. The Group would have incurred only EUR 0.63 million net loss during the three quarters of 2019 compared to EUR 6.16 million net loss during the same period last year, excluding the aforementioned effects.

Since the application of new IFRS 16 requirements had significant impact to the Group's EBITDA<sup>1</sup>, for comparison purposes the Group is publishing two EBITDA calculations throughout the year 2019: (a) without elimination of IFRS 16 effect and (b) eliminating IFRS 16 effect to EBITDA. Due to the fact that new IFRS 16 requirements were applied only from the beginning of 2019, EBITDA data with IFRS 16 effect is not and will not be available for the year 2018.

EBITDA increased as a result of the change in accounting policy after implementation of new IFRS 16 requirements. Depreciation of right-of-use assets and interest expenses related to lease liabilities arising from right-of-use assets are now excluded from calculation of EBITDA, whereas operating lease expenses were previously included in calculation of EBITDA.

The impact of implementation of IFRS 16 to the calculation of EBITDA of the first three quarters of 2019 is presented below:

	<b>9-month period ended 30 September 2019 before IFRS16</b>	<b>IFRS 16</b>	<b>9-month period ended 30 September 2019 as presented in FS</b>
<b>Net profit (loss) before income tax and non-controlling interest</b>	(782)	(497)	(1,279)
<b>Adjustments for non-cash expenses (income) items and other adjustments</b>			
Depreciation	5,712	4,400	10,112
Amortization	342	(338)	4
Expenses of share-based payments	149	-	149
Write-offs and impairments of inventory	1,182	-	1,182
(Profit) loss on sales of non-current assets	(56)	-	(56)
Net finance cost	1,637	1,011	2,648
Grants related to assets, recognized as income	(326)	-	(326)
<b>EBITDA:</b>	<b>7,858</b>	<b>4,576</b>	<b>12,434</b>

<sup>1</sup> EBITDA = net cash flow from operating activities before changes in working capital and net interest paid, as it is disclosed in cash flow statement, including gain (loss) on changes in fair value of biological assets.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

The Group's EBITDA for the first nine months of 2019, eliminating IFRS 16 effect, amounted to EUR 7.86 million. During the same period in 2018 the Group's EBITDA after elimination of one-time transaction, in particularly, the one-off costs related to the termination of the acquisition of shares of UAB Arginta Engineering, amounted to EUR 1.74 million.

There is an agreement with major Group creditors (banks) that covenants stated in loan contracts throughout the year 2019 and 2020 should be calculated eliminating IFRS 16 effect. Moreover, it was agreed with the banks to increase DEBT/EBITDA level for 2019 3Q – 2020 4Q and slightly change EBITDA calculation formula eliminating gain (loss) on fair value changes of livestock from EBITDA calculation. Despite changed definition of EBITDA to be used in financial covenants calculation with the banks, the Group will publish EBITDA calculated according to the formula used in previous periods to ensure comparability and consistency.

Adoption of IFRS 16 also had a significant impact on the level of financial liabilities disclosed in financial statements. Due to the adoption of IFRS 16 the financial liabilities as at 30 September 2019 increased by 55%. However, eliminating IFRS 16 effect financial liabilities as at 30 September 2019 were slightly lower compared to the end of 2018.

<b>Financial liabilities</b>	<b>30 September 2019</b>	<b>31 December 2018</b>
<b>Current and non-current financial liabilities</b>	86,568	55,862
<b>Current and non-current financial liabilities (excl. IFRS 16 effect)</b>	55,542	55,862
<b>Cash and cash equivalents</b>	808	2,281
<b>Adjusted working capital<sup>2</sup></b>	40,199	37,674
<b>Current and non-current financial liabilities (excl. IFRS 16 effect) – cash and cash equivalents - adjusted working capital</b>	14,535	15,907

Management of the Group believes that another important factor evaluating financial liabilities level of the Group is to take into account the adjusted working capital level. Organic agriculture is very working capital-intensive business and working capital changes have significant impact to cash flows of the Group and inevitably financial liabilities level. As it can be seen from the table above adjusted working capital of the Group has increased by EUR 2.53 million since the end of 2018 due to inputs into the biological assets (not yet harvested crops) and inventory (harvested crops). Deducting cash and cash equivalents and adjusted working capital from the level of financial liabilities more clearly indicates the financial liabilities that are not covered by working capital and cash operated by the Group. Financial liabilities of the Group excluding IFRS 16 effect minus cash and cash equivalents minus adjusted working capital as at 30 September 2019 were EUR 14.54 million or EUR 1.37 million lower than at the end of 2018.

### **Crop growing segment overview**

#### *Crop growing segment sales results*

Crop growing segment sales revenue for the three quarters of 2019 amounted to EUR 16.45 million compared to EUR 15.59 million for the same period in 2018 (6% increase). Crop growing segment cost of sales for the three quarters of 2019 were EUR 17.73 million versus EUR 16.14 million in 2018. Total agricultural produce inventory write-offs and impairment during the nine months of 2019 amounted to EUR 0.73 million compared to EUR 0.75 million during the nine months of 2018. The gross result of sales of agricultural produce was EUR 2.01 million loss for the first nine months of 2019 (EUR 1.28 million loss for the same period in 2018).

#### *Progress in the season of 2018/2019*

The total cultivated land area by the Group amounts to around 38.56 thousand hectares in the season of 2018/2019 and is about the same as in the season of 2017/2018. In the season of 2018/2019 28.67 thousand hectares were seeded with cash crops (28.5 thousand in the season of 2017/2018) out of which 11.50 thousand ha were dedicated to wheat, 8.04 thousand ha to legumes and 9.13 thousand ha to other cash crops. Forage crops comprise 8.98 thousand ha in the season of 2018/2019 compared to 9.0 thousand ha in 2017/2018 season.

As at the end of reporting period (30 September 2019) majority of cash crops except sugar beets, soy, corn and vegetables were already harvested. For cash crops already harvested as at 30 September 2019 gain (loss) on recognition at fair value of agricultural produce at point of harvest was calculated and for the cash crops harvest of which was not yet completed as at 30 September 2019, fair value of the crops as at balance sheet date was calculated using the same methodology as in previous quarters during 2019. It is important to mention as at reporting date (29 November 2019) harvesting of all cash crops was completed so preliminary data was already available for fair value estimations as at 30 September 2019.

<sup>2</sup> Adjusted working capital = Current biological assets + Trade receivables, advance payments and other receivables + Inventory – Trade payables – Other payables and current liabilities. The adjusted working capital formula eliminates cash and financing elements allowing the reader to see how the short-term assets and liabilities directly related to operations of the Group are being utilized.

**CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(All amounts are in EUR thousand, unless stated otherwise)

Based on the condition of the cash crops that were not yet harvested as at 30 September 2019 and the preliminary harvested yields the Group estimated the fair value of the crops as at 30 September 2019 using the following formula and assumptions:

Fair value of the crop = Costs incurred + (Cultivated area in ha \* forecasted average yield in tons per ha \* forecasted grain price per ton – cultivated area in ha \* forecasted total cost per ha) \* T \* (1 - X), where:

- Cost incurred is cost actually incurred for particular crop during the season of 2018/2019 as at 30 September 2019.
- Cultivated area in ha is the area of particular crop seeded and expected to be harvested.
- Forecasted average yield in tons per ha.
- Forecasted grain price per ton – average sales prices in contracts already signed for 2018/2019 season harvest, and where contracts were still not available - average sales prices of 2018.
- Forecasted total cost per ha.
- T is a portion of time in percentage already passed from sowing date until the forecasted harvest date (as at 30 September 2019 the completion was estimated to around 80-95% depending on the crop).
- X is the adjustment parameter for possible unexpected negative effects to the harvest. 5% was used in fair value estimations as at 30 September 2019 since majority of preliminary data were already available for estimations.

The estimated fair value of the harvested and not yet harvested crops as at 30 September 2019 is higher than the costs incurred by EUR 3.88 million and this difference was accounted as gain on changes in the fair value of biological assets and on recognition at fair value of agricultural produce at point of harvest in financial statements. For comparison, EUR 3.80 million loss on recognition at fair value of agricultural produce at point of harvest was reported as at 30 September 2018. Thus, the overall harvest results of 2018/2019 season are significantly better than the previous year.

It should be noted that the fair value of forage crop even at its point of harvest is measured at production cost incurred on forage crop. In other words, forage crop production cost is used as a measure of the fair value of that forage crop since there is no active market for forage crops and there is no reliable data to calculate market price of the forage crops. Therefore, the net result on revaluation of forage crops is equal to zero.

As it was already discussed in the Group’s consolidated interim financial statements for six months period ended 30 June 2019, shortage of rain in spring and beginning of summer of 2019 (April 2019 was declared one of the driest during the last decade by Lithuanian Hydrometeorological Service) as well as unusually hot June of 2019 had negative impact on the yield of most cash crops, especially legumes.

As it can be seen from the graph below the average wheat yield was 4.2 t/ha in 2019 compared to only 2.7 t/ha in 2018 and 4.1 t/ha in 2017. Despite the fact that average wheat yield this year was better compared to previous year the Group believes that the potential was around 15% higher if weather conditions would have been more average.

On the other hand, unfavorable weather conditions had more negatively impacted average legumes yield. It was slightly better than in 2018, but significantly lower than in 2017. Although, results from legumes were disappointing for two years in a row the Group constantly improves the technologies used in growing these crops and believes that upside yield potential is very significant for these crops should weather conditions been more favorable, that is closer to average weather conditions for this climate zone.

As can be seen from the data presented, the Group average wheat and legumes yields are getting closer to the average yields achieved on non-organic farms in Lithuania. These are related to the technology being improved each year, the experience gained in organic farming, and improved land cultivation and land quality.

**Wheat yield in Lithuania, t/ha**

**Legumes yield in Lithuania, t/ha**

NOTE: The data of LT organic farms in 2019 has not yet been published, the data of conventional farms in the LT is preliminary. Reference: Lithuanian Statistics Department, data of the survey of the activities of Lithuanian agricultural producers included in the Farm Accountancy Data Network (FADN), the Group’s data.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Table below depicts comparison of the two main grain crops - wheat and legumes - prices at which the harvest was evaluated (at fair value) in the seasons of 2017/2018 and 2018/2019. It should be noted that at the time of the publication of the financial statements for the nine months of 2019, significant part of the 2018/2019 season harvest has already been sold or contracted at fixed prices for the sale of the crops, so the fair value of the majority of crops was estimated based on actual contract prices.

<b>Average price of 1 tonne of crop, eliminating sales costs, EUR</b>	<b>2018/2019</b>	<b>2017/2018</b>	<b>Comparison 2018/2019 with 2017/2018, %</b>
<b>Wheat</b>	262	268	-2%
<b>Legumes</b>	359	354	1%

As can be seen from the data above, the price of 1 tonne of wheat in the season of 2018/2019 was 2% lower compared to the season of 2017/2018, while legumes - 1% higher. This indicates that the prices of the respective organic grains are stable and that the Group can sell the harvested production in the international markets for organic raw materials at the prices which reflect the "price premium" of organic produce.

Since different methodology was applied in estimating fair value of not yet harvested crops as at 30 September in 2018 and 2019, the comparison of Other cash crops which contained not yet harvested crops is not provided. However, it could be stated that there are no significant changes in market prices estimations for crops containing Other cash crops category in 2019 compared to 2018.

The comparison of the costs of the two main grain crops - wheat and legumes - per hectare of land for the seasons of 2017/2018 and 2018/2019 is presented in the table below.

<b>Cost per 1 ha cultivated land, EUR</b>	<b>2018/2019</b>	<b>2017/2018</b>	<b>Comparison 2018/2019 with 2017/2018, %</b>
<b>Wheat</b>	925	881	5%
<b>Legumes</b>	830	790	5%

As can be seen from the table above the costs per 1 ha of cultivated land of wheat and legumes increased by 5% comparing the seasons of 2017/2018 and 2018/2019. It is important to mention, that adoption of IFRS 16 in 2019 had positive impact on the costs side of around 18 EUR/ha since part of lease payments costs (interest part) are excluded from production costs and included in financial costs. As a result the actual cost per ha of wheat and legume increased slightly higher - around 7%. The cost increase is mainly related to better land preparation and more inputs to the land during the season to have better yield potential. However, the full potential was not achieved in 2018/2019 season due to unfavorable weather conditions already discussed.

Comparison of the gain (loss) on revaluation of agricultural produce at point of harvest for wheat and legumes during the seasons of 2017/2018 and 2018/2019 is provided in the table below. In case of wheat the result significantly improved and the gain was 177 EUR/ha in 2018/2019 season compared to 154 EUR/ha loss in 2017/2018 season. On the other hand, legumes were loss making during the season of 2018/2019 as well as in the previous season although the loss per ha reduced. Loss on revaluation at the point of harvest from legumes was 224 EUR/ha in 2018/2019 season compared to 266 EUR/ha a year earlier. As it was already discussed, despite the fact that results from legumes were disappointing for two years in a row the Group constantly improves the technologies used in growing these crops and believes that upside yield potential is very significant for these crops should weather conditions been more favorable. For instance, during 2016/2017 season the yield of legumes was almost double as high and these crops were among the most profitable that season.

<b>Gain (loss) on revaluation of agricultural produce at point of harvest, EUR/ha</b>	<b>2018/2019</b>	<b>2017/2018</b>
<b>Wheat</b>	177	-154
<b>Legumes</b>	-224	-266

### *Agricultural subsidies and gross profit of the crop growing segment*

The total amount of agricultural subsidies accrued during the three quarters of 2019 was EUR 6.62 million compared to EUR 6.90 million during the same period in 2018. Crop declaration for the season 2018/2019 is finished. However, there are still important details to be cleared with National Paying Agency and other governmental institutions regarding the amount of organic farming subsidies for the year 2019. The amount of organic farming subsidies for the Group for the year 2019 could be lower compared to planned to accrue amount with current assumptions. The final decisions by the governmental institutions should be adopted and final amounts of organic subsidies for the year 2019 should be clear no earlier than in December 2019.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Gross profit of crop growing segment including result of sales of agricultural produce, gain (loss) on changes in fair value of biological assets and agricultural subsidies, amounted to EUR 8.49 million in the first nine months of 2019 compared to EUR 1.81 million the year earlier.

### Preparation for the season of 2019/2020

Weather conditions in the fall of 2019 was favourable for autumn sowing and other preparatory land works for the season of 2019/2020. As a result, the seeding of winter crops and land preparation works were completed on time. During the autumn of 2019 the Group had sowed around 14.5 thousand ha of winter crops, which represent around half of the total cash crops area to be planted in the season of 2019/2020. For comparison, in the season of 2018/2019 around 15.6 thousand of winter cash crops were seeded. The condition of the winter crops as at reporting date is good. Favourable 2019 autumn weather also allowed for proper cultivation of the land and preparation for summer crop sowing in the spring 2020. As a result the Group is well prepared for the season of 2019/2020 and positive about next year harvest potential.

### Mushroom segment overview

The revenue of the mushroom growing segment was EUR 21.14 million for the nine months of 2019, around EUR 2.11 million or 11% higher compared to the same period in 2018 when revenue was EUR 19.04 million. Revenue from mushroom sales increased by EUR 2.00 million while revenue from mushroom seedbed sales increased by EUR 0.11 million.

Mushroom sales revenue increase relates to increased average sales prices. Serving fresh market is priority for the Group due to better prices and the purpose of keeping strong relations with the clients. Since prices of fresh mushrooms are higher than those sold to processors, increased volume share of fresh mushrooms also had impact on average prices – both organic and non-organic average prices increased. The average price of 1 tonne of mushrooms sold during the nine-month period of 2019 was 2,139 EUR (1,898 EUR/tonne during the nine months of 2018).

The total cost of sales of the mushroom growing segment accounted for EUR 19.63 million in the first three quarters of 2019 and was EUR 2.42 million higher compared to the same period in 2018 when it was EUR 17.21 million. Average cost of 1 tonne of mushrooms sold increased from 1,716 EUR/tonne to 1,982 EUR/tonne.

The average sales price of mushrooms and the average cost of sales of mushrooms increase is mostly related to the increase of sales of fresh mushrooms with packaging (the cost and sales price of packaged mushrooms is higher than that of weighed mushrooms sold in reusable containers).

The gross profit of mushroom growing segment for the nine-month period of 2019 was slightly lower compared to the same period in 2018: respectively EUR 1.51 million and EUR 1.82 million.

### Dairy segment overview

Dairy segment sales revenue for the first three quarters of 2019 amounted to EUR 7.63 million and was around 17% higher comparing to the same period a year earlier. Dairy segment sales comprise of sales of milk and cattle. The increased total volume of milk sold (by 10%) and increased average price of milk sold (by 9%) - both contributed to sales revenue growth while sales of cattle decreased by EUR 84 thousand due to lower quantity of sold cattle.

Total amount of milk sold per nine months of 2019 amounted to 18.60 thousand tonnes (or 20.04 kg per cow per day) compared to 16.93 thousand tonnes (or 18.45 kg per cow per day) during the same period of 2018 (10% increase). Average price of milk sold was around EUR 380 per tonne in the first three quarters of 2019 or 9% higher compared to the same period last year when it was EUR 347 per tonne.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

The volume share of milk sold at organic production prices was around 69% in the first three quarters of 2019 comparing to 37% in the same period of 2018. Moreover, the total amount of organic milk sales increased from 6.20 thousand tonnes during the first three quarters in 2018 to 12.91 thousand tonnes during the first three quarters in 2019 (108% increase year on year basis).

As it can be seen from the graph since May 2019 the share of milk sold at organic prices was around 80% and fluctuations in the share percentage were significantly lower compared to earlier periods. Thus, the Group managed to stabilize milk sold at organic prices share. However, the Group is further aiming to have a more diversified client portfolio in order to further increase organic milk share of sales. The Group is still in the process of getting its organic milk production certified according to China requirements which require the whole chain of production: from the farm till the processors to be certified. These certificates will widen potential to sell all the milk with organic price premium. The certification project is lagging behind the schedule, but the Group plans to complete the certification during the first quarter of 2020.

Dairy segment cost of sales amounted to EUR 7.64 million during first nine months of 2019 compared to EUR 7.33 million during the same period last year (4% increase). Despite of increase of the total dairy segment cost of sales which was mainly driven by an increase in cost of feed, cost of milk per kg went down by 4% due to the increase in milk yields.

During the nine-month period of 2019 the Group has incurred a loss of EUR 2.31 million on revaluation of biological assets (animal herd) comparing to EUR 1.54 million loss during the same period last year. The loss occurs when dairy animals which are sold for meat are revaluated to their fair value based on the price of meat as well as animal write-offs.

Despite increased loss from revaluation of biological assets, the result from milk sales improved and the total gross loss of dairy segment remained almost at the same level compared to previous year. The gross loss of dairy segment equalled to EUR 2.00 million loss for the nine-month period ended 30 September 2019 (gross loss of EUR 1.94 million was reported for nine-month period ended 30 September 2018).

### **End-consumer packaged goods segment**

Total revenues of end-consumer packaged goods segment amounted to EUR 1.83 million during the first nine months of 2019 compared to EUR 1.01 million a year earlier.

The USA market was entered at the end of third quarter of 2019 and first orders have already been delivered to Costco Wholesale USA. Negotiations with several major retailers in the USA and other countries are in process with estimation to be finished in the first quarter of 2020.

Preserved products, especially ready-to-eat organic soups, remain the main export product in the segment. Although intense talks on expansion of range with dairy products are in process in Middle East.

Cost of sales were EUR 1.83 million for the first nine months of 2019 compared to EUR 0.94 million for the same period in 2018.

For the first three quarters of 2019 gross profit of EUR 0.01 million was recorded (gross profit of EUR 0.06 million reported for the same period in 2018).

Revenues structure from the sale of the end consumer goods as at 30 September 2019 is depicted in the chart below.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

Revenues structure from end-consumer goods 2019 9 months,%

### **Operating expenses**

The Group's operating expenses for the first nine months of 2019 was around EUR 6.83 million. Comparing them to the previous year it should be noted that operating expenses for the first nine months of 2018 were significantly impacted by two one-off effects recorded in the first quarter of 2018: (a) the reversal of impairment loss of the assets of Karakash Agro OOO and Karakash OOO due to the signed agreement to sell the respective subsidiaries in the first quarter of 2018 (positive effect of EUR 1.8 million); (b) accrued expenses related to the termination of the acquisition of shares of UAB Arginta Engineering in the first quarter of 2018 (negative effect of EUR 0.7 million). In 2019 the Group started accounting for share-based payments for employees which affected the operating expenses by EUR 0.15 million during the nine months of 2019. These expenses are equity-settled only and does not have any influence on the Groups cash-flows. Taking into consideration all these aforementioned effects, operating expenses of the Group during three quarters of 2019 remained almost at the same level as in 2018. For comparison, operating expenses of the Group totalled EUR 6.68 million during three quarters of 2019 and EUR 6.74 million during the same period in 2018.

**CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(All amounts are in EUR thousand, unless stated otherwise)

**IV. EXPLANATORY NOTES**

**1. Basis of the preparation**

The accompanying interim financial information for the 9 months period ended 30 September 2019, has been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2018, as described in those annual financial statements. This financial information should be read in conjunction with the interim financial information for 9-months period ended 30 September 2018 and the balance sheet as of 31 December 2018 which have been prepared in accordance with IFRS as adopted by the EU.

The presentation currency is euro (EUR). The financial statements are presented in thousands of euro, unless indicated otherwise. Financial statements for the 9 months period ended 30 September 2019 and 30 September 2018 are not audited. Financial statements for the year ended 31 December 2018 are audited by the external auditor UAB PriceWaterhouseCoopers.

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below.

**Changes in accounting policies**

**Adoption of IFRS 16**

The group has adopted IFRS 16 retrospectively from 1 January 2019, but has not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are therefore recognised in the opening balance sheet on 1 January 2019.

On adoption of IFRS 16, the group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2019 was 3.79%.

In applying IFRS 16 for the first time, the group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2019; as short-term leases (which were recognized as expense on a straight-line basis);
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application;
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

For leases previously classified as operating leases the entity recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application. The measurement principles of IFRS 16 are only applied after that date. This resulted in measurement adjustments of EUR 35,346 thousand for right-of-use assets and EUR 35,346 thousand lease liabilities for variable lease payments based on an index or rate. The remeasurements to the lease liabilities were recognised as adjustments to the related right-of-use assets immediately after the date of initial application.

	<b><u>1 January 2019</u></b>
<i>Operating lease commitments disclosed as at 31 December 2018</i>	43,896
Discounted using the lessee's incremental borrowing rate of at the date of initial application	35,346
Add: finance lease liabilities recognized as at 31 December 2018	<u>11,507</u>
<b>Lease liability recognized as at 1 January 2019</b>	<b><u>46,853</u></b>
Current lease liabilities	8,405
Non-current lease liabilities	<u>38,449</u>
	<b><u><u>46,853</u></u></b>

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

*Changes in accounting policies (continued)*

The associated right-of-use assets for property leases were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet as at 31 December 2018. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

The recognized right-of-use assets relate to the following types of assets:

	<u>30 September 2019</u>	<u>1 January 2019</u>
Land	32,612	36,710
Buildings	947	1,038
<b>Total</b>	<b>33,559</b>	<b>37,748</b>

The change in accounting policy affected the following items in the balance sheet on 1 January 2019:

	<b>31 December 2018 as originally presented</b>	<b>IFRS 16</b>	<b>1 January 2019 (after recognition)</b>
<b>Non-current assets</b>			
Property plant and equipment	92,892	37,748	130,640
Intangible assets	2,427	(2,401)	26
<b>Total non-current assets</b>	<b>111,938</b>	<b>35,347</b>	<b>147,285</b>
<b>TOTAL ASSETS</b>	<b>171,890</b>	<b>35,347</b>	<b>207,237</b>
<b>Non-current liabilities</b>			
Obligations under finance lease	7,889	30,560	38,449
<b>Total non-current liabilities</b>	<b>26,034</b>	<b>30,560</b>	<b>56,594</b>
<b>Current liabilities</b>			
Current portion of finance lease liabilities	3,618	4,787	8,405
<b>Total current liabilities</b>	<b>54,141</b>	<b>4,787</b>	<b>58,928</b>
<b>Total liabilities</b>	<b>80,175</b>	<b>35,347</b>	<b>115,522</b>
<b>TOTAL EQUITY AND LIABILITIES</b>	<b>171,890</b>	<b>35,347</b>	<b>207,237</b>

The net impact on retained earnings on 30 September 2019 was a decrease of EUR 497 thousand. This negative impact arises due to the change of accounting principles only and in any case is not related to monetary expenses.

### Share-based payments

Share-based payments are accounted as the Group has started Employee Share Option plan which is described in Note 2 share capital.

### Accounting for expenses during the vesting period

Total cumulative expenses are calculated based on the formula described below. The expenses are accrued in the profit (loss) statement and equity based on the days lapsed since the grant date till the reporting date. Each year the entity will revise the expense to reflect the best available estimate of the number of equity instruments expected to vest.

The total expenses of share-based payments are calculated based on the formula:

$$\text{Share price @ grant date} \times \text{Granted shares} \times (1 - \text{annual staff turnover})^{\text{vesting period}}$$

Where:

The share price of options is based on the closing price at grant date at which the company's shares are traded on the Nasdaq Stock Exchange.

## **CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(All amounts are in EUR thousand, unless stated otherwise)

*Changes in accounting policies (continued)*

---

The grant date of the Option is set to be the date of the share-based payment agreement between the Company and the receiver as all the terms and conditions are set in this agreement and there are no other arrangements which would need to be confirmed at a later date.

Granted shares – shares to be granted to employee based on the Option agreement.

Staff turnover – chance that the option will be exercised is adjusted by the forecasted staff turnover percent during the vesting period. The ratio is calculated based on historical staff turnover data of 2 years. The historical staff turnover data includes turnover only of the positions which are set to receive the share-based payments. The turnover of other positions are excluded from the ratio.

There are option agreements which are signed with a special condition – that the receivers do not need to fulfill the service condition, but they will still need to wait 3 years vesting period before being able to exercise the option. Due to this staff turnover adjustment is excluded in the calculation of the expenses of these options as it does not affect their chances to receive the option.

Vesting period is set in the Option agreement and is equal to 3 years.

### **Accounting for issue of the shares**

When the vesting period will end and if the service conditions are met – the entity shall execute the shares-based transactions. The entity will issue new shares at the nominal value of EUR 0.29 from the Reserve to provide shares for employees and increase its share capital.

## **2. Share capital**

The share capital of AUGA group, AB as at 30 September 2019 was EUR 65,950,713.08 (65,950,713.08 as at 31 December 2018). The share capital was divided into 227,416,252 ordinary shares (227,416,252 ordinary shares as at 31 December 2018). Each issued share has a EUR 0.29 nominal value and fully paid. Each share had usual material and proprietary and non-proprietary rights as per Law on Companies of the Republic of Lithuania and the Company's Articles of Association.

### **Employee share option plan**

The establishment of the AUGA group, AB Employee Option Plan was approved by shareholders at the annual general shareholders' meeting which took place on 30 April, 2019. The Employee Option Plan is designed to provide long-term benefits for the employees, increase their performance and motivation to remain in the entity's employment.

Under the plan, participants are granted options to receive the Company's shares which only vest if service conditions are met. The service condition for the Option receiver is to complete a 3-year term of service to the Group. After the condition is met employee is eligible to exercise the option. There are no other vesting or performance conditions for the receiver. If the receiver does not fulfill the service condition – the option does not come into force and he is not eligible to exercise the option.

The option loses force if any restructuring, bankruptcy, liquidation or similar proceedings of the Company are commenced, and such proceedings continue and / or end with liquidation of the Company; Also if both parties (the Company and the receiver) agree to terminate the option agreement and if the receiver has caused damage to the Company through his actions or omissions.

These share-based payments for employees are equity-settled only. When exercisable, each option is convertible into one ordinary fully-fledged share. The shares will be issued from the Reserve to provide shares for employees (formed and approved by the shareholders) at the nominal value of 0.29 and will increase the Company's share capital.

Options are granted under the plan for no consideration. There are no social security contributions or income tax which would be payable by the Company at the time of the exercise (or any other time during the vesting period) and which should be accrued in the liabilities. Employees who shall exercise the option and receive the shares of the company will need to pay the income tax on their own at the time of exercise.

### Agreements with the intermediaries in public trading securities

The Company and UAB FMĮ Orion Securities (A. Tumėno st. 4, B korpusas, LT-01109, Vilnius) signed an agreement regarding handling of Shareholders accounts.

### 3. The Structure of the Group

As of 30 September 2019, the consolidated Group (hereinafter the Group) consists of the Company and one hundred thirty-six subsidiaries (31 December 2018: one hundred thirty-five subsidiaries). On 5 March 2019 subsidiary UAB "Ars Ingeni" (legal entity code 302602713) was sold which was not related to main activities of the Group and not generated any revenue. On 9 August 2019 two additional subsidiaries were acquired – Tėvynės žemelė UAB (legal entity code 303301428) and Tėviškės žemelė UAB (legal entity code 303207199). The latter subsidiary owns land portfolio which was previously consolidated to the Group's consolidated balance sheet on the basis of land repurchase agreement. Tėvynės žemelė UAB is the sole shareholder of Tėviškės žemelė UAB and does not hold any other significant assets except shares of this subsidiary. The subsidiaries included in the Group's consolidated financial statements for the both periods are indicated below.

### 7. Receivables and advance payments

As at the balance sheet date Group's receivables and advance payments consisted of the following:

	As at 30 September 2019	As at 31 December 2018
Total trade accounts receivable	7,976	6,411
VAT receivable	2,028	719
Receivables from National Paying Agency	6,984	4,302
Accounts receivable from private individuals	52	68
Other receivables	28	1,097
Advance payments and deferred expenses	3,337	2,042
Less: loss allowance	(68)	(66)
<b>Total trade accounts receivable, net</b>	<b>20,392</b>	<b>14,573</b>
Non-current receivables, gross	5,972	5,840
Less: loss allowance	(199)	(199)
<b>Total</b>	<b>26,165</b>	<b>20,214</b>

Receivables from the National Paying Agency are the direct subsidies receivable for crops and milk, which are due by 30 April of the following year.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

### 8. Financial liabilities

The Group's long-term borrowings consisted of the following:

	<b>As at 30 September 2019</b>	<b>As at 31 December 2018</b>
<i>Borrowings from banks</i>		
Mushroom growing companies	2,541	3,949
Agricultural entities	9,611	10,901
<i>Long-term payment to 3<sup>rd</sup> parties</i>		
Long-term payable to the State	1,229	1,401
Long-term payable to creditors	6,347	5,197
Long-term payable to the investment fund for purchased land	1,056	1,637
<b>Total</b>	<b>20,784</b>	<b>23,085</b>
<b>Less: amounts, payable within one year (according to agreements)</b>	<b>(5,551)</b>	<b>(9,256)</b>
<b>Total long-term borrowings</b>	<b>15,233</b>	<b>13,829</b>

The Group owes payable amount to the State of EUR 1,229 thousand for land acquisition made by Group in 2008 - 2014. The payable amount to State is over 15-year period.

The long-term borrowings and payables are repayable as follows:

	<b>As at 30 September 2019</b>	<b>As at 31 December 2018</b>
<i>Borrowings from banks</i>		
Within second year	11,655	10,840
Within third and fourth year	1,963	1,968
After fifth year and later	1,615	1,021
<b>Total</b>	<b>15,233</b>	<b>13,829</b>

The Group's short-term borrowings were the following:

	<b>As at 30 September 2019</b>	<b>As at 31 December 2018</b>
<i>Borrowings from banks</i>		
Mushroom growing companies	2,400	2,400
Parent company	22,600	18,870
<b>Total short-term borrowings</b>	<b>25,000</b>	<b>21,270</b>

Short-term loans from banks include EUR 25,000 thousand (in 2018: EUR 21,270 thousand) credit-line facilities.

### 9. Leases

The Group's leases consisted of the following:

	<b>As at 30 September 2019</b>	<b>As at 31 December 2018</b>
<i>Lease liabilities</i>		
Lease liabilities related to right-of-use assets*	31,027	-
Lease liabilities related to other assets**	9,758	11,507
<b>Total</b>	<b>40,784</b>	<b>11,507</b>
<b>Less: amounts payable within one year</b>		
Lease liabilities related to right-of-use assets*	270	-
Lease liabilities related to other assets**	1,368	3,618
<b>Total</b>	<b>1,639</b>	<b>3,618</b>
<b>Total long-term leases</b>	<b>39,145</b>	<b>7,889</b>

\* Lease liabilities accounted as operational lease before adoption of IFRS 16.

\*\* Lease liabilities accounted as financial lease before adoption of IFRS 16.

## CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

### 10. Results of business segments

#### CROP GROWING SEGMENT

<b>a) Sales of agricultural produce</b>	<i>9-month period ended 30 September 2019</i>	<i>9-month period ended 30 September 2018</i>
Total revenue of sold agricultural produce, EUR'000	16,448	15,592
Total cost of sold agricultural produce*, EUR'000	(17,727)	(16,137)
Total inventory write-offs, EUR'000	(732)	(747)
<b>Result of sales of agricultural produce, EUR'000</b>	<b>(2,011)</b>	<b>(1,292)</b>

\* The cost of sold agricultural produce represents the value of crops evaluated at fair values at point of harvest and related sales costs.

<b>b) Harvest of agricultural produce</b>	<i>9-month period ended 30 September 2019</i>	<i>9-month period ended 30 September 2018</i>
<b>Total cultivated land, ha</b>	<b>38,584</b>	<b>38,474</b>
Wheat	11,503	8,854
Legumes	8,039	10,684
