## Market tendencies and development of the company. Risks.

The activity of the company in the 1st quarter of 2010 gives the ground to consider that the situation on the market where production of the company is represented has stabilized and there are certain growth trends outlined. It is indicated by the economic situation on the markets of the states where production of the company is represented and by purchase orders volumes increase from the side of our main partners (IWIS, KTS) represented on the Western market as well. Improvement of the situation on the Eastern market has been favoured by the support program for automobile manufacturers adopted by the government of Russian Federation from 01.03.2010 which undoubtedly shall increase production delivery volumes on conveyors of automobile factories.

Unfortunately, the Management Board of the company notes that up trends can be slowed down owing to price increase on metal products which started on the market in the 2<sup>nd</sup> quarter of 2010.

However at the same time the Management Board hopes that rate of turnover growth of the company forecasted for 2010 will be fulfilled which will result in stabilization of the financial situation of the company.

While being included into a global and European economics the company is not able to survive like in an oasis of "prosperity" and it faces all factors of global crisis to the same degree, reflecting the level of the general decrease. The Management Board has noticed this circumstance already before, and it is valid to the full extant. Therefore, in the analysis of the company's development tendencies and risks, it is constrained to repeat the same aspects which are mentioned in the quarterly reports of year 2009.

In the abovementioned circumstances the company is forced to work in economy regime by using internal resources and reorganizing production processes according to the existing volumes of demand, production and costs, including optimization of staff in accordance with production volumes and its actual employment.

The Management Board considers it as its main task to continue working upon minimizing global crisis risks, maintaining the company with its brand, technologies, personnel, traditional partners and market with future development upon overcoming the crisis together with the whole global and Latvian economics with simultaneous using of all favorable conditions appearing for development of the company's chances and its market growth.

Despite the fact that the actual net turnover in the 1<sup>st</sup> quarter is less than the forecasted by 106 thous.LVL (151 thous.EUR), the company not only increased the turnover compared to the 1<sup>st</sup> quarter of 2009 by 523 thous.LVL (744 thous.EUR), but also according to the performance there is the profit gained in the amount of 317 thous.LVL (451 thous.EUR), which attests correctly chosen arrangements for activity in crisis conditions.
