SHARE PRICE DEVELOPMENT

MANAGEMENT REPORT

Information on the results of the company in 6 months of year 2015

In 6 months period of 2015 net-turnover was fulfilled in the amount of 3 187 thous.EUR, which is by 3 262 thous.EUR or 51% less than index of the 6 months period of 2014.

Commodity output is estimated in the amount of 2 641 thous.EUR. The result of 6 months of 2015 is by 1 275 thous.EUR lower than in the relevant period of previous year.

In the reporting period the company exported 61 % of its core products to the East and West: among them 35% eastwards and 26% westwards; 39% of products were sold on domestic market.

The Company closed the 6 months period of 2015 with book losses before taxes in the amount of 1 711 thous.EUR. Book losses after taxes amounted to 1 771 thous.EUR. The analysis of the loss structure and causes is given in the section „Significant events. Market tendencies and development of the company. Risks” of the Management report to the annual report for 2014 also applies to the figures of the reporting period.

The average statistical number of employees of JSC “Ditton pievadķēžu rūpnīca” was 209 employees in 6 months of year 2015.

The average salary amounted to 457 EUR in 6 months period of 2015, which is by 38 EUR less than in 6 months of 2014.

Significant events. Market tendencies and development of the company. Risks.

Having analyzed the Company’s operating conditions, performance and market situation in six months of 2015, the Company’s management believes that information set out before in the management report to the annual report for 2014 is fully up to date and relevant for the reporting period, and still notes that in the field of metal processing and machine building there are no increasing trends observed in the sector represented by the Company, which is also reflected in the Company’s performance indices for the reporting period.

In accordance with the output indices for the products with the JSC “Ditton pievadķēžu rūpnīca” trade mark, their sales to the final consumers is structurally divided into the following main segments:

- “Western” market or mainly European market, and
- “Eastern” market or market of the Russian Federation, Customs Union, CIS and Ukraine.

The Company is integrated into the production and economics of those countries, which belong to the above mentioned market segments of the Company’s product sales, regardless of the products promotion procedures and systems on these markets. In this way, all the trends, factors, risks, crises and other conditions on these markets have direct impact on the Company, its operations, as well as the income gained from its activities.

The necessity to retain the Company’s activity obliges the Company’s Management Board to take all of the measures in order to retain both market segments, to operate there in proportion to the their conditions and factors, to reach compromises with partners, including unfavorable ones, to retain all market segments, including when there are temporary adverse factors or crisis phenomena, in its turn to practice refusal of partnership with someone only on condition if these production volumes are replaced by

JSC "DITTON PIEVADKEZU RUPNICA"
FINANCIAL REPORT FOR 6 MONTHS OF 2015

analogous ones in other market segments or with other partners (more detailed analysis thereof is given in the management report to the annual report for 2014).

"Western" market segment

Having analyzed the Company's operating conditions, performance and situation of this market segment in 6 months of 2015, the Company's management believes that information set out before in the management report to the annual report for 2014 is fully up to date and relevant for the reporting period, and still notes that in the field of metal processing and machine building there are no increasing trends observed in the sector represented by the Company, which is also reflected in the Company's performance indices for the reporting period.

In the opinion of the management in the industrial production sector represented by the Company the reporting period still has been characterized by stagnation and lack of production growth, which previously has been defined by market analysts as "the second wave of the crisis", which becomes apparent not so much as a catastrophic or sharp decline, but more as the lack of activity. In substantiation of these conditions the Company refers to the report of the Industry, Research and Energy Committee of the European Parliament from November 15, 2013 "CARS 2020: Action Plan for a competitive and sustainable automotive industry in Europe" (2013/2062 (INI)), where the situation on the automotive market is analyzed, and addressing this issue at EU level refers to its overall relevance and importance. The Management Board focused on these circumstances in its previous management reports, making a moderately optimistic or pessimistic forecasts for its performance, and these forecasts, evaluation of the activity in market segments as well as information about other negative factors affecting the Company's activity remain relevant even now.

"Eastern" market segment

The Management gave a detailed analysis of the situation in this segment in the Company's Annual Report 2014, including the examination of stages and processes arising in this segment.

The management pointed out that one of the disadvantages was instability of the exchange rate of the ruble being the equivalent for trading operations in the Customs Union, and it was triggered by transnational prohibition processes, instability in oil values and crisis phenomena caused by these adverse factors in the economies of the Customs Union and the CIS.

These circumstances resulted in the instability of demand for products, price hikes, refusals in favor of domestic producers due to cheaper offerings in the ruble currency (despite loss of quality), etc. Business and partnership continued (and continues) to exist with the hope that the restricting conditions will be cancelled and the ruble will stabilize, which will allow planning and predicting relationships in a certain perspective. Unfortunately, after prolongation of economic sanctions, after a short stability market and mutual exchange rate volatility increased again and as the result loss risks from operation in this segment increased significantly again.

Another element affecting this market segment is the general content of economic policies of the Customs Union offering businesses to focus on the Eastern region instead of "unpredictable West". By default, different types of support, including at the consumer

JSC "DITTON PIEVADKEZU RUPNICA"
FINANCIAL REPORT FOR 6 MONTHS OF 2015

level, are dedicated to sales of the products coming from states having not joined the sanctions system.

In addition, at the national level there are actively stimulated domestic companies of this market segment starting production of the products alternative to the ones of JSC "Ditton pievadķēžu rūpnīca".

In such a way, risks and losses in this market segment are primarily related not to the Company, but rather to the circumstances which the Company is unable to influence and to eliminate by reasonable and available means.

Along with this, the Company considers it necessary to continue operating in this market segment, with regard to investments into this market, contacts, a well-known trademark and image of a high-quality manufacturer. In addition, certain optimism is caused by the fall of Chinese producers' level and price increases in the economy of this country, increase of Customs Union consumer demands towards the price-quality ratio level, where the Company has obvious competitive advantages.

Besides, the Company plans to activate sales opportunities of its production potential in other industrial sectors, where special chain gears are in demand, like units and machinery being applied in agriculture and production. The Company is also implementing a loss minimization program due to the optimization of the internal structure, use of infrastructural, intellectual and human resources.

The Company's general outlook is moderately positive.
