Management report

The companies of AB INVL Baltic Real Estate have invested in an office, warehouse and manufacturing real estate objects in Lithuania and Latvia. Group companies have about 51 700 sq. m. of the real estate space. The aim of INVL Baltic Real Estate is to earn from commercial real estate investments, ensuring growth in income from rented space.

According to the valuation completed in the end of 2013, consolidated value of owned real estate was LTL 116.7 million. From the 29th of April, 2014 when the company was founded until the 30th of September, 2014 rent income amounted to LTL 3.7 million, while net profit was equal to LTL 0.5 million. At the same time consolidated equity was LTL 49.8 million.

Invaldos Nekilnojamojo Turto Fondas - subsidiary of INVL Baltic Real Estate on the 26th of September, 2014 has signed a loan agreement with Šiaulių bankas amounting to EUR 15.35 million (LTL 53 million). Duration of the agreement is 5 years. The amount of money received from Šiaulių bankas was used to refinance Invaldos Nekilnojamojo Turto Fondas liabilities to another bank. The loan will enable management of the company to focus on the long-term value creation and return maximisation for the shareholders.

Commercial real estate market is showing strong growth trend as together with strengthening economy financial situation for most of the businesses is improving too and they start to look for office space. Increase in demand dictates that despite the new projects level of vacant space is steadily low. In Vilnius during the 3rd quarter of 2014 only a single business centre (3 300 sq. m.) was opened and vacant office space shrank from 4.8 to 4.6 percent. The increase in business centres' supply is expected in 2015 therefore growth in vacancy levels is expected as well in the second half of 2015. Lately income from lease had a tendency to grow.

Situation in the market of logistic centres stays stable. Despite the geopolitical tension and its negative impact on logistic companies and some manufacturers, levels of vacancy and rent prices in the logistic centres are unchanged.

INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014

(all amounts are in LTL thousand unless otherwise stated)

Notes to the interim condensed financial statements

1 General information

AB INVL Baltic Real Estate (hereinafter the Company) is a joint stock company registered in the Republic of Lithuania. It was established on 29 April 2014, following the split-off of 30.90% assets, equity and liabilities from AB Invalda LT (code 121304349). Entities, which business is investment into investment properties held for future development and in commercial real estate and its rent, were transferred to the Company (hereinafter split-off). More details about the split-off are disclosed in Note 3.

The registration address is as follows:

Kalvarijų str. 11A-20,
Vilnius,
Lithuania.

The address of the office is as follows:

Šeimyniškių str. 1A,
Vilnius,
Lithuania.

These financial statements cover the interim financial period of the Company, starting from the Company's establishment date 29 April 2014 and ending on 30 September 2014.

The Company manages shares of entities investing into commercial real estate and investment properties held for future development (detailed list of subsidiaries is presented below). The Group is operated in one segment – real estate segment. The Group has invested in an office, warehouse, manufacturing real estate objects in Lithuania directly and in Latvia indirectly. All objects give rental income, almost all objects have further development prospects.

The Company's share capital is divided into 7,044,365 ordinary registered shares with the nominal value of LTL 1 each. All the shares of the Company were fully paid. Subsidiaries did not hold any shares of the Company. As at 30 September 2014 the shareholders of the Company were (by votes)*:

	Number of votes held	Percentage
UAB LJB Investments	2,144,351	30.44
Mrs. Irena Ona Mišeikiene	2,035,918	28.90
AB Invalda LT	877,957	12.46
UAB Lucrum Investicija	714,967	10.15
Mr. Alvydas Banys	540,750	7.68
Ms. Indrė Mišeikytė	140,618	2.00
Other minor shareholders	589,804	8.37
Total	<u>7,044,365</u>	<u>100.00%</u>

* Some shareholders have sold part of their shares under repo agreement (so did not hold the legal ownership title of shares), but they retained the voting rights of transferred shares.

The Company's shares are traded on the Baltic Secondary List of NASDAQ OMX Vilnius from 4 June 2014.

AB INVL BALTIC REAL ESTATE**INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014**

(all amounts are in LTL thousand unless otherwise stated)

1 General information (cont'd)

The Group consists of the Company and the following directly and indirectly owned subsidiaries (hereinafter the Group):

Company	Registration country	Share of the stock held by the Group (%)	Main activities
AB Invaldos nekilnojamojo turto fondas	Lithuania	100.00	Real estate investor
UAB Roveliija	Lithuania	100.00	Real estate investor
UAB Perspektyvi veikla	Lithuania	100.00	Dormant
UAB Proprietas	Lithuania	100.00	Dormant

Subsidiary AB Invaldos nekilnojamojo turto fondas also owned 100% of the shares of UAB INTF investicija. In May 2014 the bankruptcy was instituted in this entity, therefore, the Group does not control and not consolidate this entity.

2 Basis of preparation and accounting policies

The principal accounting policies applied in preparing the Group's financial statements for the nine months ended 30 September 2014 are as follows:

2.1. Basis of preparation

The interim condensed financial statements for the nine months ended 30 September 2014 have been prepared in accordance with IAS 34 Interim Financial Reporting.

These financial statements have been prepared on a historical cost basis, except for investment properties that have been measured at fair value. The financial statements are presented in thousands of Litas (LTL) and all values are rounded to the nearest thousand except when otherwise indicated.

AB INVL BALTIC REAL ESTATE

INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014

(all amounts are in LTL thousand unless otherwise stated)

2 Basis of preparation and accounting policies (cont'd)

Adoption of new Standards and Interpretations, which are mandatory from 1 January 2014, is noted below.

IFRS 10 *Consolidated Financial Statements*

IFRS 10 replaces all of the guidance on control and consolidation in IAS 27 *Consolidated and separate financial statements* and SIC-12 *Consolidation - special purpose entities*. IFRS 10 changes the definition of control so that the same criteria are applied to all entities to determine control. This definition is supported by extensive application guidance. IFRS 10 had no impact on the Group's consolidation structure.

IFRS 11 *Joint Arrangements*

IFRS 11 replaces IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities—Non-Monetary Contributions by Ventures*. Changes in the definitions have reduced the number of types of joint arrangements to two: joint operations and joint ventures. The existing policy choice of proportionate consolidation for jointly controlled entities has been eliminated. Equity accounting is mandatory for participants in joint ventures. IFRS 11 had no impact on the Group's financial statements for nine months ended 30 September of 2014.

IFRS 12 *Disclosure of Interest in Other Entities*

IFRS 12 applies to entities that have an interest in a subsidiary, a joint arrangement, an associate or an unconsolidated structured entity. IFRS 12 sets out the required disclosures for entities reporting under the two new standards: IFRS 10, *Consolidated financial statements*, and IFRS 11, *Joint arrangements*, and replaces the disclosure requirements currently found in IAS 28, *Investments in associates*. IFRS 12 requires entities to disclose information that helps financial statement readers to evaluate the nature, risks and financial effects associated with the entity's interests in subsidiaries, associates, joint arrangements and unconsolidated structured entities. To meet these objectives, the new standard requires disclosures in a number of areas, including significant judgments and assumptions made in determining whether an entity controls, jointly controls, or significantly influences its interests in other entities, extended disclosures on share of non-controlling interests in group activities and cash flows, summarised financial information of subsidiaries with material non-controlling interests, and detailed disclosures of interests in unconsolidated structured entities. None of these disclosure requirements are applicable for interim condensed consolidated financial statements. Accordingly, the Group has not made such disclosures.

IAS 27 *Separate Financial Statements*

IAS 27 was changed and its objective is now to prescribe the accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements. The guidance on control and consolidated financial statements was replaced by IFRS 10 *Consolidated Financial Statements*. The amendment had no impact on the Group's financial statements for nine months ended 30 September of 2014.

IAS 28 *Investments in Associates and Joint Ventures*

The amendment of IAS 28 resulted from the Board's project on joint ventures. When discussing that project, the Board decided to incorporate the accounting for joint ventures using the equity method into IAS 28 because this method is applicable to both joint ventures and associates. With this exception, other guidance remained unchanged. The amendment had no impact on the Group's financial statements for nine months ended 30 September of 2014.

Amendments to IAS 32 *Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities*

The amendment added application guidance to IAS 32 to address inconsistencies identified in applying some of the offsetting criteria. This includes clarifying the meaning of 'currently has a legally enforceable right of set-off' and that some gross settlement systems may be considered equivalent to net settlement. The amendment had no impact on the Group's financial statements for nine months ended 30 September of 2014.

AB INVL BALTIC REAL ESTATE

INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014

(all amounts are in LTL thousand unless otherwise stated)

2 Basis of preparation and accounting policies (cont'd)

Transition Guidance Amendments to IFRS 10, IFRS 11 and IFRS 12

The amendments clarify the transition guidance in IFRS 10 *Consolidated Financial Statements*. Entities adopting IFRS 10 should assess control at the first day of the annual period in which IFRS 10 is adopted, and if the consolidation conclusion under IFRS 10 differs from IAS 27 and SIC 12, the immediately preceding comparative period (that is, year 2013 for a calendar year-end entity that adopts IFRS 10 in 2014) is restated, unless impracticable. The amendments also provide additional transition relief in IFRS 10, IFRS 11, *Joint Arrangements*, and IFRS 12, *Disclosure of Interests in Other Entities*, by limiting the requirement to provide adjusted comparative information only for the immediately preceding comparative period. Further, the amendments will remove the requirement to present comparative information for disclosures related to unconsolidated structured entities for periods before IFRS 12 is first applied. The amendment had no impact on the Group's financial statements for nine months ended 30 September of 2014.

Amendments to IFRS 10, IFRS 12 and IAS 27 - *Investment entities*

The amendment introduced a definition of an investment entity as an entity that (i) obtains funds from investors for the purpose of providing them with investment management services, (ii) commits to its investors that its business purpose is to invest funds solely for capital appreciation or investment income and (iii) measures and evaluates its investments on a fair value basis. An investment entity will be required to account for its subsidiaries at fair value through profit or loss, and to consolidate only those subsidiaries that provide services that are related to the entity's investment activities. IFRS 12 was amended to introduce new disclosures, including any significant judgements made in determining whether an entity is an investment entity and information about financial or other support to an unconsolidated subsidiary, whether intended or already provided to the subsidiary. The amendment had no impact on the Group's financial statements for nine months ended 30 September of 2014.

Amendments to IAS 39 - *Novation of Derivatives and Continuation of Hedge Accounting*

The amendments will allow hedge accounting to continue in a situation where a derivative, which has been designated as a hedging instrument, is novated (i.e parties have agreed to replace their original counterparty with a new one) to effect clearing with a central counterparty as a result of laws or regulation, if specific conditions are met. The amendments are not relevant to the Group currently, because it has not recognised any hedging instrument.

2.2. Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. The financial statements of the subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies.

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases. All intra-group balances, transactions, income and expenses, unrealised gains and losses and dividends resulting from intra-group transactions that are recognised in assets, are eliminated in full.

Non-controlling interest is the equity in a subsidiary not attributable, directly or indirectly, to a parent and is presented separately in the consolidated income statement and within equity in the consolidated statement of financial position, separately from parent shareholders' equity. The group treats transactions with non-controlling interests as transactions with equity owners of the group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the group ceases to have control, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss or retained earnings, as appropriate.

AB INVL BALTIC REAL ESTATE

INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014

(all amounts are in LTL thousand unless otherwise stated)

2 Basis of preparation and accounting policies (cont'd)

2.3. Functional and presentation currency

The consolidated financial statements are prepared in local currency of the Republic of Lithuania, Litas (LTL), and presented in LTL thousand. Litas is the Company's functional and the Group's and the Company's presentation currency. Starting from 2 February 2002 Lithuanian Litas is pegged to euro at the rate of 3.4528 Litas for 1 euro. The exchange rates in relation to other currencies are set daily by the Bank of Lithuania.

As these financial statements are presented in LTL thousand, individual amounts were rounded. Due to the rounding, totals in the tables may not add up.

2.4. Business combinations and goodwill

The group applies the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred from 1 January 2010 (until that they were included in the acquisition cost). Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration, which is deemed to be an asset or liability, will be recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it should not be remeasured until it is finally settled within equity. In instances where the contingent consideration does not fall within the scope of IAS 39, it is measured in accordance with the appropriate IFRS.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the income statement.

2.5. Property, plant and equipment

Property, plant and equipment is stated at cost, excluding the costs of day to day servicing, less accumulated depreciation and accumulated impairment losses. Such cost includes the cost of replacing part of the plant and equipment when the cost is incurred, if the recognition criteria are met. Replaced parts are written off.

The carrying values of property, plant and equipment are reviewed for impairment when events or change in circumstances indicate that the carrying value may not be recoverable.

Depreciation is calculated using the straight-line method over the following estimated useful lives.

Other non-current assets	4–6 years
--------------------------	-----------

The asset residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year end to ensure that they are consistent with the expected pattern of economic benefits from items in property, plant and equipment.

2 Basis of preparation and accounting policies (cont'd)

2.5 Property, plant and equipment (cont'd)

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement within "other income" in the year the asset is derecognised.

2.6. Investment properties

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the companies in the consolidated Group, are classified as investment properties. Investment properties also include properties that are being constructed or developed for future use as investment properties.

Land held under operating leases is classified and accounted for by the Group as investment property when the rest of the definition of investment property is met. Land is not presented separately from the buildings as these assets cannot be acquired or sold separately.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are carried at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the income statement in the year in which they arise.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the income statement within "Net gains (losses) from fair value adjustments on investment property" in the year of retirement or disposal.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by the end of owner occupation, commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner occupation or commencement of development with view to sale.

For a transfer from investment property to owner occupied property or inventories, the deemed cost of property for subsequent accounting is its fair value at the date of change in use. If the property occupied by the Group as an owner occupied property becomes an investment property, the Group accounts for such property in accordance with the policy adopted for property, plant and equipment up to the date of change in use. For a transfer from inventories to investment property, any differences between fair value of the property at that date and its previous carrying amount are recognised in the income statement.

2.7. Intangible assets other than goodwill

Intangible assets are measured initially at cost. Intangible assets are recognised if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets other than goodwill are assessed to be finite. Intangible assets are amortised using the straight-line method over the best estimate of their useful lives.

Other intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Other intangible assets are amortised during 3 - 4 years.

(all amounts are in LTL thousand unless otherwise stated)

2 Basis of preparation and accounting policies (cont'd)

2.8. Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

Impairment losses of continuing operations are recognised in the income statement within "impairment, write-down and provisions".

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the income statement. Impairment losses recognised in relation to goodwill are not reversed for subsequent increases in its recoverable amount.

2.9. Financial assets

Financial assets within the scope of IAS 39 are classified as either financial assets at fair value through profit or loss, loans and receivables, held to maturity investments, available-for-sale financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The classification depends on the purpose for which the financial assets were acquired. When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial asset or financial liability not at fair value through profit or loss, directly attributable transaction costs.

The Group determines the classification of its financial assets at initial recognition.

All regular way purchases and sales of financial assets are recognised on the settlement date. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement loans and receivables are subsequently carried at amortised cost using the effective interest method less any allowance for impairment. Amortised cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognised in the income statement when the loans and receivables are derecognised or impaired, as well as through amortisation process. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. The group's loans and receivables comprise 'loans granted', 'trade and other receivables', 'cash and cash equivalents' in the statement of financial position.

2 Basis of preparation and accounting policies (cont'd)

2.10. Impairment of financial assets

Assets carried at amortised cost

The Group assesses at each reporting date whether is any objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the group uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- The group, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider;
- It becomes probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:
 - (i) Adverse changes in the payment status of borrowers in the portfolio; and
 - (ii) National or local economic conditions that correlate with defaults on the assets in the portfolio.

The group first assesses whether objective evidence of impairment exists.

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. The carrying amount of the asset is reduced through use of an allowance account.

The Group assesses whether objective evidence of impairment exists individually for financial assets. When financial asset is assessed as uncollectible and all collateral has been realised or has been transferred to the Group the impaired asset is derecognised. The objective evidence for that is insolvency proceedings against the debtor is initiated and the debtor has not enough assets to pay to creditors, the debtor could not be found.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in profit or loss within "impairment, write-down, allowances and provisions", to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

In relation to trade receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all of the amounts due under the original terms of the invoice. The carrying amount of the receivable is reduced through use of an allowance account. Impaired debts are derecognised when they are assessed as uncollectible.

2.11. Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less.

For the purpose of the cash flow statement, cash and cash equivalents comprise cash on hand and in current bank account as well as deposit in bank with an original maturity of three months or less.

2 Basis of preparation and accounting policies (cont'd)

2.12. Financial liabilities

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Group determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

The measurement of financial liabilities depends on their classification as follows:

Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities. Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

2.13. Derecognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired;
- the Group and the Company retain the right to receive cash flows from the asset, but have assumed an obligation to pay them in full without material delay to a third party under a “pass through” arrangement; or
- the Group or the Company have transferred their rights to receive cash flows from the asset and either (a) have transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

Where the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group’s continuing involvement in the asset. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the income statement.

2 Basis of preparation and accounting policies (cont'd)

2.14. Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- a) There is a change in contractual terms, other than a renewal or extension of the arrangement;
- b) A renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- c) There is a change in the determination of whether fulfilment is dependant on a specified asset; or
- d) There is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios a), c) or d) and at the date of renewal or extension period for scenario b).

Operating lease

Group as a lessee

Leases where the lessor retains all the risk and benefits of ownership of the asset are classified as operating leases. Operating lease payments (net of any incentives received from the lessor) are recognised as an expense in the income statement on a straight-line basis over the lease term.

Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

AB INVL BALTIC REAL ESTATE

**INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30
SEPTEMBER 2014**

(all amounts are in LTL thousand unless otherwise stated)

2 Basis of preparation and accounting policies (cont'd)

2.15. Revenue recognition

The group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the group's activities as described below. The group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Revenue is measured at the fair value of the consideration received, excluding discounts, rebates, and other sales taxes or duty. The following specific recognition criteria must also be met before revenue is recognised.

Rental income

Rental income arising from operating leases on investment properties is accounted for on a straight-line basis over the lease terms. When the Group provides incentives to its tenants, the cost of incentives is recognised over lease term, on a straight-line basis, as a reduction of rental income.

Interest income

Income is recognised as interest accrues (using the effective interest method that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset).

2.16. Cash and non-cash distribution to equity holders of the parent

The Company recognises a liability to make cash or non-cash distributions to equity holders of the parent when the distribution is authorised and the distribution is no longer at the discretion of the Company. In Lithuania a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity. The liability for non-cash distributions is measured at the fair value of the assets to be distributed with subsequent fair value re-measurement recognised directly in equity as adjustment to the amount of the distribution.

Upon distribution of non-cash assets, any difference between the carrying amount of the liability and the carrying amount of the assets distributed is recognised in the statement of profit or loss.

2.17. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Capitalisation of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are incurred. Borrowing costs are capitalised until the assets are substantially ready for their intended use. If the resulting carrying amount of the asset exceeds its recoverable amount, an impairment loss is recorded.

2 Basis of preparation and accounting policies (cont'd)

2.18. Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted by the end of the reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

The standard income tax rate in Lithuania was 15 % in 2014. Starting from 2010, tax losses can be transferred at no consideration or in exchange for certain consideration between the group companies if certain conditions are met.

Deferred income taxes are calculated using the liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred income tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse based on tax rates enacted or substantially enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

By Lithuanian Income Tax Law shall be not taxed sale of shares of an entity, registered or otherwise organised in a state of the European Economic Area or in a state with which a treaty for the avoidance of double taxation has been concluded and brought into effect and which is a payer of corporate income tax or an equivalent tax, to another entity or a natural person where the entity transferring the shares held more than 25% of voting shares in that entity for an uninterrupted period of at least two years. If mentioned condition is met or will be met by judgement of the management of the Company, there are not recognised any deferred tax liabilities or assets in respect of temporary differences associated with this investments.

Deferred income tax asset has been recognised in the statement of financial position to the extent the management believes it will be realised in the foreseeable future, based on taxable profit forecasts. If it is believed that part of the deferred income tax asset is not going to be realised, this part of the deferred tax asset is not recognised in the financial statements.

Deferred tax asset are not recognised:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

Tax losses can be carried forward for indefinite period, except for the losses incurred as a result of disposal of securities and/or derivative financial instruments. Such carrying forward is disrupted if the Company changes its activities due to which these losses incurred except when the Company does not continue its activities due to reasons which do not depend on the Company itself. The losses from disposal of securities and/or derivative financial instruments can be carried forward for 5 consecutive years and only be used to reduce the taxable income earned from the transactions of the same nature. From 1 January 2014 current year taxable profit could be decreased by previous year tax losses only up to 70%.

2 Basis of preparation and accounting policies (cont'd)

2.18 Current and deferred income tax

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

2.19. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are recognised in equity as a deduction, net of tax, from the proceeds. Where any group company purchases the company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the company's equity holders until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the company's equity holders.

2.20. Employee benefits

Social security contributions

The Company and the Group pay social security contributions to the state Social Security Fund (the Fund) on behalf of its employees based on the defined contribution plan in accordance with the local legal requirements. A defined contribution plan is a plan under which the Group pays fixed contributions into the Fund and will have no legal or constructive obligations to pay further contributions if the Fund does not hold sufficient assets to pay all employees benefits relating to employee service in the current and prior period. Social security contributions are recognised as expenses on an accrual basis and included in payroll expenses.

Bonus plans

The Company and the Group recognises a liability and an expense for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

2.21. Contingencies

Contingent liabilities are not recognised in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is not recognised in the financial statements but disclosed when an inflow or economic benefits is probable.

2.22. Events after the reporting period

Events after the reporting period that provide additional information about the Group's position as at the end of the reporting period (adjusting events) are reflected in the financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes when material.

SEPTEMBER 2014**

(all amounts are in LTL thousand unless otherwise stated)

3 Split-off

On 21 March 2014 the split-off terms of AB Invalda LT (code 121304349) were announced. The Extraordinary General Shareholders Meeting approved the terms of the Company's split-off on 28 April 2014. The Split-off was completed on 29 April 2014. According to the terms, three entities AB INVL Baltic Farmland, AB INVL Baltic Real Estate and AB INVL Technology, comprising 47.95% of AB Invalda LT assets calculated at carrying amounts, were split-off from AB Invalda LT. Following the split-off, 30.90% of the assets, equity and liabilities were transferred to the Company.

The Company's equity was formed in accordance with procedure set forth in the terms of the split-off, whereas assets received and liabilities assumed were estimated at fair values at the date of Split-off. Investments into subsidiaries were estimated according to their equity, which represents the fair value (3 level). The main assets of subsidiaries are investment properties, which are estimated at fair value (Note 6). The carrying amounts of trade receivables, other assets and liabilities are approximated their fair value. Subsidiaries have not any identifiable assets and liabilities, which are not recognised in their balance sheet.

Below the starting statement of financial position of the Group is presented:

	<u>As at 29 April 2014</u>
Intangible assets	808
Property, plant and equipment	29
Investment properties	116,725
Other non-current assets	2,848
Loans granted	13,686
Prepayments	158
Trade and other receivables	1,392
Cash and cash equivalents	392
Total assets	136,038
Share capital	7,044
Share premium	10,240
Reserves	23,765
Retained earnings	8,249
<i>Total equity</i>	<i>49,298</i>
Deferred income tax liability	12,311
Other non-current liabilities	1,524
Current portion of non-current borrowings	56,429
Borrowings	15,825
Trade payables	231
Advances received	150
Other liabilities	270
<i>Total liabilities</i>	<i>86,740</i>
Total equity and liabilities	136,038

During the split-off part of liability rising from credit agreement with Šiaulių bankas was transferred to the Company (LTL 428 thousand). The credit was fully repaid in the beginning of May 2014.

AB INVL BALTIC REAL ESTATE**INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014**

(all amounts are in LTL thousand unless otherwise stated)

4 Seasonality of operations

There is no seasonality of operations in the Group.

5 Rent revenue and lease expenses

The Group has earned rent revenue from owned premises and from leased premises. Subsidiary AB Invaldos nekilnojamojo turto fondas leases premises until August 2017 according to the lease agreement of 10 August 2007. During the reporting period the Group has suffered LTL 2,593 thousand lease expenses from this agreement. Detailisation of rent revenue by ownership of premises is presented below:

	As at 30 September 2014
Rent revenue from owned premises	3,684
Rent revenue from leased premises	2,384
Total rent revenue	6,068

6 Investment properties

Loss from fair value adjustment	-	(10)	-	(10)
Balance as at 30 September 2014	1,975	108,170	6,580	116,725
Unrealised gains and losses for the period included within 'Net gains (losses) from fair value adjustments on investment property' in the income statement	-	(10)	-	(10)

Investment properties of the Group are office buildings, warehouses. The majority of buildings and warehouses are leased under the operating lease agreements and generate rental income

Investment properties are stated at fair value. Leased investment properties and investment properties held for future redevelopment were valued using income approach by accredited valuer UAB OBER-HAUS Nekilnojamosis Turtas as at 26 -29 November 2013. There were no significant changes in the market at the end of 2013 and during the nine months of 2014 that could have an effect on the value of those investment properties, therefore the updated valuation was not performed as at 30 September 2014. Other investment properties are valued by management using sales comparison method.

The fair value represents the price that would be received selling an asset in an orderly transaction between market participants at the measurement date, in compliance with the International Valuation Standards set out by the International Valuation Standards Committee. An investment property's fair value was based either on the market approach by reference to sales in the market of comparable properties or the income approach by reference to rentals obtained from the subject property or similar properties. Market approach refers to the prices of the analogues transactions in the market. These values are adjusted for differences in key attributes such as property size and quality of interior fittings. The most significant input into this valuation approach is price per square metre.

AB INVL BALTIC REAL ESTATE

INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2014

(all amounts are in LTL thousand unless otherwise stated)

6 Investment properties (cont'd)

Income approach is based on the assumption that defined correlation between net activity future income and fair value of the objects exists. For leased investment properties main inputs include:

- Future rental cash inflows based on the actual location, type and quality of the properties and supported by the terms of any - existing lease, other contracts or external evidence such as current market rents for similar properties;
- Discount rates reflecting current market assessments of the uncertainty in the amount and timing of cash flows;
- Estimated vacancy rates based on current and expected future market conditions after expiry of any current lease;
- Maintenance costs including necessary investments to maintain functionality of the property for its expected useful life;
- Capitalisation rates based on actual location, size and quality of the properties and taking into account market data at the valuation date;
- Terminal value taking into account assumptions regarding maintenance costs, vacancy rates and market rents.

Investment properties held for future redevelopment were estimated taking into account the following estimates (in addition to the inputs noted above):

- Costs to complete that are based on the valuers' experience and knowledge of market conditions and term sheets outlined in approved detailed plans. Costs to complete also include a reasonable profit margin;
- Completion dates, as properties under construction require approval or permits from oversight bodies at various points in the development process, including approval or permits in respect of initial design, zoning, commissioning, and compliance with environmental regulations. Based on management's experience with similar developments, all relevant permits and approvals are expected to be obtained. However, the completion date of the development may vary depending on, among other factors, the timeliness of obtaining approvals and any remedial action required by the Group.

There were no changes to the valuation techniques during the period.

Description of valuation techniques used and key inputs to valuation on investment properties:

	Valuation technique	Significant unobservable inputs	Range (weighted average)
Leased investment properties	Discounted cash flows	Discount rate (%)	9 – 11 (9)
		Capitalisation rate for terminal value (%)	7.5 – 10 (7.6)
		Vacancy rate (%)	5 – 10
		Rent price Lt per sq. m. (without VAT)	6 – 42 (27.9)
Investment properties held for future redevelopment	Discounted cash flows with estimated costs to complete	Capitalisation rate for terminal value	15 – 17 (15.7)
		Cost to completion Lt per sq. m (without VAT)	2,100 – 2,200 (2,157)
		Sales price per Lt sq. m. (with VAT)	4,800 – 8,000 (6,633)

The sensitivity analysis of investment properties valued using income approach as at 30 September 2014 is as follows:

Estimates	Increase of estimates		Decrease of estimates	
	Leased Investment properties	Investment properties held for future redevelopment	Leased Investment properties	Investment properties held for future redevelopment
Change in future rental rates by 10 %	10,390	-	(10,390)	-
Change in future sale prices of developed properties by 10%	-	1,750	-	(1,740)
Change in construction costs by 10%	-	(1,510)	-	1,520
Change in expected vacancy rates by 20%	(1,260)	-	1,160	-
Change in discount and capitalization rate by 50 bps	(6,870)	(80)	7,630	220

AB INVL BALTIC REAL ESTATE

**INTERIM CONSOLIDATED CONDENSED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED 30
SEPTEMBER 2014**

(all amounts are in LTL thousand unless otherwise stated)

6 Investment properties (cont'd)

As at 30 September 2014 investment properties with carrying amount of LTL 114,750 thousand were pledged to the banks as collateral for the loans.

There were no restrictions on the realisation of investment properties or the remittance of income and proceeds of disposals during the nine months of 2014. No material contractual obligations to purchase, construct, repair or enhance investment properties existed at the end of the period.

7 Granted loans

As at 30 September 2014 the Group owned 50 % of the claims to Latvian entities SIA Dommo Grupa and SIA Dommo Biznesa Parks according to loans agreements. The above mentioned entities comprise one group and own about 12,800 square meters of warehouse space and over 58 hectares of land around Riga, suitable for the development of logistics hub. These assets are pledged to secure the claims to SIA Dommo Biznesa Parks. Due to economic crisis in 2008 these entities were in the process of bankruptcy. Now is initiated the termination of bankruptcy process. The Group has the right to 50 % of entities' generated cash flows. In the statement of financial position these claims are accounted at fair value, estimated in the business combination – LTL 13,672 thousand. During 3rd Quarter SIA Dommo Grupa has repaid LTL 283 thousand of claims.
