For the purpose of developing and implementing the long-term corporate governance policy the above mentioned shareholders agreed to act in the interests of the Company. In order to implement this, the shareholders agreed in advance coordinate their opinion on the issues considered at the general meeting of shareholders of the Company. The agreement shall not be interpreted to mean an undertaking of the shareholders to vote unanimously on decisions taken at the general meetings of shareholders of the Company. The sole purpose of the agreement is for shareholders to make known their position and find out the position of the other shareholders in advance regarding the agenda items of the general meetings of shareholders of the Company related to the implementation of the long-term corporate governance strategy of the Company and for the aim of achieving the aims mentioned above to coordinate potential decisions in advance.

2. Basis of preparation and accounting policies

Basis of preparation

The interim condensed financial statements for the six months ended 30 June 2020 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim condensed financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at 31 December 2019.

Significant accounting policies

The accounting policies adopted in the preparation of the interim condensed financial statements are consistent with those followed in the preparation of the Group's and the Company's annual financial statements for the year ended 31 December 2019, except adoption of new Standards and Interpretations as of 1 January 2020, noted below.

A number of new or amended standards became applicable for the current reporting period:

- Amendments to the *Conceptual Framework for Financial Reporting* (effective for annual periods beginning on or after 1 January 2020);
- Amendments to IAS 1 and IAS 8: *Definition of materiality* (effective for annual periods beginning on or after 1 January 2020);
- *Amendments to IFRS 9, IAS 39 and IFRS 7: Interest rate benchmark reform* (effective for annual periods beginning on or after 1 January 2020);
- Amendments to IFRS 3 *Business Combination: Definition of a business* (effective for annual periods beginning on or after 1 January 2020);

The amendments to existing standards are not relevant to the Group and the Company.

3. Segment information

The Board of Directors monitors the operating results of the business units of the Group separately for the purpose of making decisions about resource allocations and performance assessment. After becoming investment entity the performance of activities excluding asset management segment is evaluated based on changes in fair value of investments, including dividends and interest income received by the Company. Asset management segment's performance is evaluated based on net profit or loss. Group financing (including finance costs and finance income) and income taxes are allocated between segments as they are identified on basis of separate legal entities. Consolidation adjustments and eliminations are not allocated on a segment basis. Segment assets are measured in a manner consistent with that of the financial statements. All assets are allocated between segments, because segments are identified on a basis of separate legal entities. The granted loans by the Company are allocated to segment's, to which entities they are granted, assets. The impairment losses of these loans are allocated to a segment to which the loan was granted initially.

For management purposes, the Group is organised into following operating segments based on their products and services:

Asset management

The asset management segment includes pension, investment funds, private equity, alternative investments and portfolio management, financial brokerage and land administration services.

Investment activity

The investment activity segment includes the Company investment activities to the unconsolidated subsidiaries, associates and financial assets at fair value, administrative activities of the Companies. The main investment activities of the Company, which is presented to the management separately is disclosed below:

Agriculture

Agricultural activities include the primary crop and livestock (milk) production, feed production and grain processing and agricultural services.

Facility management

The facility management activities includes facility management of dwelling-houses, commercial and public real estate properties and administration of taxes on energy and utilities provided to residents.

Real estate

The real estate activities is investing in investment properties held for future development and in commercial real estate and its rent.

Bank activities

Bank activities represents indirectly investment into MAIB, bank operating in Moldova and investments into AB Šiaulių bankas, bank operating in Lithuania, held by the Company (owned). Because both investments amounts are material and operate in different markets, they are analysed separately.

All other activities

All other activities comprise other investments held by the Company. There is also attributed unconsolidated subsidiary UAB Kelio Ženkilai, that are involved in road signs production, wood manufacturing.

Segment revenue, segment expense and segment result include transfers between business segments. Those transfers are eliminated in column 'Inter-segment transactions and consolidation adjustments'.

6. Financial assets and fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly;

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Unconsolidated subsidiaries and associates are measured at fair value through profit or loss.

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on arm's length basis. The quoted market price used for financial assets held by the Group is the measurement date exchange closing price.

The level 2 instruments are investments to collective investment undertakings and entities, where fair value is measured as fair value of net assets value, which is based only on observable inputs. Therefore, collective investment undertakings and these entities have invested only to securities which are measured as Level 1 instruments, and have only cash, current liabilities, which carrying amount approximate to fair value.

The valuation of Level 3 instruments are performed by the Company's employees, analysts, every quarter. The value are estimated as at the last day of quarter. The management of the Company review the valuations prepared by analysts.

Investment into shares of UAB Litagra (agriculture activity) was valued under the market approach. Relative valuation (market multiples) was done using median EV/EBITDA (capitalization equals EBITDA multiplied by enterprise value and EBITDA multiple minus net debt) and P/BV (capitalization equals Price to book value multiple multiplied by company's book value) multiples. Although farming is considered a relatively stable business, its results for a particular year may vary depending on weather and other one-off conditions. We partially smooth out such volatility by using weighted historical financials for the entity and for its peers. EBITDA is calculated using numbers for the last three years however giving a higher emphasis for the last trailing 12 months result. Additionally, we add a value of land portfolio owned by Litagra group. It was valued by external asset valuers, accounted in the statement of financial position for the reporting period date; therefore, we use it for valuation purpose as well. The value of land portfolio is adjusted by rent costs, which would be payable in case of land sale, in EV/EBITDA multiplier method.

6 Financial assets and fair value hierarchy (cont'd)

Agricultural activities include the primary crop and livestock (milk) production, feed production and grain processing. UAB Litagra is holding company which directly and indirectly owned shares of multiple entities which for valuation are divided into two subgroups. One subgroup comprises the primary crop and livestock (milk) production. This segment is compared to 5 peers from Central Eastern Europe region including 2 entities from Lithuania. Another subgroup comprises feed production and grain processing. During 1st Half Year of 2020 the average market capitalization of the peers declined due to the COVID-19 virus pandemic impact on stock markets, although financial results of UAB Litagra improved. Therefore, the fair value of investments is decreased less than market capitalization of the peers. During 1st Half Year of 2019 higher market multiples for the peers and improved financial results of UAB Litagra itself led to higher valuation. Another reason is increased stake as a buyout of minority shareholder was done by the entity itself with minority discount. During 1st Half Year 2019 the effective ownership held by the Group is increased from 40.98% to 45.53%.

At the end of 2019 the Company was prepared also valuation by using discounted cash flows method to check the valuation of multiplier method. The cash flows were adjusted by rent costs of owned land. The value of land, valued by external asset valuers, was added to the value established by discounted cash flows. The valuation supported determined fair value by multiplier method.

Investment in facility management entities was measured using trailing twelve months EBITDA and applying a multiplier of comparable entity City Service SE, operating in Lithuania and listed on the Warsaw Exchange. It was decided not to use other foreign companies' multipliers, which were higher than the one used in the calculations due to the fact that facility management is local business dependent on varying Lithuanian legal and business environment. Other facility management entities operating in Lithuania are not public companies. At the end of 2019 the Company was prepared also valuation by using discounted cash flows method to check the valuation of multiplier method. The valuation supported determined fair value by multiplier method.

UAB Kelio Ženkliai was measured according to fair value of its assets and liabilities. The main assets - buildings - of UAB Kelio Ženkliai was valued using sales comparison method. On the assessment the value of UAB Kelio Ženkliai reflects its net assets value.

Investments into UAB MD Partners are measured as fair value of net assets value of entity, where main indirectly owned assets – investment into MAIB bank – are measured using price to earnings (P/E) and P/BV multiplier method of comparable banks from the Central and Eastern Europe (9 peers are selected) and applying discount determined in 2019 on the data of transactions similar to MAIB bank acquisition transaction. Discount reflects lack of marketability and country and MAIB risk. The Company indirectly has 7.9% shares of MAIB. On valuation it is taken into consideration cash and liabilities at the level intermediate entities UAB MD Partners and HEIM Partners Limited. Because convertible bonds of UAB MD Partners have the same economic rights to the profit of UAB MD Partners as its shares, shares and convertible bonds are measured as one investment.

Dormant entities are measured according to its equity, because they have only cash and current liabilities.

The Group and the Company have also invested into collective investment undertakings, which main assets are Level 3 financial instruments. These investments are valued at net assets value of collective investment undertakings, which are measured at fair value and communicated to investor by the management entity of collective investment undertakings. Investments of collective investment undertakings are measured EBITDA and Revenue multiplier method or by using discounted cash flows method.

Share based payments reserve

The share-based payment transactions reserve is used to recognise the value of equity-settled share-based payment transactions provided to employees of the Group.

The Company every year offered to employees of the Group the share options transaction. With some key employees of the consolidated subsidiaries is signed formal agreement, which determined principle of bonus remuneration to them. In these agreements, except one, the employee have choice to receive fixed cash or share options. One agreement determined only right to share option. In two consolidated subsidiaries exist bonus plans, where employees could choose share options as alternative to fixed cash after issuing audited financial statements. the choice of employee is irrevocable. In all above mentioned cases, the quantity of share option is calculated as division fixed cash amount to share option value. Latter is calculated as difference between audited consolidated equity per share at year-end or share price at year-end, which is higher, and option exercise price. The main conditions of transactions were:

- The employee has the right to acquire the shares after three years after conclusion of the share options agreements, early exercising is not allowed;
- Option exercise price – EUR 1;
- Some transactions have service vesting condition. The right to acquire share in the part of transactions come into force in future in three years, if the employment contract is not terminated until mentioned dates.
- When the time to exercise is matures the right to acquire the shares will be realized by selling of own shares of the Company or by offering to sign newly issued shares of the Company to employee;
- The options could not be sold.

The value of share-based payments was calculated using the Black-Scholes formula. For volatility input is used historical shares volatility on exchange.

12. Impact of COVID-19

The COVID-19 virus pandemic resulted a decrease in the fair value of the Group's and the Company's financial assets at fair value through profit or loss due to a decrease in the market price of listed companies. This directly contributed to the decline in the value of Level 1 and Level 2 financial assets and indirectly contributed to the decline in the value of Level 3 financial assets due to the decrease of the market value of comparable companies. But operations of the Group and the Company were not significantly affected by the COVID-19 virus pandemic. Due to the quarantine announced in Lithuania, which lasted from 16 March 2020 to 16 June 2020, Group's and the Company's operations were not disrupted, as the Group can perform all the operations remotely. Consolidated and unconsolidated subsidiaries of the Group have received state financial support for staff downtime during the quarantine. The Company did not request or received any financial support due to the COVID-19 virus pandemic. As the Company disclosed in the announcement of 20 March 2020, it is highly probable that the Company will incur losses in 2020 which will be caused by the anticipated decline in the fair value of the Company's financial assets at fair value through profit or loss. This decline may also reduce the Group's income generated from the management fee received for the managed investment products.

12. A description of the principal risks and uncertainties over the next 6 months

The main risks and uncertainties the company faces may be expected in the next 6 months were described in the annual report for 2019. This information didn't change. In addition, the potential impact of the COVID-19 pandemic is disclosed in Article 13 of this report.

13. Disclosure of the impact of the COVID-19

On 20 March 2020, the Company disclosed information on the impact of coronavirus on the operations of Invalda INVL Group. Invalda INVL asset management group is prepared for the downturn caused by the coronavirus (COVID-19) pandemic. Despite the anticipated loss of investments value, Invalda INVL will fulfil all of its obligations and continue to contribute to the recovery of the region, in anticipation of a future cycle of growth, through proactive work and investment activity. COVID-19 is very likely to cause significant damage to the global economy and financial markets, so we predict that 2020 will bring losses for most of our investment products and Invalda INVL itself.
