Management Report

The Management Report has been prepared for the consolidated financial results of J.Molner AS, The J.Molner Company OÜ and The J.Molner Company LLC (hereinafter the "Group") for the first half year of 2023. J.Molner AS was established on 22.09.2022 as a holding company without independent economical activity. The purpose of establishing J.Molner AS was to enable the initial public offering (IPO) and admission to trading on the First North multilateral trading system of the shareholding in The J. Molner Company OÜ. As the corporate form (private limited company) of The J.Molner Company OÜ, does not allow it to make a public offering of the holding and apply for admission to trading, J.Molner AS as a public limited company was founded. J.Molner AS was established with non-monetary contribution the object of which was a 100% holding in The J. Molner Company OÜ, thus J.Molner AS is the parent company of The J. Molner Company OÜ. The J. Molner Company Inc. is a subsidiary of The J. Molner Company OÜ. In the beginning of 2023, the U.S. entity The J. Molner Company LLC was acquired. The main purpose of the U.S. entity is the sale of the Group's products in the U.S. market.

In January 2023, the Group successfully passed its inspection of Eesti Ravimiamet. During the first half of 2023, the Group continued the development of its own generic drugs and the provision of analytical chemistry and method development services to third parties. In terms of analytical and development services, the Group served customers from the United States, Canada and Europe. In June 2023, the Group submitted its first fully owned drug application to the U.S. Food and Drug Administration. In addition, the Group continued to return to the market three U.S. registered drugs owned by the Group since 2022. The first drug is planned to be returned to the market in the second half of 2023, subject to regulatory approval.

For one drug product, the Group received its first ever new market approval from Health Canada in June 2023; the application for approval for the second drug product was submitted in March, 2023. In April 2023, The Group entered into a licensing agreement with a Canadian pharmaceutical distributor to commercialize two injectable drug products in Canada, pending approval from Health Canada. In addition, the Group has entered into a licensing agreement with the same Canadian pharmaceutical distributor to develop two drug products at the Group's laboratory in Tallinn.

Important notes:

- The Group's business is not seasonal.
- The Group's activities are not accompanied by significant environmental and social impacts.
- Interest rates did not change significantly during the financial year and the period of preparation of the annual report.
- As J.Molner AS was founded using the 100% shareholding in The J.Molner Company OÜ as non-monetary contribution the consolidated comparative data is provided for period 01.10.2022-31.12.2022.

As per 30.06.2023 the total consolidated unaudited balance sheet of J.Molner AS was EUR 2,338,793 (as per 31.12.2022, EUR 1,746,410). The total consolidated balance sheet increased by 25% compared to the total consolidated balance sheet at the end of 2022. As per 30.06.2023, consolidated current assets amounted to EUR 933,392 (as per 31.12.2022 EUR 816,776), which is 40% of total assets (as per 31.12.2022 47%). As per 30.06.2023 consolidated fixed assets amounted to EUR 1,405,401 (as per 31.12.2022 EUR 929,634), which is 60% of total assets (as per 31.12.2022 53%). As per 30.06.2023 the consolidated liabilities of J.Molner AS amounted to EUR 1,429,663 (as per 31.12.2022 EUR 1,484,767), which is 61% of the total balance sheet (as per 31.12.2022 85%). As per 30.06.2023 the consolidated equity was EUR 909,130 (as per 31.12.2022 EUR 261,643), which is 39% from total balance sheet (as per 31.12.2022 15%). As per 30.06.2023 it was decided to increase the voluntary reserve at the level of The J.Molner Company OÜ from long-term loan to align equity with the requirements of the Estonian Commercial Code. Previously the reserve amounted to EUR 750,000 and it was increased by EUR 1,065,000.

In January – June 2023 the Group's investments to fixed assets were EUR 455,849, including EUR 426,278 spent on research and development. Depreciation expenses for the first 6 months amounted to EUR 9,458.

In April 2023, J.Molner AS concluded an unsecured loan agreement which extended the existing credit facility of The J. Molner Company OÜ and under which J.Molner AS is entitled to draw down an additional loan with a principal of up to USD 2,000,000. The term of the loan is five years, and the interest is 7% p.a. As per 30.06.2023 the consolidated unaudited loan liabilities were EUR 1,206,153 (as per 31.12.2022 EUR 1,296,357), of which EUR 277,483 is short term liabilities (as per 31.12.2022 EUR 274,178) and EUR 928,670 (as per 31.12.2022 EUR 1,022,179) is long term liabilities. In the first half of 2023 the interest on loans was EUR 56,969. In the period 01.10.2022-31.12.2022 the interest on loans was EUR 26,431 EUR.

As per 30.06.2023 the consolidated unaudited sales revenue was EUR 270,769, in the period 01.10.2022-31.12.2022 the consolidated unaudited sales revenue was EUR 22,987. In January – June 2023 the consolidated unaudited loss was EUR 444,526, in period 01.10.2022-31.12.2022 the consolidated unaudited loss was EUR 318,612.

As per 30.06.2023 The Group had 24 employees, 1 member of the management board and 3 members of the supervisory board. In January – June 2023 the consolidated unaudited labour costs amounted to EUR 517,658, of which EUR 27,014 was the costs of the reserve provided to employees.

Financial Ratios	2023	2022
Current Ratio	1,86	1,77

* In the first half of 2023, the voluntary reserve increased in the amount of EUR 1,065,000 as of 30.06.2023 and the option reserve of 27,014 euros are reflected in changes in other reserves.

Notes

Note 1 Accounting policies

General information

The financial accounts of J.Molner AS for the first half of financial year 2023 have been prepared in accordance with the Estonian financial reporting standard. The Estonian financial reporting standard is established by the Accounting Act of the Republic of Estonia, which is supplemented by the guidelines issued by the Accounting Standards Board.

This is a consolidated unaudited interim report of a small sized business.

The interim accounts have been prepared in Euros.

The principal accounting policies adopted are set out below.

Preparation of consolidated statements

In the consolidated report, all subsidiaries are consolidated line by line. All claims and liabilities within the group, transactions between group companies and unrealized profits and losses resulting from them have been eliminated.

Separate non-consolidated main statements of the consolidating entity (parent company) are published in the appendices to the interim consolidated financial statements. The parent company's basic reports have been prepared using the same accounting principles that have been applied in the preparation of the consolidated interim report, except for investments in subsidiaries and affiliates, which are reflected in the unconsolidated report using the acquisition cost method.

A company over which the parent company has control is considered a subsidiary company. A subsidiary is considered to be under the control of the parent company if the parent company directly or indirectly owns more than 50% of the subsidiary's voting shares or parts or is otherwise able to control the subsidiary's operational and financial policy.

Financial assets

The company has the following financial asset: cash. Financial assets are initially recognized at cost, this being the fair value of the consideration given. The acquisition cost includes all expenditures directly related to the purchase of the financial asset. All regular purchases and sales of financial assets in market value are recognized on the transaction date. Following initial recognition, financial assets are measured based on their type either at fair value, at acquisition cost or at amortized cost.

Financial assets are derecognized when the company loses the right to receive cash flows from the financial asset or it transfers the financial asset, the cash flows from the financial assets and the majority of risks and rewards to other parties.

Cash and cash equivalents

Cash and cash equivalents in the balance sheet and in the cash flow statement include cash in bank accounts (except overdraft).

Foreign currency transactions and assets and liabilities denominated in a foreign currency

The company's functional currency is the Euro, all other currencies are deemed foreign currencies. Transactions denominated in foreign currencies are recorded on the basis of the foreign currency exchange rates of the European Central Bank officially valid on the transaction date.

Monetary assets and liabilities (receivables paid in cash and loans) denominated in foreign currency are translated at balance sheet date into Euros based on the official foreign exchange rates of the European Central Bank. Gains and losses on foreign currency revaluations are recognized in the income statement in the corresponding accounting period. Non-monetary assets and liabilities denominated in foreign currencies, which are not carried at fair value (eg. prepayments, property, plant and equipment and intangible assets), are not revalued at balance sheet date, but instead are recorded with the exchange rate of the European Central Bank that was valid on the transaction date.

Shares of subsidiaries and associates

Shares or parts of subsidiaries and affiliates are recorded at acquisition cost. The acquisition cost is considered to be paid upon acquisition the amount of money or the fair value of the other consideration to be transferred and expenses directly related to the acquisition.

The subsidiary company has not been consolidated, because the consolidated figures, excluding transactions between themselves, are not greater than those of a small indicator of the balance sheet volume and net turnover of the consolidation group, to which 20% is added.

Receivables and prepayments

Accounts receivable are receivables arising from ordinary business transactions of the company. Accounts receivables are recorded using the amortized cost method (i.e., nominal value less impairment loss).

The collectability of the accounts receivable is considered separately by each customer. Accounts receivable, which partly or fully are not expected to be collected, are expensed and reported in the income statement as "Other operating expense". Receivables, collection of which is not feasible nor economically justified, are considered to be non-collectible and written-off from the balance sheet.

Receipt of doubtful receivables previously written down is recognized as a decrease in the expense of doubtful receivables.

Inventories

Inventories are initially recognized at cost which comprises costs of purchase, production costs and other costs incurred in bringing the inventories to their present location and condition.

Inventories are expensed using the FIFO method.

Inventories are measured in the balance sheet at the lower of cost or net realizable value. Net realizable value is the estimated selling price of a product in the ordinary course of business less the estimated costs of completion and those necessary to make the sale.

Plant, property and equipment and intangible assets

Property, plant and equipment are assets used in the company's own business activities with a useful life exceeding one year and the cost of at least 1 350 Euros.

A property, plant and equipment is initially recorded at cost which comprises the purchase price and other costs directly attributable to the acquisition that are necessary for bringing the asset to its operating condition and location. Property, plant and equipment is carried in the balance sheet at acquisition cost, less accumulated depreciation and any accumulated impairment losses.

If the major components of an item of property, plant and equipment have significantly different useful lives, these components shall be recognized initially as separate items of property, plant and equipment and separate depreciation rates shall be assigned to them depending on their useful lives.

An intangible asset is initially recorded at a cost which comprises the purchase price and other costs directly attributable to the acquisition. An intangible asset is carried in the balance sheet at its cost, less accumulated amortization, and any accumulated impairment losses.

Pharmaceutical products in development are recorded as unfinished projects. Once products in development are approved for sale, the amounts will be allocated to product rights and will be amortized. Unfinished projects include also product acquisition costs representing product rights obtained from third parties possessing regulatory approvals in respective markets, however, production of which has not yet started. Product acquisition costs are reclassified as intangible assets in use and will be amortized once products are commercialized.

Minimal acquisition cost 1350

Useful life by assets group (years)

Assets group name	Useful life
Machinery and equipment	5-20
Other property, plant and equipment	2-5
Concessions, patents, licenses, trademarks	10

The company performs an impairment test at each balance sheet date on those assets where there is any indication of potential impairment.

An impairment test is performed to determine the recoverable amount of an asset, which is the higher of the two indicators – fair value of an asset (less costs to sell) and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the use of an asset and from the disposal at the end of its useful life.

When an impairment test is not feasible for an individual asset because the cash flows being generated by the asset are indistinguishable from the cash flows of the rest of the entity, an impairment test shall be performed for the cash-generating unit to which the asset belongs.

Assets are written down to their recoverable amount if the recoverable amount of the asset is lower than its carrying amount. The impairment loss is recognized on an accrual basis as an expense in the income statement under "Depreciation and impairment loss".

Products in development are subject to the annual impairment testing. These valuations reflect, among other things, the impact of changes to the development programs, the projected development and regulatory time frames and the current competitive environment.

Recording of property, plant and equipment and intangible assets is finished in case of disposal of the asset or in case the economic benefits are no longer expected from use or sale of the asset.

The straight-line method is used for depreciating property, plant, and equipment. The depreciation rates are assigned to each item of property, plant and equipment or major component separately, based on the useful life of the specific item. The straight-line method is used for amortizing intangible assets. The amortization rates are assigned to each item of intangible asset, based on the useful life of the specific item.

Leases

Lease transactions, where all material risks and rewards from the ownership of an asset are transferred to the lessee, are treated as finance lease. All other lease transactions are treated as operating leases. Operating lease payments are recorded as expenses based on straight-line method over the entire lease period.

Financial liabilities

Financial liabilities (trade payables, received loans, accrued expenses) are initially measured at cost, which is the fair value of consideration received. The initial cost of financial liabilities includes all direct transaction costs. Subsequently the financial liabilities are recorded at amortized cost.

The amortized cost of short-term liabilities, in general, is equal to their nominal value. Therefore, they are recognized in the amount required to settle the liability. For calculating the amortized cost of long-term financial liabilities, the effective interest rate method is used. A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or expires.

A financial liability is classified as long-term in the balance sheet if it is due more than 12 months after the balance sheet date. All other liabilities are classified as short-term.

Revenue recognition

Revenue from the sale of goods is recognized when all significant risks related to ownership of goods are transferred to the buyer, the sales revenue and transaction costs can be reliably measured and the receipt of payment from the transaction is probable. Revenue from services is recognized in the period the services are rendered, assuming that the receipt of payment from the transaction is probable and the sales revenue and the expenses related to providing the services can be reliably measured.

Taxation

According to the Income Tax Act, Estonian companies are not subject to pay income tax on the profit. Income tax is paid on distribution of dividends, fringe benefits, gifts, donations, receptions costs, expenses not related to business activities and transfer pricing adjustments. The tax rate is 20/80 of the taxable amount.

Related parties

The following are considered as related parties in the preparation of the interim report for J. Molner AS:

- owner;
- members of management board;
- companies under control or significant influence of aforementioned individuals or their close relatives.

Signatures

The board has prepared the unaudited interim report of J Molner AS for the first 6 months of the 2023 financial year and confirms the correctness of the data in the report.

The report completion date is: 15.09.2023.

A handwritten signature in blue ink, appearing to read 'J. Molner', with a large, stylized flourish above it.

Jason Michael Atticus Grenfell-Gardner

Member of the Board
