### Fish and fish products business segment

The turnover of the **fish and fish products business segment** decreased in the 2<sup>nd</sup> quarter of 2013 by 3.2%, i.e. by 0.3 million euro. The quarterly decrease resulted mainly from the decreased volume of sales campaigns during the reporting period, whereas the reason of the decreased volume of the campaigns came from the increased prices of fish. In the summary of 6 months, the turnover of the fish business segment increased by 2%, i.e. by 0.3 million euro, if compared to the results of the previous year. The proportion of the turnover of the fish and fish products business segment in the turnover of 6 months of 2013 of Premia Foods was 37%. The production volume of the fish products decreased in the 2<sup>nd</sup> quarter of 2013 by 14% and by 3% in the summary of 6 months.

In the fish and fish products sector the prices of raw fish in the first half of the year continued to remain at a considerably higher level than during the first half year of 2012. The market price of salmon was higher by 45% and the price of rainbow trout by 25%, if compared to the price level of the previous year<sup>1</sup>, whereas during the same period Premia lost 9 percentage points in gross margin. The main target market of the fish business segment is Finland. Due to the local market practice and peculiarities, significant changes in the prices of raw fish can be transferred into the retail prices within 4-6 months as from notification about price changes. As the prices of raw fish continued to increase also in the 2<sup>nd</sup> quarter of 2013, the positive impact of the price changes will be evident from the results of second half of 2013.

The continuously high price of raw fish had an impact on the EBITDA from operations. The EBITDA from operations of the 2<sup>nd</sup> quarter decreased in the fish business segment by 0.9 million euro and, in the summary of 6 months, by 1.5 million euro, if compared to the results of the previous periods. At the same time, the market price risk is partially mitigated by the fish farms operated by the company, which cover ca 30-40% of the raw material needs of the company. The positive impact of livestock on the EBITDA of the company and on operating profit in the 2<sup>nd</sup> quarter of 2013 was 0.7 million euro and, in the summary of 6 months, 1.1 million euro, if compared to the respective results of the previous year.

<sup>1</sup> The market price of salmon according to Fish Pool ASA and the price of rainbow trout according to the data of Norway's export statistics expressed in euro.

In addition to the above, the profitability of the fish business segment has been adversely affected by the restrictions established by the Swedish Board of Agriculture (Jordbruksverket) in respect of the operations of the fish fingerlings farms applicable since April of 2012. Such restrictions have resulted in the loss of profit from planned sales to third parties. The Swedish Board of Agriculture has admitted “overreacting” in its resolutions and the restrictions have been removed. The company has, after the balance sheet date, submitted a claim for compensation for damages and loss of profit (see Note 12).

The total negative impact of the market price and of the restrictions in Sweden on the operating profit of the fish business segment was, in the summary of 6 months of 2013, 0.3 million euro, if compared to the same period of previous year.

### Ice cream business segment

In the summary of 6 months of 2013, the turnover of the ice cream business segment increased by 1.3 million euro, i.e. 9%, if compared to the same period of 2012. Latvia followed with the increase of 0.4 million euro, i.e. 20%. The turnover of the ice cream business segment in all target markets was increased by successful launch of novelty products, strong marketing and sales campaigns, warm weather conditions in all target markets during the end of May and during June also played their part.

The production volumes in the ice cream business segment increased in the 2<sup>nd</sup> quarter of 2013 by 5.7% and by 0.4% in the summary of 6 months, if compared to the same periods of 2012.

While the value shares stayed stable in Estonian and Lithuanian market during Q2 on yoy basis, the biggest changes took place in Latvia. In Q2, Premia increased its value market share on yoy basis for 4 ppt, i.e. by 35%, having the greatest growth rate on the market. The share of private labels has gone down a bit, but it was more influenced by the delivery problems of the main provider of private labels, rather than changes in consumption habits.

The increase of the EBIT during the 2<sup>nd</sup> quarter was 0.7 million euro and during the 1<sup>st</sup> half of the year 0.8 million euro, if compared to the previous year. The increase was generated in the Baltics and in Russia. The decrease of the gross profit and of the EBITDA from operations resulting from the increased prices of raw fish was partially compensated by a better result of the revaluation of livestock.

The company's financial costs increased by 0.2 million euro during the 2<sup>nd</sup> quarter of 2013 due to adverse effect of the exchange rates of the Russian ruble, if compared to the same period of previous year. By its essence this was unrealised currency exchange loss resulting from revaluation of claims and it did not have a direct impact on the company's cash flow.

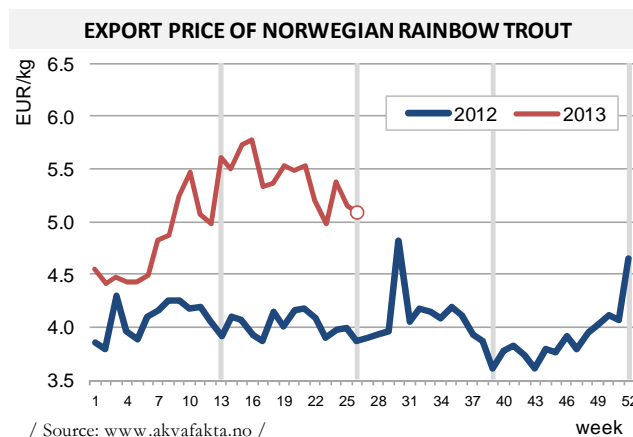

The company's net profit of the 2<sup>nd</sup> quarter of 2013 was 1.0 million euro which is 0.3 million euro, i.e. 38%, higher than during the comparable period. The net loss of the first six months of 2013 was 0.1 million euro, the net loss of the first half of the previous year amounted 0.4 million euro.

As at 30.06.2013, out of Premia's biological assets, 85% is comprised of rainbow trout and 13% is comprised of whitefish grown in the Finnish and Swedish fish farms.

The comparable price of rainbow trout at the end of the 2<sup>nd</sup> quarter was higher by 31%, if compared to the previous year. During the 2<sup>nd</sup> quarter of 2013, the price decreased similarly to the 2<sup>nd</sup> quarter of 2012 by 4%.

The profit arising from the revaluation of livestock during the first six months of 2013 was higher by 1.1 million euro, if compared to the result of the 1<sup>st</sup> half of 2012.

The profit/loss arising from revaluation of livestock has no impact on the cash flow of the company and is not related to everyday business activities.

## FINANCIAL POSITION

**The financial position of the company is continuously solid and the financial risk low.**

The cash flow from operations during the first 6 months of 2013 was 0.8 million euro, remaining at the same level as previous year. The cash flow of the 2<sup>nd</sup> quarter was adversely affected by the need to purchase fish fingerlings from third parties for the company's fish farms for 0.4 million euro, which occurred due to the restrictions on the company's operations imposed by the Swedish Board of Agriculture.

The same assessments of the management that were used to prepare the consolidated annual report for the financial year that ended on 31 December 2012 were used to prepare this condensed consolidated interim report.

### Note 9. Segment Reporting

The Group's segments are determined based on the reports monitored and analysed by the Management Board of the Parent Company. The Management Board of the Parent Company monitors financial performance by business areas and geographic areas. Reports by business areas include information of more significant importance for the management of the Group for monitoring financial performance and allocating resources. Therefore, this division is used to define business segments.

The Group's business segments are the following business areas:

		<b>Secondary segment: Revenue by geographical segments:</b>				
		EUR '000	Q2 2013	Q2 2012	6m 2013	6m 2012
Fish	– fish farming, production and wholesale of fish and fish products;	Finland	7,954	7,859	14,775	14,571
Ice cream	– production and wholesale of ice cream;	Estonia	7,877	7,482	13,198	12,391
Frozen goods	– wholesale of frozen goods products;	Latvia	4,279	3,695	7,139	6,095
Other segments	– other activities include the provision of logistics services, sale of other services, goods and materials. Other areas of activity are insignificant for the Group and none of them makes up a separate business segment.	Lithuania	4,017	3,573	5,831	5,178
		Russia	3,469	3,325	4,913	4,805
		Other	180	151	196	157
		<b>Total</b>	<b>27,776</b>	<b>26,085</b>	<b>46,053</b>	<b>43,197</b>

A relatively high integration level exists between reporting segments of ice cream and frozen goods products, which involves joint marketing, sales and marketing services.

The Management Board of the Parent Company assesses the results of business segments on the basis of external revenue and operating profit figures. The management also monitors secondary measures – EBITDA (profit before financial, tax expenses and depreciation, amortisation and impairment of non-current assets) and EBITDA from operations (EBITDA before fair value adjustments on biological assets and one-off expenses). These financial indicators are presented in the tables below.

Income and expenses of business segments include income and expenses directly generated by the segment. The integrated expenses (marketing and sales expenses, general and administrative expenses and other operating income and expenses) are allocated between the segments of ice cream and frozen goods according to the percentages of unconsolidated revenues of the respective segments. The expenses of the Parent Company (general management expenses of the Group) and amortisation of intangible non-current assets are not allocated to segments.

According to assessments of the management, the transactions between the group's business segments have been carried out at market prices and conditions.

### Compensation Claim against Swedish Board of Agriculture

On 31 July 2013, Överumans Fisk AB, the fully owned subsidiary of AS Premia Foods, filed a claim of compensation of damage and loss of profit against the Swedish Board of Agriculture (Jordbruksverket) in connection with the on-going administrative proceedings initiated against Överumans Fisk AB in May 2012 resulting in the destruction of 17 tons of fish fingerlings. The total amount of damage and loss of profit claimed to be compensated is up to approximately SEK 25,486,867.70 (approximately 3 million euro). The ground for claiming the compensation is the fact that the measures applied in respect of the fish farms operated by Överumans Fisk AB have been more severe if compared to the other fish farms in the same region and therefore disproportional. Due to the extraordinary nature of these proceedings, it is difficult to estimate the final result of the compensation claim and the exact time of adopting relevant decision of the Swedish Board of Agriculture. Aforementioned claim has not been recorded in the company's balance sheet as of 30 June 2013.
