7. The objective review of the Company's state, activity performance and development; the description of the main risk types and uncertainties encountered by the enterprise

Pieno Žvaigždės, AB was established on 23 December 1998 after merger of independent milk processing companies operating in Lithuania: AB Mažeikių Pieninė and AB Pasvalio Sūrinė. Later, AB Kauno Pienas and in 2004 AB Panevėžio Pienas were also merged into Pieno Žvaigždės, AB. The current structure of the Company enables to specialize production in separate branches and reach the highest efficiency as well as even distribution of raw milk collection capacities in the country.

Pieno Žvaigždės, AB is one of the largest milk processing companies in Lithuania, which currently produces more than 500 different products. The Company operates not only in the local market but also exports production to the countries of the European Union, CIS, and Asia. Different types of ferment cheese, whey flour and fresh milk products produced by Pieno Žvaigždės, AB are the main products produced for export which are well known for their irreproachable quality. The products are awarded with quality certificates.

The main activity of the Issuer is processing of milk. The mentioned business is risky due to eventual changes in product and raw materials markets, competition as well as eventual legal, political, technological and social changes, which are directly or indirectly related to the Issuer's business and may have a negative influence on the Issuer's cash flows and operating results.

The main raw material used by the Issuer is milk, the supply of which, due to short validity period, is conditionally limited. Limitations put on supply of raw milk may result in lack of raw milk and an increase in prices for raw milk. These changes may have a negative influence on the cash flows and operating results of the Issuer.

The Issuer's business (especially collection and transportation of milk) is a labor consuming activity. The lack of human resources and an increase in salary costs may negatively affect the operating results of the Issuer.

Information on financial risks is presented in the annual financial statements (note 22 of the explanatory information).

Pieno Žvaigždės, AB has integrated the quality and environment management system as to the requirements of ISO 9001:2008 and ISO 14001:2004. As of March 2012 the Company is implementing the food safety management system as to ISO 22000:2005, which will be integrated into the existing management system. In December 2013, the affiliate Pasvalio Sūrinė received the certificate confirming the implementation of food safety management system complying with requirement of FSSC 22000. Other three affiliates of Pieno Žvaigždės, AB have finalized the implementation of the food management system and received certificate according to the requirements of FSSC 22000 at the beginning of the year 2015. Assurance of the quality of dairy products, especially of their safety, i.e. harmlessness to consumers, is one of the major tasks of the Company. The functioning food safety system allows to monitor risk factors and important control points that are related to milk production processes, transportation, and consumption and improves the quality control. The Company has prepared, implemented and operate the programs which provide for conditions, measures and behavior rules to prevent biological, chemical, allergic and physical contamination and ensure high quality and safety of the dairy products.

During the years 1998–2002 the State Food and Veterinarian Office assigned the affiliates of Pieno Žvaigždės, AB with certificates for export to EU, which allow exporting dairy products bearing identification marks to the EU countries. Furthermore, all the branches of the Company are approved for export to Russia and Belarus.

Primary certification of the quality management system in the Company's affiliates was performed in 2002. The granted certificates proved that the establishment, documentation and maintenance of the quality management system complied with the ISO 9001 standard. The certification audit in the affiliates and issuance of the certificates was performed by an international certification firm TUV CERT. During 2005-2006, the environment management system complying with the requirements of ISO 14001 standards was integrated into the quality management system, and in February 2007 Pieno Žvaigždės, AB received the certificate confirming the integrated quality and environment management system complying with the requirements of ISO 9001 and ISO 14001 standards operates in the Company. Every year, the certifying firm performs supervision audits of the Company, and every 3 years the recertification takes place. Pieno Žvaigždės, AB aims to continuous improvement and better efficiency of its operations and processes, thus, for the purpose of more efficient use of external audit results for company improvement, in 2013, Pieno Žvaigždės, AB changed the certification firm. As of 2013, external audit of management systems is performed by certifying firm DNV.

In order to further improve the quality control, in September 2016, the branch Pasvalio Sūrinė and in September 2017, the branch Mažeikių Pieninė were certified as to the IFS Food Standard requirements. This International Food Standard (IFS) was introduced by the retail trade association IFS Food of Germany, France and Italy to meet the requirements of private retailers in Germany, France, Italy, the Benelux and other

countries. A company that complies with the IFS requirements ensures that it can manage the risks throughout all the stages of food production process, can produce a safe and high-quality product. The greatest attention is paid to the products that must meet the expectations of the ultimate customer and, most importantly, the consumer.

Meanwhile, in April 2017, the branch Kauno Pienas was granted a BRC certificate (Global Standard for Food Safety). In 1998, the British Retail Consortium (BRC) established and implemented the BRC food technical standard, which is used for evaluation of foodstuff manufacturers. The purpose of the standard is to assist the food processing companies in the production and supply of safe and high quality foodstuff. This ensures consumer confidence in the company's food safety. Due to clarity and versatility of the BRC standard requirements and control, they are acknowledged globally.

The Company's affiliates Kauno Pienas and Panevėžio Pienas are certified for production of ecological products (ecological yogurts, ecological sour cream, ecological curd and cottage cheese). After each annual review, a public company Ekoagros issues a new certificate on the Company's compliance with the requirements. Production of ecological dairy products requires adhering to strict requirements set not only for production processes but also for their compound parts. The certified ecological products are marked with the following additional information: certification mark of ecological products, code of the certifying firm, and reference to the growth place of agricultural goods used for production.

Certain products of the Company are assigned with specific quality certificates HALAL (whey powder and cream) and KOSHER (whey powder).

The Company's management has undertaken to produce safe and high-quality dairy products that satisfy the clients' needs and expectations, with low impact on environment to the maximum extent, all being defined in the Company's policy on the safety and quality of food and environment protection.

8. Analysis of financial and non-financial activity results, information related to environment and personnel issues

Key figures, million EUR	2022 06 30	2021 06 30
Turnover	101,7	86,1
Gross profit	13,7	16,9
Profit before tax, interest and		
depreciation (EBITDA)	2,5	4,4
Profit (loss) before tax	-0,8	1,3
Investment in property, plant and		
equipment	1,6	3,4

Main quality management and environmental principles:

- The quality management system is oriented towards a customer, thus a lot of attention is devoted to fulfilling customers' needs and expectations;
- Principles of cleaner production must be adhered to; the aspects that significantly influence the environment must be identified and managed, and proper preparation for emergency situation must be insured;
- Management of the Company sets united aims and goals. Heads of the Company create environment where all employees take part in order to achieve aims;
- Employees of all levels are involved in Company's work;
- All activities of the Company, as well as the recourses related to them are managed as a process;
- Interconnected processes are defined, understood and managed as a system, and this increases Company's capacity and efficiency;
- Company's target is constant improvement. Improvement activities are integrated with Company's strategy and every worker seeks improvement of a product, process and systems;
- High-scoring solutions are based on data and information analysis;
- A lot of attention is devoted to connections with suppliers.

Possession of the ISO 9001 and ISO 14001 certificates proves that the structure, responsibilities and granted authorities are strictly defined in the Company, that processes and procedures are established, major documents are controlled and constantly updated, inspections and control procedures are regularly performed, discrepancies are identified, analyzed and corrected, the prevention of non-conformities and accidents is ensured, and negative impact on the environment is minimized.

The Company's top management annually reviews and confirms food safety, quality and environmental policies..

9. The number of the own shares acquired and transferred during the reporting period, and the share of the capital, which the mentioned shares constitute

During the first half of 2022, the Company did not acquire nor cancel any own shares.

10. Information about branches and representative offices

Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of inventories is based on the first-in first-out principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of overheads based on normal operating capacity.

Inventories, Thousand EUR	2022 06 30	2021 12 31
