- 5. SBTF UAB (hereinafter SBTF, real estate management activities).

The financial statements of the Group and the Bank have been prepared in accordance with International Financial Reporting Standards as adopted by the EU. The financial statements have been prepared under the historical cost convention as modified for the revaluation of available-for-sale investment securities, financial assets and financial liabilities held for trading and all derivative financial instruments.

The preparation of financial statements in conformity with International Financial Reporting Standards require the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current event and actions, actual results ultimately may differ from those estimates.

These financial statements combine the consolidated financial statements for the Group and stand-alone financial statements of the Bank. Such format of reporting was adopted to ensure consistency of presentation with the format prescribed by the Bank of Lithuania and applied for statutory reporting.

Amounts shown in these financial statements are presented in the local currency, Litas (LTL). Since 2 February 2002 the exchange rate of the litas was pegged to the euro at a rate of LTL 3.4528 = EUR 1.

Financial risk management

The Group analyses, evaluates, accepts and manages the risk or combination of risks it is exposed to. Risk management at the Group aims at ensuring a sufficient return on equity following the conservative risk management policy. While implementing an advanced risk management policy the Group focuses not only on minimising potential risk but also on improving pricing and achieving efficient capital allocation.

The Risk Management Policy approved by the Bank Board as well as by the procedures to manage different types of risks prepared on its basis ensures the integrity of the risk management process in the Group.

The most important types of risk the Group is exposed to are credit risk, market risk, liquidity risk and operational risk. Concentration risk is treated as part of credit risk. Market risk includes currency risk, interest rate and equity price risk. Other types of risk are considered immaterial by the Group and, therefore, are not assessed.

In order to avoid a conflict of interest the Bank's subdivisions that implement risk management functions are separated from those subdivisions the direct activities of which are connected with the up rise of various types of banking risks.

Loans and advances neither past due not impaired are loans which are not impaired and payments of which are not past due.

Past due but not impaired loans are loans for which principal or interest is past due but no allowance for impairment is recognized.

Impaired loan - is a loan to which a loss event is recognized and allowance for impairment is made

The list of loss events:

- 1) significant financial difficulties of the debtor or issuer, i.e. the borrower's financial status is evaluated as poor or bad;
- 2) violation of the loan agreement (non-payment of the periodic loan payments (the part of the loan or interest)) for more than 30 days;
- 3) the loan is being recovered;
- 4) funds granted to the borrower are used not according to the loan purpose and the implementation terms of investment project are violated or decrease in collateral value, when repayment terms of the evaluated loans directly depend on the value of the object of security measure;
- 5) third parties related to the borrower do not fulfil their obligations, which impacts the borrower's ability to fulfil its financial obligations;
- 6) other loss events (termination or cancellation of the licence validity of the borrower or issuer engaged in licensed activity; the death of the borrower or issuer).

Share premium

The share premium represents the difference between the issue price and nominal value of the shares issued by the Bank. Share premium can be used to increase the Bank's authorised share capital.

Reserve capital

The reserve capital is formed from the Bank's profit and its purpose is to ensure the financial stability of the Bank. The shareholders may decide to use the reserve capital to cover losses incurred.

Statutory reserve

According to the Law of the Republic of Lithuania on Banks, allocations to the statutory reserve shall be compulsory and may not be less than 1/20 of the profit available for appropriation. The statutory reserve may, by a decision of the annual or extraordinary general meeting of the shareholders, be used only to cover losses of the activities.

Dividends

In 2009, 2010 the annual general meeting of shareholders decided to not to pay dividends.

General reserve to cover possible losses in assets

This reserve is formed from the Bank's profit or additional contributions of shareholders. The purpose of reserve is to cover losses incurred because of the risk related to the major activity of the Bank.

Earnings per share

Basic earnings per share is calculated by dividing the net profit for the period by the weighted average number of ordinary shares in issue during the period. The Group and the Bank have no dilutive potential ordinary shares and therefore diluted earnings per share are the same as basic earnings per share.

NOTE 18 CAPITAL MANAGEMENT

The capital of the Group is calculated and allocated for the risk coverage following the General Regulations for the Calculation of Capital Adequacy approved by the Bank of Lithuania Board. The Group's objectives when managing capital are as follows:

- 1) to comply with the capital requirements set by the Bank of Lithuania as well as the higher target capital requirements set by the major shareholder,
- 2) to safeguard the Bank's and the Group's ability to continue as a going concern so that it can provide returns for shareholders and benefits for other stakeholders,
- 3) to support the development of the Group's business with the help of the strong capital base.

Capital adequacy and the use of the regulatory capital are monitored on a daily basis and information regarding capital adequacy is submitted to the supervising authority quarterly in accordance with the Bank of Lithuania requirements.

(all amounts are in LTL thousand, unless otherwise stated)

The Bank of Lithuania has set the following minimum capital requirements:

- 1) minimum level of capital held must be no less than 5 mill EUR,
- 2) minimum capital adequacy ratio, calculated as the regulatory capital to the risk-weighted assets, must be no less than 8%.

Additional capital need for credit, operational, market and liquidity risk is subject to the regular stress-testing and Internal Capital Adequacy Assessment processing.

The Group's regulatory capital is divided into two tiers:

- 1) tier 1 capital consists of the share capital, share premium, reserve capital, retained earnings of the previous financial year and less the intangible assets,
- 2) tier 2 capital consists of the revaluation reserves of the fixed and financial assets, other reserves.

The regulatory capital is calculated as the sum of the previously mentioned tier 1 and tier 2 capital less the investments in other credit or financial institution.

The risk-weighted assets are measured by means of nine risk weights classified according to the nature of each assets and counterpart, taking into account collaterals and guarantees eligible for risk mitigation. A similar treatment with some adjustments is adopted for the off-balance sheet exposures. Capital requirements for operational risk are calculated using the Basic Indicator Approach.

The table below summarizes the composition of regulatory capital and the ratios of the Bank and Group as of June 30st 2010 and of December 31st 2009. During those two years, the Group complied with capital requirements to which it is subject.

NOTE 19 LIQUIDITY

Liquidity risk means the risk that the Bank is unable to meet its financial obligations in time or that it will not manage to receive financial resources during a short time by borrowing or selling the assets.

The liquidity risk management

The liquidity risk management depends on the Bank's ability to cover the cash shortage by borrowing from the market; and the liquidity of the market itself. While managing the liquidity risk the relatively small size of the Bank has both positive and negative features. On the one part, in case of liquidity problems, the demand for total funds is rather small in terms of banking system, therefore, they are solved easily. On the other part, in case of liquidity problems the Bank's ability to borrow from the market may decrease significantly. Due to that fact the Bank possesses a significant Debt Securities Portfolio, which is of high liquidity. Liquidity risk management is regulated by the Procedures for Liquidity Risk Management approved by the Bank's Board where strategic and current liquidity risk management limits to their change are defined in the above-mentioned procedures. Decisions regarding liquidity management issues are made by the Bank's Risk Management Committee with reference to the information submitted by the Bank's Planning and Financial Risks Department or by the Bank's Board with reference to the information submitted by the Risk measures are distinguished. Strategic (up to 3 months) liquidity risk is evaluated by analyzing the dynamics of various liquidity ratios. A list of these ratios as well as recommended Management Committee. Current liquidity (up to 10 days) risk management is based on current cash flow analysis and projections. The Treasury Department is responsible for this. As of June 30st 2010 the above Group's ratio was 38,92 per cent (31-12-2009 -34,61 per cent), and the Bank's - 39,62 per cent (31-12-2009 - 38,23 per cent.).

The tables below disclose the assets and liabilities as of June 30 st 2010 according to their remaining maturity defined in the agreements. However, the real maturity of the particular types of assets and liabilities may be longer as, for example a portion of loans and deposits is extended and thus the real repayment terms of short-term loans and demand deposits move forward

NOTE 20 MARKET RISK

The Group takes on exposure to market risk, which means the risk for the Bank to incur losses due to the adverse fluctuations in the market parameters such as currency exchange rates (foreign currency risk), interest rates (interest rate risk) or equities prices (equity risk). The most significant market risk for a Group is interest rate risk while other market risks are of lower significance.

Foreign exchange risk

The foreign exchange risk management is regulated by the Procedures for Foreign Exchange Risk Management. They include the list of types of sale and purchase transactions executed by the Group. Also they establish principles which help the Group to minimize the exposure to foreign exchange risk. The Group does not implement any operations which could cause open currency positions expecting to earn due to the currency rate shift. The Bank's Board approves and reviews on a regular basis the maximum limits for open currency positions for the Bank's branches, subsidiaries and the Bank itself. The established limits are lower than those allowed by the Bank of Lithuania. The Bank's Treasury Department is responsible for the Group's compliance with the Procedures for Foreign Exchange Risk Management.

The Group and the Bank monitors the foreign currency risk by calculating open currency position. Open currency position (OCP) is equal to assets in the balance sheet and off-balance sheet less balance sheet and off-balance sheet liabilities in a single currency. There are two types of OCP, i.e. long and short. The Bank also calculates Total open position (TOP), which is the higher of the separately added short and long positions. As of June 30 st 2010 the TOP to capital ratio was: Group's -0.68% (31-12-2009: 0,31%), Bank's -0.68% (31-12-2009: 0,31%).

Sensitivity of foreign exchange risk

Foreign exchange (FX) risk is limited by amounts of open FX positions. For calculation of sensitivity to FX risk all exposures shall be converted into possible loss, i.e. open FX position is multiplied by possible FX rate change. The FX risk parameters for the Group (Bank) have been established in view of the impact of economic slowdown and financial crisis on exchange rates in 2009 and forecasts that currency weakening tendencies will remain in 2010.

| Currency | Annual reasonable shift 2011 | Annual reasonable shift 2010 |

| | | |

The following table presents Group (Bank) sensitivities of profit and loss and equity to reasonably possible changes in exchange rates applied at the balance sheet date, with all other variables held constant:

| | 30-06-2010 | 31-12-2009 |
|------------------|------------------------------|------------------------------|
| | Impact on profit or loss, on | Impact on profit or loss, on |

The presumable FX rate change creates acceptable impact on the Bank's profit and makes LTL 98 thousand in 2010 (2009: LTL 91 thousand) and the Group's annual profit and makes LTL 98 thousand in 2010 (2009: LTL 105 thousand) higher/lower impact on profit.

Interest rate risk

An interest rate risk is a risk to incur losses because of the mismatch of re-evaluation possibility between the Bank's assets and liabilities. The risk management is regulated by the Procedures for Interest Rate Risk Management which establish methods of risk measurement and set up measures for risk management. These procedures define that:

> the Bank observes the principle to avoid the speculation with future interest rates;

>the risk size is evaluated applying a pattern of interest rate gap (GAP);

>planning and Financial Risk Department provides the information on regular basis to Risk Management Committee about compliance with relative gap limits and submits proposals to the Bank's Board regarding the establishment of interest rates for credits and deposits.

Sensitivity of interest rate risk

Assessing the sensitivity of the Group's profit towards the change of interest rates, it has been assumed that interest is to change by 1 percentage point.

Operational risk

The aim of the Bank's operational risk management is to clearly define the operational risk, reduce the operational risk at the Bank to an acceptable level and use the results of the operational risk analysis as the base for the implementation of the risk mitigation processes and its assessment, i.e. to refuse the inefficient measures, implement new ones and maintain the existing means of operational risk management.

The operational risk management system at the Bank includes all the significant fields of the banking activities: operations with cash, investing services (deposits, investment and pension funds), payments and settlements, electronic banking (SB Line, SMS Bank, payment cards), lending (credits, factoring, guarantees and documentary settlements), finance lease, foreign exchange trading, etc.

The Bank also defines the reputation risk as a subcategory of the operational risk.

The reputation risk means an existing or anticipated risk that might have a negative effect on the Bank's revenue and/or capital as a result of adverse opinion about the Bank's reputation which is formed by the clients, counterparties, shareholders and investors. This risk is controlled by adherence to the principle of prudence.

Taking into consideration the nature and scope of the banking activities, the following operational risk sources may be distinguished: information systems (breakdowns of computer hardware and software and telecommunications systems, etc.); human impact (illegal actions of bank employees, illegal actions of external parties, working conditions, errors); and loss of tangible assets (natural disaster, fire, terrorist attacks, etc.).

The operational risk management and control system focuses on the identification of the most problematic places at the Bank in terms of the operational risk. The good functioning within the Bank's internal control system is the main factor mitigating the operational risk at the Bank. The internal control system within the bank is an integral part of the banking day-to-day activities that motivates bank's employees to make the bank's activities more effective; to protect the bank from possible operational risk losses; to ensure that financial and other types of information used for internal, control purposes or by third parties is reliable, precise and presented on a timely basis; to ensure that the bank's activities comply with laws, legal acts of the Bank of Lithuania and other legal acts, the bank's strategy and internal policies.

Since 2005 the Bank has created the registration system to follow the operational risk events. The registration of the operational risk events is a foundation used for disclosing the major sources of the operational risks with the Bank and enables determining operational risk mitigation (preventive) measures.

In order to safeguard that the Bank continues as a going concern the Business Continuity Plan and Procedure for the Provision of Banking Products in the Event of Breakdown of the Bank's Information Systems have been approved. These measures establish procedures and actions to be taken in the event of unforeseen circumstances and emergencies in order to make sure that operational risk is mitigated and avoided and the loss of assets is prevented in case day-to-day activities of the Bank are disrupted.

The Bank's operational risk management system is complimented by the Bank's Business Continuity Management Plan and the Information Security and Emergency Management System created and installed by the IT agency "Blue Bridge".

Taking into consideration the scope of its activities and opportunity to use the historic data related to the operational risk, the Bank has decided to use a basic indicator method established in the Rules on Capital Adequacy Requirements to assess the operational risk.

Stress tests

Besides the regular assessment of the risks and the capital requirement calculation the Group also performs stress tests for the credit, liquidity, market (interest rate and currency), and operational risks. During this process it is determined if the Bank's capital is sufficient to cover the possible losses which may occur because of the financial status impairment. The stress testing is performed once a year in accordance with the requirements set by the Bank of Lithuania.

There are no restrictions to securities transfer. The shareholders are entitled to property and nonproperty rights and have their duties foreseen by the Law on Public Limited Liability Companies of the Republic of Lithuania.

Shareholders, having special control rights and description of these rights. The shareholders control the Bank through the elected Supervisory Council. Its functions are defined by the Law on Public Limited Liability Companies of the Republic of Lithuania.

Restrictions to voting rights. All the bank's shares granting a voting right are of the equal par value and each share gives one vote in the General Shareholders' Meeting.

A shareholder has no right to vote in making decisions regarding the pre-emptive right to acquire the shares issued by the Bank or regarding the recall of the converted bonds, in case the agenda of the General Shareholders' Meeting foresees that such a right to acquire these securities is to be granted to him, his close relative, shareholder's spouse or to cohabitant, when the partnership is registered under the applicable law, and to the spouse's close relative, in case the shareholder is a natural entity, as well as to the shareholder's parent company or shareholder's subsidiary, in case the shareholder is a legal entity.

An entity wishing to acquire $^{1}/_{10}$ of the Bank's authorized capital and (or) such a share of the voting rights or to increase it to the extent when the share of the possessed authorized capital and (or) of voting rights would comprise $^{1}/_{5}$, $^{1}/_{3}$, $^{1}/_{2}$ or to the extent the Bank would become controlled by him, should receive the consent from the Bank of Lithuania in advance. In case the entity acquires $^{1}/_{10}$ of the Bank's authorized capital and (or) such a share of the voting rights without a supervisory consent from the Bank of Lithuania when such a consent is necessary or when the supervisory institution comes to the resolution to cancel the right to use voting rights, then all the possessed share of the authorized capital and (or) such a share of the voting rights loose the voting right in the General Shareholders' Meeting.

11. Information on the execution of all the prudential requirements limiting the activity risks of the Bank

During the accounting period Šiaulių bankas operated in compliance with all the prudential requirements limiting the activity risks of the Bank set by the Bank of Lithuania.

12. Risk management

The Group of Šiaulių bankas analyses, evaluates, accepts and manages risks it is exposed to. Risk management at the Group aims at ensuring a sufficient return on equity following the conservative risk management policy. While implementing an advanced risk management policy the Group of Šiaulių bankas focuses not only on minimising potential risk but also on improving pricing and achieving efficient capital allocation.

The Risk Management Policy approved by the Bank Board as well as by the procedures to manage different types of risks prepared on its basis ensures the efficiency of the risk management process in the Group. The goal of the risk management policy is to identify the risks as well as their management principles in the Group's activities. Due to the fact that various risks experienced by the Group are interdependent; their management is centralized. Arrangement and coordination of the experienced risk management system is one of the main goals of the Bank's Risk Management Committee.

The most important types of risk the Group is exposed to are credit risk, market risk, liquidity risk, concentration risk and operational risk. Market risk includes currency risk, interest rate and equity securities (share) price risk. Other types of risks are considered immaterial by the Group and, therefore, are not assessed.

In order to avoid a conflict of interest the Bank's subdivisions that implement risk management functions are separated from those subdivisions the direct activities of which are connected with the uprise of various types of banking risks.

13. Ratings provided by the international rating agencies and their amendments

On 26 June 2009 the international rating agency "Moody's Investors Service" set the reviewed ratings of Šiaulių bankas AB:

- long-term deposit rating Ba3;
- financial strength rating D-;
- short-term deposit rating NP;
- long-term rating outlook negative.

The rating agency reasoned the changes in the ratings and their negative outlooks by the impact of the recession on the Bank's yield and assets quality.

14. Information about the activity results

The Bank, improving the quality of the existing loan portfolio, within the first quarter of 2010 formed LTL 8.96 million special provisions, which influenced the loss amounting to LTL 6.9 million over the first quarter. During the second quarter special provisions in the amount of LTL 9.7 million were formed; during

January – June they totaled LTL 18.6 million (or by 36 per cent more than during the relevant period of last year). Thus, the Bank incurred loss in the amount of LTL 11.1 million within the first half-year of this year.

During the first quarter profit of the activity result of the Bank (without evaluation of special provisions and income fee) was LTL 0.757 million. The Bank incurred LTL 458 thousand in loss from the activity in January, while it earned a profit in the amount of LTL 149 thousand in February and made a profit of LTL 1.066 million in March. Within the second quarter of this year the Bank earned LTL 4.5 million operating profit before tax, dividend and provisions or by 2.2 times more comparing to the relevant quarter of the previous year. The operating profit for the first half-year of 2010 grew by 7 per cent and comprised LTL 5.3 million comparing to the first half-year of 2009.

Operating results of the Bank's Group for the first half-year before income fee, dividend and provisions totaled LTL 5.0 million or by 37 per cent less comparing to the relevant period of 2009 when the Group earned LTL 7.9 million. In 2010 special provisions of LTL 20.1 million were formed and they influenced the final loss in the amount of LTL 13 million.

Bank's net interest income during the first quarter comparing to the last quarter of 2009 decreased by LTL 1.4 million (23.3 per cent). Within the second quarter the Bank received LTL 11.2 million operating profit, i.e. by 37 per cent more than within the first quarter. It was determined by the increased net interest income, which in its turn was influenced by resources more frequently becoming cheaper than interest-earning assets.

The biggest part of the Bank's liabilities comprised deposits. Within the first half-year of 2010 the clients' deposits sum placed in the Bank amounted nearly to LTL 1 594 million; comparing to the first half-year of 2009 deposits increased by one tenth.

The assets of Šiaulių bankas at the end of the first half-year of 2010 comprised LTL 2 159,5 million; comparing to the first half-year of 2009 the assets increased by 4.3 per cent, i.e. by more than LTL 90 million. The biggest share of assets was loans extended to clients – during the accounting period the loans in the asset structure comprised more than 73 per cent.

Higher interest earning assets of the Bank was increasing more significantly in April-June. Debt securities portfolio increased by 14.1 per cent (LTL 43.8 million) within a second quarter, the growth totaled 65.3 per cent (LTL 140 million) within six months. Loan balances (without evaluation of special provisions, tax and accrued interest) grew by LTL 22 million within a quarter. This growth slightly exceeded a decrease of loan portfolio that was recorded in the first quarter. Šiaulių bankas became one of the few banks operating in Lithuania, which loan portfolio was increasing in 2010 – at the end of the accounting period credit portfolio of Šiaulių bankas comprised more than LTL 1 597 million.

On 22 June 2010 the amended Charter of Šiaulių bankas AB with an increased authorized capital up to LTL 204.9 million (EUR 59.3 million) was registered in the Register of Legal Entities of the Republic of Lithuania. The increased capital base of the Bank not only will improve the indexes assessing operational risk but also will allow increasing crediting volume as well as expanding scope of services provided by the Bank.

15. Activity plans, expansion and prognosis

The activity of Šiaulių bankas is directed at promotion of economic activity and financing of SME's. Collaborating with international institutions and financial partners the Bank will be searching for new crediting opportunities as well as seeking to contribute to the solution of problems that arose due to the economy recession and to the improvement of business conditions. The fact that the Bank actively participates in the credit market, contributes to the new business fostering models and pays a big attention to public, cultural and social projects, this leads to favorable conditions for the implementation of the Bank's strategy – to grow organic as well as develop activity in Lithuania.

16. The most important events during the accounting period

In 2010 the European Investment Fund (EIF) and Šiaulių bankas AB signed an agreement and started the implementation of a newly created modern financial engineering instrument under the JEREMIE initiative. This instrument aims at granting risk sharing loans and improving the conditions for enterprises to receive funds from the external sources of financing, i.e. to use EU structural support for 2007-2013. Implementing the financial instrument intended for granting risk sharing loans to micro, small and medium-sized enterprises, equal shares of funds of Holding Fund and the Bank's capital are used. Pursuant to this

agreement concluded between the Bank and EIF over LTL 138 million (EUR 40 million) is allocated for crediting SME in Lithuania.

On 23 March 2010 Šiaulių bankas AB acquired 100 per cent of shares and voting rights of SBTF UAB and Minera UAB. Purchased companies belonged to the Bank's subsidiaries up to the present; they will be engaged in real estate management.

At the end of May Šiaulių bankas and the European Investment Bank (EIB) signed an agreement regarding the financing programme of renovation of multi-apartment buildings. Šiaulių bankas became the first financial partner of the European Investment Bank in Lithuania using JESSICA financial instrument. Pursuant to the terms of the agreement for renovation of multi-apartment buildings Šiaulių bankas will provide the loans for a total amount of EUR 6 million (over LTL 20 million).

Šiaulių bankas together with Šiauliai City Municipality, Šiauliai Industrialists' Association, and Šiauliai Chamber of Commerce, Industry and Crafts awarded to the authors of the best projects of the contest "For the best project to Šiauliai city and business" with two incentive premiums.
