As at the end of period (30th August 2015), AB Rokiskio suris has in treasure 802,094 ordinary registered shares and it makes 2.24% of the company's authorized capital.

Treasury shares have no voting right.

11. Operations of the issuer

AB Rokiskio suris is one of the largest and strongest dairy production companies in Lithuania. The sales of commodities are widely spread in Western export markets, EU and USA, as well as sales of short shelf life dairy products on the local market and in neighborhood countries.

As a result of Russian embargo and loss of sales in that country, the Company increased its sales to the USA. Also, it strengthened search for new markets in the Central Asia, Middle East and Far East.

The Group's production is developed in the towns of Rokiskis (AB Rokiskio suris), Utena (UAB Rokiskio pieno gamyba) and Ukmerge (UAB Rokiskio pieno gamyba subsidiary Ukmerges pienine).

- Specialization of Rokiskis production plant – production and sales of fermented cheese and whey products.
- Specialization of UAB Rokiskio pieno gamyba (Utena production plant) – fresh dairy products for the local market, whey protein concentrate, milk powder and butter production.

- Specialization of UAB Rokiskio pieno gamyba (Ukmerge production plant) – curd and curd cheese production.
- Specialization of UAB Rokiskio pienas – sales of the Group’s products in Lithuania, Latvia and Estonia.

The cheese produced by the company AB Rokiskio suris comprises of fresh, semi-hard and hard cheese. The group of fresh cheese includes Cagliata (various fat content and weight), Mozzarella. The group of semi-hard cheese includes the following products: Rokiskio suris (various fat content and weight), Saules suris, Lietuviskas, Gouda, Suris „Visiems“, “Naminis”, „Zaloji karvute“ etc., whereas Kietasis suris (various fat, moisture content and weight), “Montecampo“ and “Gojus“ belong to the hard cheese type. The production of long term maturing hard cheese ROKISKIO GRAND is further developed, it is packed in various weight packaging.

In 2015 compared to 2014, substantial changes were made in the production of fermented cheese due to the redirection to other world markets.

The production of semi hard cheese was substantially reduced in order to increase production of higher level of dry matter hard cheese for the sales to the US market. The production of semi hard cheese decreased by 39 per cent.

Comparing the volumes of fermented cheese according to groups, the production of fresh cheese increased most significant, i.e. by 18 per cent. Also, the sales grew accordingly.

In 9 months 2015, the production of fermented cheese was higher by 3.8 per cent compared to the same period 2014.

Besides the main production of fermented cheese, AB Rokiskio suris produces liquid whey protein concentrate (WPC-34 and WPC-45) which is followed by the production of WPC powder, and also milk sugar (lactose), processed cheese, and smoked cheese. Total sales of whey protein concentrate decreased by 46 per cent. It was caused by the change of assortment as in 2015 the production of WPC80 was higher than WPC34. In addition, the production of Mozzarella increased due to the export to South Korea. The sales of lactose increased by 4 per cent.

UAB Rokiskio pieno gamyba specializes in the production of fresh dairy products, i.e. fluid milk, sour milk, kefir, cream, curds and fresh cheese, chocolate coated cheese bars, yogurts, butter, for the local market. The Group of Rokiskio suris makes the market share of 22 per cent.

The biggest part of production is exported. As before, the main direction of export is European Union (mainly Italy, Germany, Poland).

The biggest part of exported production is fermented cheese. Hard cheese is sold to Italy, Netherlands, the USA, Spain, and Israel. The Group is looking for new markets for cheese. One of new destinations is Kazakhstan. Various types of cheese exported to this country. Also, the sales to the US are expanding. The lactose sales to the Philippines are heading up, and the export to India was started as well.

Sales of whey protein concentrate of 80 per cent were expanded, and now the product reaches the following markets: France, Germany, Denmark, Netherlands, Spain.

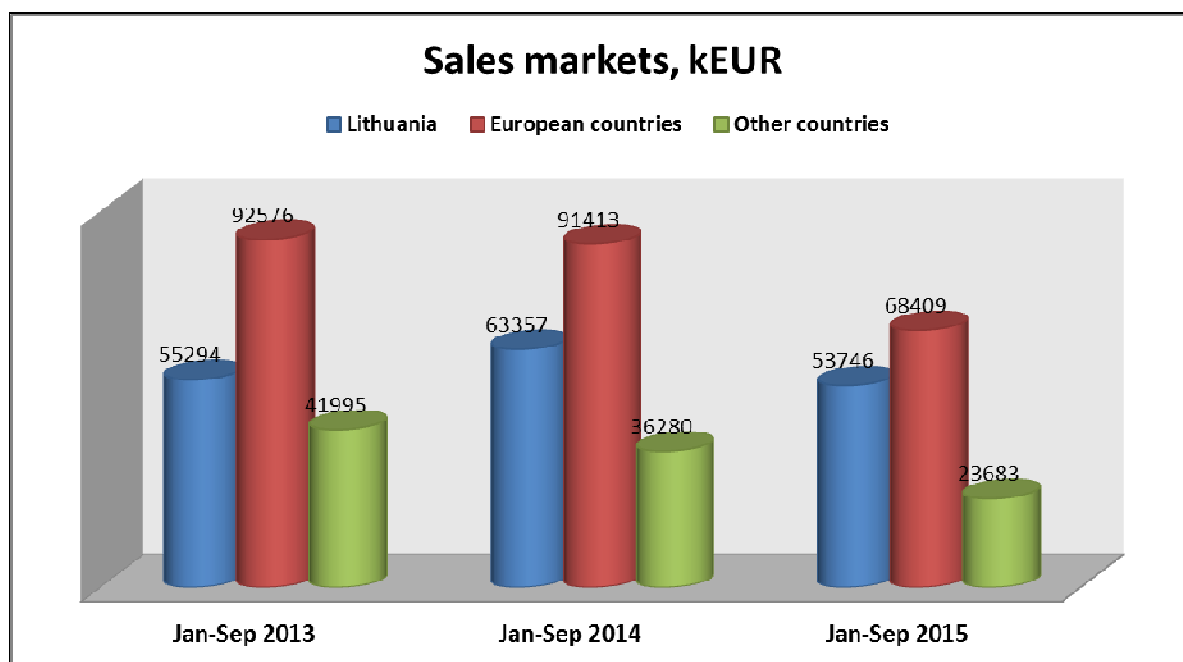

The Group’s export sales of traditional products such as butter, cream, milk powder and by-products (Whey protein concentrate and lactose) decreased in nine months 2015.

The decrease of sales was caused by the crisis of world dairy market which started in 2014, yet it was even worsened by the Russian embargo on dairy products in August 2014.

The January-September 2015 consolidated non-audited sales of the Group of Rokiskio suris amounted to mEUR 145.838; i.e. 23.67 per cent less than in the same period last year. The nine month 2014 sales made mEUR 191.050.

Sales markets 9 months 2013, 2014 and 2015

Name of countries	Sold					
	Jan-Sept 2013		Jan-Sept 2014		Jan-Sept 2015	
	k EUR	%	k EUR	%	k EUR	%
Lithuania	55 294	29.12	63 357	33.16	53 746	36.85
European countries	92 576	48.76	91 413	47.85	68 409	46.91
Other countries	41 995	22.12	36 280	18.99	23 683	16.24
Total	189 865	100	191 050	100	145 838	100

The decrease of sales was caused by drop in export cheese prices down to 24 per cent as well as decrease of prices of whey product and butter.

The January-September 2015 consolidated non-audited net profit of the Group of Rokiskio suris amounted to kEUR1,618. In 9 months 2014 the Group had loss of kEUR374.

The 9M 2015 EBITDA was kEUR 8,141 and compared to the same period of 2014 it increased by 24.7 per cent, the 9M 2014 EBITDA was kEUR 6,529. The 9M 2015 EBITDA margin was 5.58 per cent (in 9M 2014 – 3.42 per cent).

The Group's improved results compared to the last year, was mainly caused by the employed various systems of optimization of operations and production which started to give their outcome whilst introduced after the Russian embargo. The other important factor is appearance of new markets.

It is mostly likeable that in the forthcoming year, this drop of prices lasting for over a year and a half, will finish and then the prices for raw milk will increase. The Company however do not forecast any sharp recovery of dairy prices on both domestic and export markets.

12. Procedure for amendments of the Articles of Association

Pursuing the Articles of Association of AB „Rokiškio sūris“, the Articles may be exclusively changed by the general meeting of shareholders, except the cases provided by the Law on joint stock companies of the Republic of Lithuania. 18. Commentary on the Report

1. General information

The Public Limited Liability Company Rokiskio suris (hereinafter – the company) is a public listed company incorporated in Rokiskis.

The shares of AB Rokiskio Suris are traded on the Baltic Main List of the NASDAQ OMX Vilnius (symbol – RSU1L).

The Consolidated Group (hereinafter – the Group) consists of the Company, its two branches and five subsidiaries. (2014: two branches, and five subsidiaries). The branches and subsidiaries that comprise consolidated Group are indicated below:

	Operating as at 30 September			Group’s share (%) as at 30 September	
	2015	2014		2015	2014
Branches			Subsidiaries		
Utenos Pienas	Yes	Yes	UAB Rokiskio pienas	100.00	100.00
Ukmerges Pienine	Yes	Yes	UAB Rokiskio pieno gamyba	100.00	100.00
			KB Zalmarge	100.00	100.00
			SIA Jekabpils Piena Kombinats	100.00	100.00
			SIA Kaunata*	60.00	60.00

* These subsidiaries were not consolidated due to their insignificance.

All above subsidiaries and branches are incorporated in Lithuania, except for SIA Jekabpils Piena Kombinats and SIA Kaunata which are incorporated in Latvia.

The Group’s main line of business is the production of fermented cheese and a wide range of other dairy products.

As of 30st September 2015, the average number of the Group’s employees was equal to 1,648 (compared to 1,671 employees as at 30st September 2014).

2. Accounting Principles

These consolidated financial statements have been prepared according to International Financial Reporting Standards (IFRS) as adopted by the European Union.

The consolidated financial statements have been prepared under the historical cost convention. The principal accounting policies applied in the preparation of these consolidated and parent company’s financial statements are set out below. These policies have been consistently applied to all the years present, unless otherwise stated.

The preparation of consolidated and parent company’s financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and

liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Subsidiaries are the entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Transactions among the Group's enterprises, residual values and retained transaction earnings between the Group's enterprises are eliminated. Unrealised loss is eliminated too; however, it is considered to be the sign of transfer asset value decrease. The accounting principles of daughter enterprises were changed where necessary in order to ensure their consistency with the accounting principles applied by the Group.

The Group applies a policy of treating transactions with minority interests as transactions with parties external to the Group. Disposals to minority interests result in gains and losses for the Group that are recorded in the statement of comprehensive income.

The group's interests in jointly controlled entities are accounted for by proportionate consolidation. The group combines its share of the joint ventures' individual income and expenses, assets and liabilities and cash flows on a line-by-line basis with similar items in the group's financial statements. The group recognises the portion of gains or losses on the sale of assets by the group to the joint venture that is attributable to the other venturers. The group does not recognise its share of profits or losses from the joint venture that result from the group's purchase of assets from the joint venture until it resells the assets to an independent party. However, a loss on the transaction is recognised immediately if the loss provides evidence of a reduction in the net realisable value of current assets, or an impairment loss.

Items included in the financial statements of the Company and each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (hereinafter "the functional currency"). The financial statements are presented in Euros (EUR), which is the Company's (and each of the Group entity's) functional and presentation currency.

The value of long-term tangible assets is valued at historical cost less accumulated depreciation.

Subsequent costs are included into the asset's carrying amount or recognized as separate assets, as appropriate, only when it is likely that in future the Group will receive economic benefits associated with the item and the cost of the item will be measured accordingly. All other repairs and maintenance expenses are charged to the income statement during the financial period in which they have been incurred.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Buildings	15 – 55 years
Plant & machinery	5 - 29 years
Motor vehicles	4 - 10 years
Equipment and other property, plant and equipment	3 - 20 years

The asset residual values and useful lives are reviewed, and adjusted, if appropriate, at each balance sheet date.

The Group's software which is expected to bring the Group material benefit in future, is valued at cost price less accumulated depreciation. Depreciation is calculated using the straight-line method for the estimated useful life from 1 to 5 years.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. Loans and receivables are classified as 'trade and other receivables' in the balance sheet.

Inventories are subsequently carried at the lower of cost and net realisable value. Cost is determined by the first-in, first-out (FIFO) method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related indirect production overheads, but excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses.

Loans granted and amounts receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less the amount of impairment loss. A provision for impairment of amounts receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The impairment amount is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The amount of the provision is recognised in the statement of comprehensive income within 'general and administrative expenses'. Bad debts are written off during the year in which they are identified as irrecoverable.

Cash and cash equivalents are carried at nominal value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and at bank and bank overdrafts. Bank overdrafts are included in borrowings in current liabilities on the balance sheet.

Ordinary shares are stated at their par value. Consideration received for the shares sold in excess over their nominal value is shown as share premium. Incremental external costs directly attributable to the issue of new shares are accounted for as a deduction from share premium.

Where the Company or its subsidiaries purchase the Company's equity share capital, the consideration paid including any attributed incremental external costs is deducted from shareholders' equity as treasury shares until they are sold, reissued, or cancelled. No gain or loss is recognised in the statement of comprehensive income on the sale, issuance, or cancellation of treasury shares. Where such shares are subsequently sold or reissued, any consideration received is presented in the consolidated financial statements as a change in shareholders' equity.

Other reserves are established upon the decision of annual general meeting of shareholders on profit appropriation.

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost. Any difference between the amount at initial recognition and the redemption value is recognised in the statement of comprehensive income over the period of the borrowings using the effective interest method.

Profit is taxable at a rate of 15 per cent (2014: 15 per cent) in accordance with the Lithuanian regulatory legislation on taxation.

The Group pays social security contributions to the state Social Security Fund (the Fund) on behalf of its employees based on the defined contribution plan in accordance with the local legal

requirements. Social security contributions are recognised as expenses on an accrual basis and are included in payroll expenses.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminated sales within the Group. Revenue from sales of goods is recognised only when all significant risks and benefits arising from ownership of goods is transferred to the customer.

Interest income is recognised on a time-proportion basis using the effective interest method.

Dividend distribution to the Company's shareholders is recognised as a liability in the Group's financial statements in the period in which the dividends are approved by the Company's shareholders.

Basic earnings per share are calculated by dividing net profit attributed to the shareholders from average weighted number of ordinary registered shares in issue, excluding ordinary registered shares purchased by the Company and the Group and held as treasury shares.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of directors that make strategic decisions.

The Group's management identified the following operating segments within the Group: hard cheese, semi hard cheese, butter, milk, cream, sour cream, sour milk, yogurt, curds, curd cheese and other. These operating segments were aggregated into two main reportable segments, based on similar nature of products, production process, type of customers and method of distribution.

Government grants are recognised at fair value where there is sufficient evidence that the grant will be received and the Group and the Company will comply with all conditions attached.

Government grants received to finance acquisition of property, plant and equipment are included in non-current deferred income in the balance sheet. They are recognised as income on a straight-line basis over the useful life of property, plant and equipment concerned.

Provisions are measured at the present value of expenditures expected to be required to settle the obligation using pre-tax rate that reflects current market assessments of the time value of money and the risks specified to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using effective interest method.

With effect from 31 December 2011, the Company and the Group account for property, plant and equipment at revalued amount less accumulated depreciation and impairment loss. Under the newly adopted accounting policy, the revaluation is carried out periodically to ensure that the carrying amount of property, plant and equipment will not differ significantly from the value determined with reference to the fair value at the end of the reporting period. In 2011, the valuation of property, plant and equipment was carried out by Vadasa UAB using the comparative market price method. The Company's management believes the values of property, plant and equipment adjusted under these methods as of 31 December 2011 approximated the fair value. No revaluation of property, plant and equipment was conducted in 2014.

3. Information on segments

Business segments and the segments presented by the financial statements

The Group's top management indicated the following business segments of the Group: hard cheese, semi hard cheese, butter, milk, cream, sour cream, sour milk, yogurt, curds, fresh cheese etc. The segments were coupled into two main segments presented by the financial statements based on alike production procedure, customer group and distribution channels.

The Group's main business segments:

- Fresh dairy products
- Cheese and other dairy products.

Other operations of the Group comprise of raw milk collection. Transactions between the business segments are on normal commercial terms and conditions.

Geographic segments

Analysis of the Group's income from sales according to markets is as follows:

	2015 09 30	2014 09 30
Lithuania	53,746	63,357
Countries of EU	68,409	91,413
