## 5. EXPLANATORY NOTES

### 1 SUMMARY OF THE BASIC ACCOUNTING PRINCIPLES AND PRACTICES

The public company Vilniaus Baldai is a listed company in Lithuania.

The Company manufactures furniture. As of 30 September 2009 the Group employed 428 people, the Company employed 405 people (on 30 September 2008 the Group employed 641 employees, the Company - 591).

The Company's shares are traded on the Official List of the AB NASDAQ OMX Vilnius Stock Exchange.

#### **Significant accounting policies**

Financial statements were drawn up in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and with the interpretations of the Standard Interpretation Committee of the IASB, with are those followed in the preparation of the Group's and Company's annual financial statements for the year ended 31 December 2008, with the exception of the new standards become effective, and tailored:

*Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards and IAS 27 Consolidated and Separate Financial Statements (effective for financial years beginning on or after 1 January 2009).* The amendment to IFRS 1 allows an entity to determine the 'cost' of investments in subsidiaries, jointly controlled entities or associates in its opening IFRS financial statements in accordance with IAS 27 or using a deemed cost. The amendment to IAS 27 requires all dividends from a subsidiary, jointly controlled entity or associate to be recognized in the statement of comprehensive income in the separate financial statements. The new requirements affect only the parent's separate financial statements and do not have an impact on the consolidated financial statements.

*Amendment to IFRS 2 Share-based Payment (effective for financial years beginning on or after 1 January 2009).* The amendment clarifies the definition of a vesting condition and prescribes the treatment for an award that is effectively cancelled. The amendment will have no impact on the financial position or performance of the Group and the Company, as the Group and the Company do not have share-based payments.

*IFRS 8 Operating Segments (effective for financial years beginning on or after 1 January 2009).* The standard sets out requirements for disclosure of information about an entity's operating segments and also about the entity's products and services, the geographical areas in which it operates, and its major customers. IFRS 8 replaces IAS 14 *Segment Reporting*. The Group and the Company expect that the operating segments determined in accordance with IFRS 8 will not materially differ from the business segments previously identified under IAS 14.

*Amendment to IAS 1 Presentation of Financial Statements (effective for financial years beginning on or after 1 January 2009).* This amendment introduces a number of changes, including introduction of a new terminology, revised presentation of equity transactions and introduction of a new statement of comprehensive income as well as amended requirements related to the presentation of the financial statements when they are restated retrospectively.

*Amendment to IAS 23 Borrowing Costs (effective for annual periods beginning on or after 1 January 2009).* The revised standard eliminates the option of expensing all borrowing costs and requires borrowing costs to be capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. In accordance with the transitional requirements of the Standard, the Group and the Company will adopt this as a prospective change. Accordingly, borrowing costs will be capitalized on qualifying assets with a commencement date after 1 January 2009. No changes will be made for borrowing costs incurred to this date that have been expensed.

*Amendments to IAS 32 Financial Instruments: Presentation and IAS 1 Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation (effective for financial years beginning on or after 1 January 2009).* The revisions provide a limited scope exception for puttable instruments to be classified as equity if they fulfil a number of specified features. The amendments to the standards will have no impact on the financial position or performance of the Group and the Company, as the Group and the Company have not issued such instruments.

#### Improvements to IFRS:

In May 2008 IASB issued its first omnibus of amendments to its standards, primarily with a view to removing inconsistencies and clarifying wording. There are separate transitional provisions for each standard; most of the changes are effective for financial years beginning on or after 1 January 2009. The Group and the Company anticipate that these amendments to standards will have no material effect on the financial statements.

- *IFRS 5 Non-current Assets Held for Sale and Discontinued Operations.* Clarification that all of a subsidiary's assets and liabilities are classified as held for sale, even when the entity will retain a non-controlling interest in the subsidiary after the sale.
- *IFRS 7 Financial Instruments: Disclosures.* Removal of the reference to 'total interest income' as a component of finance costs.
- *IAS 1 Presentation of Financial Statements.* Assets and liabilities classified as held for trading in accordance with IAS 39 are not automatically classified as current in the statement of financial position.
- *IAS 8 Accounting Policies, Change in Accounting Estimates and Errors.* Clarification that only implementation guidance that is an integral part of an IFRS is mandatory when selecting accounting policies.
- *IAS 10 Events after the Reporting Period.* Clarification that dividends declared after the end of the reporting period are not obligations.
- *IAS 16 Property, Plant and Equipment.* Items of property, plant and equipment held for rental that are routinely sold in the ordinary course of business after rental, are transferred to inventory when rental ceases and they are held for sale. Also, replaced the term "net selling price" with "fair value less costs to sell".
- *IAS 18 Revenue.* Replacement of the term 'direct costs' with 'transaction costs' as defined in IAS 39.
- *IAS 19 Employee Benefits.* Revised the definition of 'past service costs', 'return on plan assets' and 'short term' and 'other long-term' employee benefits. Amendments to plans that result in a reduction in benefits related to future services are accounted for as curtailment.
- *IAS 20 Accounting for Government Grants and Disclosures of Government Assistance.* Loans granted in the future with no or low interest rates will not be exempt from the requirement to impute interest. The difference between the amount received and the discounted amount is accounted for as government grant. Also, revised various terms used to be consistent with other IFRS.
- *IAS 23 Borrowing Costs.* The definition of borrowing costs is revised to consolidate the two types of items that are considered components of 'borrowing costs' into one – the interest expense calculated using the effective interest rate method calculated in accordance with IAS 39.
- *IAS 27 Consolidated and Separate Financial Statements.* When a parent entity accounts for a subsidiary at fair value in accordance with IAS 39 in its separate financial statements, this treatment continues when the subsidiary is subsequently classified as held for sale.
- *IAS 28 Investment in Associates.* If an associate is accounted for at fair value in accordance with IAS 39, only the requirement of IAS 28 to disclose the nature and extent of any significant restrictions on the ability of the associate to transfer funds to the entity in the form of cash or repayment of loans applies. In addition, an investment in an associate is a single asset for the purpose of conducting the impairment test. Therefore, any impairment is not separately allocated to the goodwill included in the investment balance.

- *IAS 29 Financial Reporting in Hyperinflationary Economies.* Revised the reference to the exception to measure assets and liabilities at historical cost, such that it notes property, plant and equipment as being an example, rather than implying that it is a definitive list. Also, revised various terms used to be consistent with other IFRS.
- *IAS 31 Interest in Joint ventures:* If a joint venture is accounted for at fair value, in accordance with IAS 39, only the requirements of IAS 31 to disclose the commitments of the venturer and the joint venture, as well as summary financial information about the assets, liabilities, income and expense will apply.
- *IAS 34 Interim Financial Reporting.* Earnings per share is disclosed in interim financial reports if an entity is within the scope of IAS 33.
- *IAS 36 Impairment of Assets.* When discounted cash flows are used to estimate 'fair value less cost to sell' additional disclosure is required about the discount rate, consistent with disclosures required when the discounted cash flows are used to estimate 'value in use'.
- *IAS 38 Intangible Assets.* Expenditure on advertising and promotional activities is recognised as an expense when the entity either has the right to access the goods or has received the service. The reference to there being rarely, if ever, persuasive evidence to support an amortization method of intangible assets other than a straight-line method has been removed.
- *IAS 39 Financial Instruments: Recognition and Measurement.* Changes in circumstances relating to derivatives are not reclassifications and therefore may be either removed from, or included in, the 'fair value through profit or loss' classification after initial recognition. Removed the reference in IAS 39 to a 'segment' when determining whether an instrument qualifies as a hedge. Require the use of the revised effective interest rate when remeasuring a debt instrument on the cessation of fair value hedge accounting.
- *IAS 40 Investment Property.* Revision of the scope such that property under construction or development for future use as an investment property is classified as investment property. If fair value cannot be reliably determined, the investment under construction will be measured at cost until such time as fair value can be determined or construction is complete. Also, revised of the conditions for a voluntary change in accounting policy to be consistent with IAS 8 and clarified that the carrying amount of investment property held under lease is the valuation obtained increased by any recognized liability.
- *IAS 41 Agriculture.* Removed the reference to the use of a pre-tax discount rate to determine fair value. Removed the prohibition to take into account cash flows resulting from any additional transformations when estimating fair value. Also, replaced the term 'point-of-sale costs' with 'costs to sell'.

*IFRIC 13 Customer Loyalty Programmes (effective for financial years beginning on or after 1 July 2008).* This interpretation requires customer loyalty award credits to be accounted for as a separate component of the sales transaction in which they are granted and therefore part of the fair value of the consideration received is allocated to the award credit and deferred over the period that the award credit is fulfilled. The Group and the Company do not maintain customer loyalty programmes, therefore, this interpretation will have no impact on the financial position or performance of the Group and the Company.

*IFRIC 14 IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (effective for financial years beginning on or after 1 January 2009).* This interpretation specifies the conditions for recognizing a net asset for a defined benefit pension plan. The Group and the Company do not have defined benefit plans, therefore, the interpretation will have no impact on the financial position or performance of the Group and the Company.

### **Basis for drawing up of the condensed interim consolidated statements**

The condensed interim consolidated financial statements for the nine months ended 30 September 2009 have been prepared in accordance with IAS 34 Interim Financial Reporting. The condensed interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at 31 December 2008.

In the financial statements all figures are provided in LTL thousand. The statements are drawn up applying the method of historical costs.

When drawing up the financial statements in accordance with the IFRS, the managers are required to make calculations and estimations to support the assumptions that have an impact on application of the accounting principles and on the amounts of assets and liabilities, income and costs. The calculations and related assumptions are based on historical experience and other factors that correspond to the present situation and on the basis of which conclusions concerning the carrying amount of assets and liabilities are made that cannot be decided on the basis of other sources. The actual amounts may differ from these assumptions.

The Company's accounting policies are consistent with those used in the previous years.

### **Amounts in foreign currencies are shown in the national currency**

Transactions in foreign currencies are recorded in litas at the official exchange rate on the day of the transaction. Accounts receivable and payable and cash in foreign currencies are translated into Litass at the exchange rate on the statement of financial position day. The differences in the currency exchange rates that occur after the transactions are recorded in the statement of comprehensive income.

## **STATEMENT OF FINANCIAL POSITION**

### **Non - current tangible assets**

Non - current tangible assets, except buildings, are disclosed at acquisition or production cost, less accrued depreciation and impairment losses. The costs of internally developed assets include the costs of materials, direct labour costs and respective indirect production costs.

The value of buildings is disclosed at revaluation cost less accrued depreciation and impairment losses. Revaluation of buildings is performed every five years.

The costs suffered in an attempt to replace an element of tangible assets that is recorded separately, including costs of major repairs, undergo capitalization. Other costs are capitalized only if they increase the expected economic benefit receivable from those assets. All other costs related to these assets are recorded in the comprehensive statement when incurred. Depreciation (amortization) of the non-current tangible assets is calculated on a straight - line basis over the estimated useful life of the assets and disclosed in the comprehensive statement, while its major elements are recorded separately.

The projected useful economic life of the assets is as follows:

- buildings	40 years
- non - current tangible assets	6 - 10 years
- vehicles	5 - 10 years
- other assets	2 - 6 years

### **Non - current intangible assets**

Non-current intangible assets that consist of the acquired software are recorded at actual acquisition or production cost, less accrued amortization. Amortization is calculated on a straight - line basis over a period of 3 years.

**Trade debtors and other accounts receivable**

Trade debtors and other accounts receivable are disclosed at costs after the deduction of the provisions for potential losses.

**Inventories**

Raw materials are recorded at the acquisition cost or at net realizable value, whichever are lower, less provisions for slow - turnover and outdated inventory items.

Construction in progress is disclosed at costs that include the purchase price of raw materials and assembling units, direct labour costs and related indirect production costs.

Completed products are disclosed at the standard sales price adjusted by an estimated average margin.

When calculating the costs the FIFO method is applied.

**Cash and cash equivalents**

For the purposes of this cash flows statement, cash and cash equivalents include cash on hand and demand deposits.

**Impairment**

The carrying amount of the Company's assets, excluding inventories and the deferred tax assets is tested at each statement of financial position date for impairment when changes in circumstances indicate that the carrying amount may not be recoverable.

If any such indication exists, the recoverable amount of the assets is tested. The recoverable amount of the intangible assets not yet used is tested at each statement of financial position date. Where the carrying amount of the asset exceeds the estimated recoverable amount, the impairment losses are recognized in the statement of comprehensive income.

**Calculation of the recoverable amount**

The recoverable amount is its fair value less costs to sell or its value in use, whichever is higher. The asset value in use is calculated by discounting future cash flows to their present value applying a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

**Dividend**

Dividends are recorded as a liability in the period they are announced.

**Amounts carrying interest**

The amounts carrying interest are disclosed at nominal value, less the costs of related transactions. After the initial recognition, the amounts carrying interest are recorded at amortized value, showing the difference between the nominal and amortized value in the statement of comprehensive income during the lifetime of the liability in accordance with the effective interest rates.

**STATEMENT OF COMPREHENSIVE INCOME****Income**

Income from sales is recognized in the statement of comprehensive income when the material risk and benefit in relation to title has been accepted by the customer. Income from services is recognized in the statement of comprehensive income if they were rendered before the statement of financial position date. Income is not recognized if there are doubts concerning recovery of the transaction amounts or related costs or there is a probability that the goods will be returned.

**Production costs**

Production costs cover direct and indirect costs related to income from the sales of the year, including depreciation and remuneration. The costs of imported products include acquisition costs and transportation costs related to the sales of the year.

**Income tax for the reporting year**

The income tax includes current and deferred taxes. Income tax is recorded in the statement of comprehensive income, except those instances when it is related to items directly recorded in shareholders' equity, in which case it is recorded in shareholders' equity.

The current income tax is the actual tax calculated on the annual taxable income, applying tax rates effective and applicable at the statement of financial position date, including adjustments to tax amounts in the previous year, if any.

The deferred tax is calculated using the liability method of net positive timing differences between accounting and taxation balance sheet values of assets and liabilities. The deferred tax amount depends on the projected use of the assets and coverage of the liabilities in the future and projected tax rates at the statement of financial position date.

Deferred tax allowances are recognized as an asset in the statement of financial position to the extent that they are considered capable of being realized in the future. The deferred tax asset is discounted to the amount to be realized.

**Segment reporting**

A segment is a significant part of the enterprise business, based on the products supplied or services rendered (business segment) or on the supply of products/ rendering of services within a particular economic environment that is subject to risks and returns particular for that economic environment.

**STATEMENT OF CASH FLOWS**

The statement cash flows shows inflow and outflow of cash during the reporting period and the financial status at the end of the year. The cash flows are classified according to three main types of activities, namely, operating, investing and financing activities.

In the statement cash flows the operating cash flows are recorded using the indirect method, i.e. on the basis of income and costs as recorded in the in the statement of comprehensive income.

Cash and cash equivalents comprise cash at bank and on hand together with short -term securities recorded in current assets.

Cash flows from operating activities are recorded as a net profit or loss adjusted for the effects of non - cash transactions, changes in working capital, financial and extraordinary items, less income tax paid.

Working capital includes current assets, except those recorded in cash and cash equivalents, and current liabilities, except loans, taxes and dividends. Cash at bank and on hand together with short - term securities recorded in current assets are not included.

Cash flows from investing comprise increase and decrease in non - current assets. The increase is shown as costs. The decrease is recorded as the sales costs after deduction of the expenses.

Cash flows from financing activities include cash received from and paid to the shareholders, loans received and repaid, and long - term and short - term liabilities, not included into the working capital.
