5. EXPLANATORY NOTES

1 SUMMARY OF THE BASIC ACCOUNTING PRINCIPLES AND PRACTICES

The public company Vilniaus Baldai (Company) is a listed Company in Lithuania.

The Company manufactures furniture. As of 30 September 2011 the Group employed 492 people, the Company employed 456 people (on 30 September 2010 the Group employed 448 employees, the Company - 427).

The Company's shares are traded on the Official List of the NASDAQ OMX Vilnius AB Stock Exchange.

Significant accounting policies

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (hereinafter the EU). The financial statements have been prepared under the historical cost convention.

(a) Relevant new or amended standards and interpretations effective in 2011

IAS 24, 'Related party disclosures' (amended in November 2009, effective for annual periods beginning on or after 1 January 2011). IAS 24 was revised in 2009 by: (a) simplifying the definition of a related party, clarifying its intended meaning and eliminating inconsistencies from the definition; and by (b) providing a partial exemption from the disclosure requirements for government-related entities.

The IASB issued Improvements to IFRS, an omnibus of amendments to its IFRS standards. The amendments are generally applicable for annual periods beginning on or after 1 January 2011 unless otherwise stated:

IAS 1, 'Presentation of financial statements'. The amendment clarifies that an entity will present an analysis of other comprehensive income for each component of equity, either in the statement of changes in equity or in the notes to the financial statements. It applied retrospectively.

IAS 27, 'Consolidated and separate financial statements' - applicable to annual periods beginning on or after 1 July 2010 and applied retrospectively.

AS 34, 'Interim financial reporting'. The amendment provides guidance to illustrate how to apply disclosure principles in IAS 34 and add disclosure requirements around: (a) the circumstances likely to affect fair values of financial instruments and their classification; (b) transfers of financial instruments between different levels of the fair value hierarchy; (c) changes in classification of financial assets; and (d) changes in contingent liabilities and assets. It applied retrospectively.

IFRIC 13, 'Customer loyalty programmes'. The meaning of 'fair value' is clarified in the context of measuring award credits under customer loyalty programmes.

IFRS 3, 'Business combinations' - applicable to annual periods beginning on or after 1 July 2010 and applied retrospectively.

IFRS 7, 'Financial instruments: Disclosures'. The amendment clarify certain disclosure requirements, in particular: (a) by adding an explicit emphasis on the interaction between qualitative and quantitative disclosures about the nature and extent of financial risks; (b) by removing the requirement to disclose carrying amount of renegotiated financial assets that would otherwise be past due or impaired; (c) by replacing the requirement to disclose fair value of collateral by a more general requirement to disclose its financial effect; and (d) by clarifying that an entity should disclose the amount of foreclosed collateral held at the reporting date and not the amount obtained during the reporting period. It applied retrospectively.

(b) New and amended standards and interpretations effective in 2011 but not relevant to the Group and the Company

Classification of rights issues – Amendment to IAS 32, 'Financial instruments: Presentation' (effective for annual periods beginning on or after 1 February 2010).

Prepayments of a minimum funding requirement – Amendment to IFRIC 14 (effective for annual periods beginning on or after 1 January 2011). This interpretation will not have any impact on the Group's and Company's financial statements.

IFRIC 19, 'Extinguishing financial liabilities with equity instruments' (effective for annual periods beginning on or after 1 July 2010). This interpretation will not have any impact on the Group's and Company's financial statements.

Limited exemption from comparative IFRS 7 disclosures for first-time adopters – Amendments to IFRS 1 (effective for annual periods beginning on or after 1 July 2010). This interpretation will not have any impact on the Group's and Company's financial statements.

Basis for drawing up of the interim condensed consolidated statement

The interim condensed consolidated financial statements for the nine months ended 30 September 2011 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's and the Company's annual financial statements as at 31 December 2010.

In the financial statements all figures are provided in LTL thousand. The statements are drawn up applying the method of historical costs.

When drawing up the financial statements in accordance with the IFRS, the managers are required to make calculations and estimations to support the assumptions that have an impact on application of the accounting principles and on the amounts of assets and liabilities, income and costs. The calculations and related assumptions are based on historical experience and other factors that correspond to the present situation and on the basis of which conclusions concerning the carrying amount of assets and liabilities are made that cannot be decided on the basis of other sources. The actual amounts may differ from these assumptions.

The Group's and the Company's accounting policies are consistent with those used in the previous years.

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in a local currency, the litas (LTL), which is the Company's functional and presentation currency.

Starting from 2 February 2002, Lithuanian litas is pegged to euro at the rate of 3.4528 litas for 1 euro, and the exchange rates in relation to other currencies are set daily by the Bank of Lithuania.

Principles of consolidation

The consolidated financial statements of the Group include Vilniaus Baldai AB and its subsidiary. The control is normally evidenced when the Group owns, either directly or indirectly, more than 50 percent of the voting rights of a company's share capital and/or is able to govern the financial and operating policies of an enterprise so as to benefit from its activities.

Subsidiaries are consolidated from the date from which effective control is transferred to the Company and cease to be consolidated from the date on which control is transferred out of the Company. All intercompany transactions, balances and unrealized gains and losses on transactions among the Group companies have been eliminated.

Consolidated financial statements are prepared on the basis of the same accounting principles applied to similar transactions and other events under similar circumstances. Financial statements of Subsidiary were prepared for the same period as that of the Company.

Intangible assets

Intangible assets are measured initially at cost. Intangible assets are recognized if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Intangible assets are amortized on a straight-line basis over the best estimate of their useful lives.

Software

The costs of acquisition of new software are capitalized and treated as an intangible asset if these costs are not an integral part of the related hardware. Software is amortized over a period not exceeding 3 years.

Costs incurred in order to restore or maintain the future economic benefits that the Group and the Company expects from the originally assessed standard of performance of existing software systems are recognized as an expense when the restoration or maintenance work is carried out.

Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and impairment losses.

When assets are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in the statement of comprehensive income.

The initial cost of property, plant and equipment comprises its purchase price, including non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operation, such as repair and maintenance costs, are normally charged to the statement of comprehensive income in the period the costs are incurred.

Depreciation is computed on a straight-line basis over the following estimated useful lives:

Buildings	10 - 66 years
Machinery and equipment	6 - 10 years
Vehicles	5 - 10 years
Other property, plant and equipment	2 - 6 years.

The assets' residual values and useful lives are reviewed periodically to ensure that the period of depreciation is consistent with the expected pattern of economic benefits from items in property, plant and equipment.

Construction-in-progress is stated at cost. This includes the cost of construction, plant and equipment and other directly attributable costs. Construction-in-progress is not depreciated until the relevant assets are completed and available for use.

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalized as part of the costs of those assets, if the commencement date for capitalization is on or after 1 January 2009.

Capitalization of borrowing costs continues up to the date when the assets are substantially ready for their use or sale.

The Group capitalizes borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalized are calculated at the group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalized.

Financial assets

According to IAS 39 "Financial Instruments: Recognition and Measurement" financial assets are classified as either financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables, and available-for-sale financial assets, as appropriate. The Company determines the classification of its financial assets based on its nature and purpose at initial recognition.

Financial assets are recognized on a trade date basis where the purchase or sale process is under a contract, which terms require delivery of the financial assets within the timeframe established by the market concerned. Financial assets are recognized initially at fair value, plus, in the case of investments are not carried at fair value through profit or loss, directly attributable transaction costs.

The Group's/ Company's financial assets include cash, trade receivables and other receivables and loans are classified in the category of loans and receivables.

The subsequent measurement of financial assets depends on their classification as follows:

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortized cost using the effective interest method. Gains and losses are recognized in the statement of comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process. Receivables are initially recorded at the fair value of the consideration given. Current receivables are subsequently carried at cost less impairment, and non-current receivables and loans granted - at amortized cost, less impairment.

They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets.

Effective interest rate method

Effective interest rate method is used to calculate amortized cost of financial assets and allocate interest income over the relevant period. The effective interest rate exactly discounts estimated future cash flows through the expected life of the financial asset.

Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group/ Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass through" arrangement; or
- the Group/ Company has transferred their rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Investments into subsidiaries

Investments in subsidiaries and associated companies are accounted at cost in the Company's separate financial statements. Cost of investment is decreased by impairment losses. An assessment of recoverable amount of investment is performed for each investment individually.

Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than the carrying amount, an impairment loss is recognized.

Inventories

Inventories are valued at the lower of cost or net realizable value, after impairment evaluation for obsolete and slow - moving items. Net realizable value is the selling price in the ordinary course of business, less the costs of completion and applicable variable marketing and distribution costs. Cost is determined by the first-in, first-out (FIFO) method. The cost of finished goods and work in progress includes the applicable allocation of fixed and variable overhead costs based on a normal operating capacity. Unrealizable inventory is fully written-off.

Trade receivables

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as noncurrent assets.

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

Cash and cash equivalents

Cash includes cash on hand and cash with banks and bank overdrafts. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of change in value. Bank overdrafts are recognized in the statement of financial position as current borrowings, then they term does not exceed one year.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held at call with banks, and other short-term highly liquid investments.

Share capital

Ordinary shares are classified as equity. Ordinary shares are stated at their par value.

Dividends distribution

Dividend distribution to the company's shareholders is recognized as a liability in the group's financial statements in the period in which the dividends are approved by the company's shareholders.

Borrowings

Borrowing costs are expensed as incurred, unless they are directly attributable to acquisition, construction or production of a qualifying asset.

Borrowings are initially recognized at fair value of proceeds received, less the costs of transaction. They are subsequently carried at amortized cost, the difference between net proceeds and redemption value being recognized in the net profit or loss over the period of the borrowings using the effective interest method.

Interest paid is classified as financing cash flows in the statement of cash flows.

Leases

The Company and the Group are the lessees

(a) Finance lease

Leases of property, plant and equipment where the Company and the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the estimated present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant interest rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in long-term payables except for instalments due within 12 months which are included in current liabilities.

The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term.

(b) Operating lease

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the statement of comprehensive income on a straight-line basis over the period of the lease.

The Company and the Group are the lessors

(c) Operating lease

Payments received under operating leases (net of any incentives given to the lessee) are credited to the statement of comprehensive income on a straight-line basis over the period of the lease.

Grants

Grants received in the form of non-current assets or intended for the purchase, construction or other acquisition of non-current assets are considered as asset-related grants. Assets received free of charge are also allocated to this group of grants. The amount of the grants related to assets is recognized as deferred income and released to income in equal annual amounts over the expected useful life of related asset. In the statement of comprehensive income, a relevant expense account is reduced by the amount of grant amortization.

Grants received as a compensation for the expenses or unearned income of the current or previous reporting period, also, all the grants, which are not grants related to assets, are considered as grants related to income. The income-related grants are recognized as used in parts to the extent of the expenses incurred during the reporting period or unearned income to be compensated by that grant.

The balance of unutilized grants is shown in the caption "Grants" in the statement of financial position.

Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

Employee benefits

(a) Social security contributions

The Company and the Group pay social security contributions to the state Social Security Fund (the Fund) on behalf of its employees based on the defined contribution plan in accordance with the local legal requirements. A defined contribution is a plan under which the Company/ Group pays fixed contributions into the Fund and will have no legal or constructive obligations to pay further contributions if the Fund does not hold sufficient assets to pay all employees benefits relating to employee service in the current and prior period. Social security contributions are recognized as expenses on an accrual basis and are included in payroll expenses.

(b) Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group or the Company recognizes termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

(c) Bonus plans

The Company recognizes a liability and an expense for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

Provisions

Provisions are recognized when the Group and the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The provisions are reviewed at each statement of financial position date and adjusted in order to present the most reasonable current estimate. If the effect of the time value of money is material, the amount of provision is equal to the present value of the expenses, which are expected to be incurred to settle the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Provisions for pensions and jubilee payments

According to the terms of the collective agreement effective at the Company, each employee is entitled to a jubilee payment and 2–3 months salary payment when retiring after reaching the pension age. Actuarial calculations are made to determine liability for such payments. The liability is recognized at present value discounted using market interest rate.

Income tax

Income tax charge is based on profit for the year and considers deferred taxation. Income tax is calculated based on the Lithuanian tax legislation.

The income tax rate in Lithuania was 15 % in 2011 (15 % in 2010).

Since 2008 tax losses can be carried forward for indefinite period, except for the losses incurred as a result of disposal of securities and/or derivative financial instruments. Such carrying forward is disrupted if the Company changes its activities due to which these losses incurred except when the Company does not continue its activities due to reasons which do not depend on Company itself. The losses from disposal of securities and/or derivative financial instruments can be carried forward for 5 consecutive years and only be used to reduce the taxable income earned from the transactions of the same nature. Starting from 2010, tax losses can be transferred at no consideration or in exchange for certain consideration between the group companies if certain conditions are met.

Deferred taxes are calculated using the statement of financial position liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse based on tax rates enacted or substantially enacted at the statement of financial position date.

Deferred tax asset has been recognized in statement of financial position to the extent the management believes it will be realized in the foreseeable future, based on taxable profit forecasts. If it is believed that part of the deferred tax asset is not going to be realized, this part of the deferred tax asset is not recognized in the financial statements.

Deferred tax assets and liabilities are offset when they are related to profit taxes levied by the same tax authority and when there is a legally enforceable right to set off current tax assets against current tax liabilities.

Income tax and deferred tax for the accounting period

Income tax and deferred income tax are charged or credited to profit or loss, except when they relate to items included directly to equity, in which case the deferred income tax is also accounted for in equity.

Revenue recognition

a) Sales of goods

Revenue is recognized when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably. Sales are recognized net of VAT and discounts.

Revenue from sales of goods is recognized when delivery has taken place and transfer of risks and rewards has been completed.

b) Interest income

Interest income is recognized using the effective interest method. When a loan and receivable is impaired, the Group and the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables are recognized using the original effective interest rate.

Expense recognition

Expenses are recognized on the basis of accrual and revenue and expense matching principles in the reporting period when the income related to these expenses was earned, irrespective of the time the money was spent. In those cases when the costs incurred cannot be directly attributed to the specific income and they will not bring income during the future periods, they are expensed as incurred.

The amount of expenses is usually accounted for as the amount paid or due, excluding VAT. In the cases when a long period of payment is established and the interest is not distinguished, the amount of expenses shall be estimated by discounting the amount of payment using the market interest rate.

Foreign currencies

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies on the statement of financial position date are recognized in the statement of comprehensive income. Such balances are translated at period-end exchange rates.

Impairment of assets

Financial assets

Financial assets are reviewed for impairment at each statement of financial position date.

For financial assets carried at amortized cost, whenever it is probable that the Group and the Company will not collect all amounts due according to the contractual terms of loans or receivables, an impairment or bad debt loss is recognized in the statement of comprehensive income. A provision for impairment of trade receivables is established when there is objective evidence that the group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The reversal of impairment losses previously recognized is recorded when the decrease in impairment loss can be justified by an event occurring after the write-down. Such reversal is recorded in the statement of comprehensive income. However, the increased carrying amount is only recognized to the extent it does not exceed the amortized cost that would have been had the impairment not been recognized.

Non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the statement of comprehensive income. Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. Reversal is accounted for in the same caption of the statement of comprehensive income as impairment losses. For evaluation of impairment of assets the entire Group is considered one cash generating unit.

Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of directors that makes strategic decisions.

Related parties

Related parties are defined as shareholders, employees, members of the Board, their close relatives and companies that directly or indirectly (through the intermediary) control or are controlled by, or are under common control with, the Group and the Company, provided the listed relationship empowers one of the parties to exercise the control or significant influence over the other party in making financial and operating decisions.

Subsequent events

Post-statement of financial position events that provide additional information about the Group's and the Company's position at the statement of financial position date (adjusting events) are reflected in the financial statements. Post-statement of financial position events that are not adjusting events are disclosed in the notes when material.

2 SEGMENT REPORTING

Management has determined the operating segments based on the reports reviewed by the board of directors that are used to make strategic decisions.

The board of directors considers the business from both a geographic and product perspective to certain extent. Geographically, management considers sales volume to Lithuania, the European Union countries and the rest of the world depending on where the production is delivered. From product perspective management considers only the product quantities delivered by product type. All financial information, including the measure of profit and total assets, is analyzed as single reportable segment – furniture production and trade, therefore is not further disclosed in these financial statements.

Breakdown of revenue by the location where production is delivered:

	Sales

16 CAPITAL AND RESERVES

Share capital

The share capital is made up of 3 886 267 common shares of the nominal value of LTL 4, while the total value of the share capital amounts to LTL 15 545 thousand.

Legal reserve

The reserve of LTL 1 554 thousand is the legal reserve made under the laws of the Republic of Lithuania. An allocation of at least 5% of the net profit must be made into the legal reserve out of the profit to be appropriated every year until the legal reserve reaches 10% of the authorized capital.

Reserve for acquisition of own shares

During the ordinary general meeting of shareholders held on 29 April 2010 a decision was passed to make a transfer of LTL 25 000 thousand from the Company's retained earnings to the reserve for the acquisition of own shares. The issue on the acquisition of own shares will be deliberated by shareholders in future in view of the Company's results of operations and the market situation.

21 IMPORTANT EVENTS, WHICH HAVE OCCURRED SINCE THE END OF THE LAST FISCAL YEARS, AND REVIEW OF ACTIVITIES

In 2011 the Company further implemented the started reorganizations. The reorganizations are aimed at the reduction of costs, increase in labour productivity, improvement of production planning, promotion of the Company's competitiveness, increase in sale orders. The Company grows in line with the increase in sales of IKEA Supply AG. Tendencies in the markets of raw materials are not favourable to the Company, therefore it is difficult to retain last year's profit margins.

Turnover of the Group during period 2011 January – March was 56 567 thousand LTL (16 383 thousand EUR), same period year 2010 – 43 193 thousand LTL (12 510 thousand EUR).

Net profit of the Group during period 2011 January – March was 6 870 thousand LTL (1 990 thousand EUR), same period year 2010 net profit was 6 972 thousand LTL (2 019 thousand EUR). EBITDA was 9 166 thousand LTL (2 655 thousand EUR). Year ago it was 9 754 thousand LTL (2 825 thousand EUR).

Turnover of the Group during period 2011 April – June was 58 258 thousand LTL (16 873 thousand EUR), same period year 2010 – 43 505 thousand LTL (12 600 thousand EUR).

Net profit of the Group during period 2011 April – June was 6 515 thousand LTL (1 887 thousand EUR), same period year 2010 – 5 587 thousand LTL (1 618 thousand EUR). EBITDA was 9 004 thousand LTL (2 608 thousand EUR). Year ago it was 8 009 thousand LTL (2 320 thousand EUR).

Turnover of the Group during period 2011 July – September was 64 602 thousand LTL (18 710 thousand EUR), same period year 2010 – 54 876 thousand LTL (15 893 thousand EUR).

Net profit of the Group during period 2011 July – September was 7 531 thousand LTL (2 181 thousand EUR), same period year 2010 – 8 512 thousand LTL (2 465 thousand EUR). EBITDA was 10 150 thousand LTL (2 940 thousand EUR). Year ago it was 11 309 thousand LTL (3 275 thousand EUR).

Turnover of the Group during period 2011 January – September was 179 427 thousand LTL (51 966 thousand EUR), same period year 2010 – 141 574 thousand LTL (41 003 thousand EUR).

Net profit of the Group during period 2011 January – September was 20 916 thousand LTL (6 058 thousand EUR), same period year 2010 – 21 071 thousand LTL (6 103 thousand EUR). EBITDA was 28 320 thousand LTL (8 202 thousand EUR). Year ago it was 29 072 thousand LTL (8 420 thousand EUR).

Important events, which have occurred since the end of the last fiscal years

On 5 January 2011 Company received a notification from shareholder KJK Fund SICAV-SIF about acquisition of voting rights. The threshold that was crossed - 10 per cent.

As of 28th April 2011 the Annual General Shareholders Meeting of Vilniaus baldai AB shareholders was held. The meeting resolved to:

Item1 of the Agenda: Consolidated annual report.

The Company's consolidated annual report for 2010 was presented.

Item2 of the Agenda: Company's auditor's report.

The report of auditor PricewaterhouseCoopers UAB for 2010 was presented.

Item3 of the Agenda: Approval of the Company's financial statements for 2010.

Resolution: to approve Company's financial statements for 2010.

Item4 of the Agenda: Approval of the Company's consolidated financial statements for 2010.
Resolution: to approve Company's consolidated financial statements for 2010.

Item5 of the Agenda: Approval of the Company's profit distribution.
Resolution: to approve the Company's profit distribution:

Undistributed retained earnings, brought forward	2 769 563 LTL	802 121 EUR
Net result for the current year	27 848 058 LTL	8 065 355 EUR
Distributable result	30 617 621 LTL	8 867 476 EUR
Transfers to the obligatory reserves	-	-
Profit transfers to the reserves for own shares acquisition	-	-
Transfers to other reserves	-	-
To be paid as dividends	15 545 068 LTL	4 502 163 EUR
To be paid as annual payments (bonus) to board of	795 000 LTL	230 248 EUR
Undistributed retained earnings, carried forward	14 277 553 LTL	4 135 065 EUR
4 LTL (1.16 EUR) of dividends per one ordinary share.		

Since the end of the reporting fiscal year till the interim condensed consolidated financial statement confirmation there were no important events at the Company.
