II. RISK FACTORS

The following is a disclosure of certain risk factors that may affect the Issuer's ability to fulfil its obligations under the Bonds. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, factors which are material for the purpose of assessing the risks associated with the Bonds are described below. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Bonds, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bonds may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to the Issuer or which it may not currently be able to anticipate.

Before deciding to purchase/subscribe the Bonds, the prospective Investors should carefully review and consider the following risk factors and other information contained in this Document. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, equity, net assets, financial position and financial performance of the Issuer and/or the Group Companies. Moreover, if any of these risks occur, the market value of the Bonds and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Bonds may decrease, in which case the Bondholders could lose all or part of their investments. Additional risks and uncertainties, which are not currently known to the Issuer or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer and/or the Group Companies and have a material adverse effect on their cashflows, financial performance and financial condition. The order in which the risks are presented does not reflect the likelihood of their occurrence or the magnitude of their potential impact on the cash flows, financial performance and financial condition of the Issuer and/or the Group Companies.

This part provides information on the risk factors related to the Issuer and the offered Bonds. This information should not be considered as comprehensive description covering all possible aspects of risk factors related with the Issuer and the Bonds. The following risks might have adverse effect on the Issuer and on extreme circumstances might cause insolvency of the Issuer and breach in performing obligations arising under the Bonds.

2.1 Risk factors associated with the Issuer

2.1.1. Financial risks

Economic environment (both domestic and international) and insolvency risk

The Issuer's activities and results depend on the economic processes in Western Europe and internationally. Even if currently, there is no material economic downturn both in Europe and internationally, in the event of its occurrence, the demand for the Issuer's services may decrease, the risk of insolvency of the Issuer's contractors may increase, which may have a negative impact on the implementation and results of the Issuer's business strategy. These factors individually, or in combination might influence the Company's financial standing and results, might cause the insolvency of the Issuer.

Liquidity risk

Liquidity risk is the risk that the Issuer is unable to maintain a sufficient reserve of cash and other liquid financial assets that can be used to meet its payment obligations as they fall due and to redeem the Bonds. The availability of liquidity for business activities and the ability to access long-term financing are necessary to enable the Issuer to meet its payment obligations in cash, whether scheduled or unscheduled. Although the Issuer monitors its liquidity position and follows procedures to manage liquidity risk, a reduction in the Issuer's liquidity position could have a material adverse effect on the Issuer's business, financial condition, results of operations or prospects, as well as ability to redeem the Bonds at their maturity.

Interest rate risk

The operations of the Group are inherently exposed to interest rate risk. Considerable increases in interest rates (including EURIBOR) at which funding is available to the Group may negatively impact the profitability of the Group. Interest rates are affected by numerous factors beyond the control of the Group Companies, which may not be estimated adequately. Such factors include the changes in the overall economic environment, level of inflation, monetary policies of the central banks, etc. Further, the ongoing war in Ukraine may also further increase the inflationary pressure and market volatility and therefore also contribute to rising interest rate levels. Therefore, interest rate risk may have a material adverse effect on the Group's business, financial condition, and results of operations.

Inflation

Lithuania and other European economies have faced an excessive inflation in year 2022. Though expected to subside in the upcoming years, in 2023 inflation still could be significantly higher than historic average levels. Relevant expenses of the Group, e. g., investment to equipment and workforce, are closely related to the general price level. Though historically the Group has successfully managed inflation related risks, growing inflation in the future may prevent the Group from changing the prices of its services respectively to preserve the existing profit margin or may lead to higher losses. Thus, the Group's expenditures would increase considerably due to inflation and the Issuer would have to cover its increased costs from internal resources, unless the Issuer manages to increase its prices. Thus, strong inflation may have a considerable adverse influence on the Issuer's financial situation and business results.

2.1.2. Business activities and industry risks

Competition risks

The Group operates in highly competitive markets. The highly competitive business environment of the transportation, logistics, shipments and other sectors where the Issuer operates may have adverse effect on the results of operations and profitability of the Issuer and the Group.

The Issuer's improper reaction to the actions of competitors or changes in the environment could decrease demand for the Issuer's (Group Companies') services and may impact profitability of the Issuer (Group) and result in worse financial performance of the Issuer (Group).

Success of investment projects

The Company has implemented and may implement in the future investment projects of a large scope, including those related to expansion of the Issuer's (Group's) services and/or entrance into new markets. Although the employees invoke all available information and analytical resources when planning investments, there is no guarantee, that all information on which the investments planned were based was true and exhaustive. Furthermore, there is no guarantee that the investment plans and the investments made will generate anticipated or planned return on investment; there is no guarantee that investment will not cost more than it was anticipated.

Failure of anticipated investment projects, where return on investment from these projects is lower than it was expected or prices of such investments are higher than it was planned, may have a significant adverse effect on the Company's and Group's activities, financial situation and business results.

Credit risk insurance related risk

As the Group uses one of the largest debtor insurance providers in the world, decision of such provider to establish lower insurance limits would reduce the ability of the Group Companies to use factoring services, which means the reduction of working capital within the Group.

Counterparty risk

Counterparty risk is inherent to all business activities the Group is engaged in. Counterparty risk may result in financial losses (including, but not limited to, revenues not being received from customers, funds deposited at banks, money not being received under the Group's commercial agreements, partners in long term projects failing to perform their obligations etc.) to the Group. Default of a Group counterparty may affect the completion of the Group's commenced investment projects, the quality of services provided by the Group or harm the Group's reputation. Although, the Group monitors and manages its counterparty risk, the occurrence of any of the mentioned counterparty risks may have an adverse impact on the Group's business and financial position.

Industry regulatory risks

The Group operates in road freight transportation industry which in recent years has seen a changing regulatory environment. In 2022 EU has implemented a main EU Mobility Package I which introduced legislation that aims to create consistent and easily enforceable standards supporting driver safety, fair competition, sustainable business practices and other improvements to the transport industry throughout the EU. The Group's operations are adjusted to the new regulations and the Group is fully complying to the EU Mobility Package I. However, there is a possibility that new regulations governing business operations of the Group will be introduced in the future, which could have a possible negative effect to the business and financial position of the Group.

2.1.3 Governance risks

Management and human resources risk

The Issuer's results largely depend on the Issuer's employees, including the Key Executives, and their decisions, and on the competence and experience of the team members.

The Issuer success and its ability to manage growth initiatives depend on qualified Key Executives and other employees having special expertise in the Issuer's and Group's operations, development, financing, operation and maintenance of investment and/or other projects. Given their expertise in the industry, their knowledge of the Issuer's and Group's business processes and their relationships with the business partners, the loss of one or more of these individuals could have a material adverse effect on the Issuer's (Group's) business, financial condition, results of operations or prospects.

Additionally, from time to time, the Key executives and/or other employees with technical or industry expertise may leave the Issuer. The Issuer's failure to promptly appoint qualified and effective successors for such individuals or inability to effectively manage temporary gaps in expertise or other disruption created by such departures, could have a material adverse effect on the Issuer's business, financial condition, results of operations or prospects.

Employee shortage risk

Road transportation business heavily relies on workforce availability. Specifically, as the Company and the Group grow, there is a significant need to hire large numbers of drivers and office staff. There is a very material shortage of drivers across the EU. To ensure enough drivers needed for planned growth, the Group will have to devote major financial and human capital resources towards it. However, there is a risk that even with all necessary resources devoted by the Group the Group will not be able to attract additional workforce and/or maintain the existing, therefore it is possible that there will be an insufficient number of drivers, thus slowing down the pace of growth of the Group.

2.2 Risk factors associated with the Bonds

2.2.1 General Bonds' risks

Inflation risk

Inflation reduces the purchasing power of a Bond's future coupons and principal. Inflation may lead to higher interest rates which could negatively affect the Bond price in the secondary market. In addition

to that, at the time of this Document high inflation is viewed globally as one of the main macroeconomic factors posing significant risk to global economic growth and consequentially to the value of both equity and debt securities.

Credit and default risk

Bondholders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Bonds.

The worse the creditworthiness of the Issuer, the higher the risk of loss. A materialization of the credit risk may result in partial or total failure of the Issuer to make interest and/or redemption payments.

The Issuer is not guaranteeing that no default under this Document will occur until the Final Maturity Date, therefore the Investors shall independently assess the Issuer's creditworthiness before investing into the Bonds.

Early redemption risk

According to the terms of the Offering established in this Document, the Bonds may be redeemed prematurely on the initiative of the Issuer. If the early redemption right is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated by the Investor. Moreover, there is no guarantee by the Issuer that Extraordinary Early Redemption Event will not occur, therefore in case of the occurrence of the Extraordinary Early Redemption Event the Bonds will have to be redeemed by the Issuer in accordance with the procedure established in this Document and the rate of return from an investment into the Bonds may be lower than initially anticipated by the Investor.

Refinancing risk

The Issuer may be required to refinance certain or all of its outstanding debt, including the Bonds. The Issuer's ability to successfully refinance its debt is dependent on the conditions of the debt capital markets and its financial condition at such time. Even if the debt capital markets improve, the Issuer's access to financing sources at a particular time may not be available on favourable terms, or at all. The Issuer's inability to refinance its debt obligations on favourable terms, or at all, could have a negative impact on the Issuer's operations, financial condition, earnings and on the Bondholders' recovery under the Bonds.

Unsecured Issue risk

The Issue is unsecured. Accordingly, any claims against the Issuer under the Bonds would be unsecured claims. The Issuer's ability to satisfy such claims will depend upon among other factors, its liquidity, overall financial strength and its ability to generate cash flows, which could be affected by, *inter alia*, the circumstances described in this Section II *Risk Factors*. Any such factors could affect the Issuer's ability to make payment of interest and principal under the Bonds.

2.2.2. Offering and Admission related risks

Liquidity, listing and inactive secondary market risk

The Bonds constitute a new issue of securities by the Issuer. There is no public market for the Bonds and other securities of the Issuer. The liquidity of the Bonds cannot be guaranteed even the Bonds would be admitted to trading on the First North. The Bondholders might bear a loss due to not being able to sell the Bond or having to sell them at an unfavourable price.

Not suitability of the Bonds to some Investors

The Bonds may be not suitable investment to some Investors. Each prospective Investor into the Bonds should assess suitability of the investment taking into account all relevant personal circumstances.

Potential Investor should not invest into the Bonds unless the Investor has sufficient personal experience or with the advice of professional financial advisors, can evaluate the impact on the value of the Bonds upon changes in market and economic conditions, the resulting effects on the value of such Bonds and the impact this investment will have on the potential Investor's overall investment portfolio.

Sales with external customers, on the other hand, are generated by all Group Companies. That is why it is often the case, that a Group Company provides service to its customer using fleet belonging to another Group Company, thus, a service providing company gets invoiced from a Group Company for using its fleet.

Apart from the above, the Company is not aware of any potential conflict of interests between the Company and other Key Executives of the Company.

3.5 Group's activity description

The Issuer was established in 2008.

The Group is an international Group providing transport and logistics services. Main markets of the Group are Germany, France, Benelux countries, Great Britain, Italy and Spain and other Western European countries.

Revenue by country

The main logistics and transportation services provided by the Group:

- LTL and FTL shipments;

- Contract logistics;
- GPP transportation;
- JIT and JIS transportation;
- Dangerous goods;
- Express delivery;
- Reverse logistics.

The Group's transportation and logistics services serve a wide range of industries:

- FMCG
- Retail;
- Medical and pharmaceutical;
- IT;
- Paper and packaging;
- Automotive;
- Food and drink;
- Agriculture;
- Chemical;
- Steel and industry;
- Production.

Ground transportation is a business where scale and size of the company matter. Large size transportation companies tend to have higher profitability margins as compared to the smaller companies due to additional negotiation power that it has when procuring trucks, trailers, fuel, insurance, and other items related to this business. In addition, it is often the case that only fairly large size transportation companies get access to providing services directly to global multinational customers. Such customers provide growth opportunities and usually have high creditworthiness, thus significantly contributing to the quality of the company's client portfolio. Integre Trans Group has been on a fast growth path investing heavily in fleet portfolio to achieve goals listed above. It now operates over 1000 trucks in its own fleet portfolio and additionally over 200 trucks in subcontractors' portfolio. With the total fleet under management exceeding 1200 trucks and with the aim to exceed 2000 trucks under management by the end of 2023, it can be stated that Integre Trans Group is among a select few largest transportation companies in Lithuania. When it comes to the overall European transportation market, it should be noted that the market is very fragmented with even the largest transportation companies having less than 1% of total market share.

Fleet dynamics and projection

All sales are generated in Western Europe. Germany and France are the two main markets, accounting for around 70-75% of total sales. Some industries that clients operate in are cyclical and some are counter-cyclical, which helps to regulate sales and order volumes at different economic times. As an additional counterparty risk mitigation measure the company has debtor insurance for its debtor portfolio - agreement with Coface. In addition to reducing the solvency risks of customers, customer insurance allows factoring to be used as a working capital management/financing instrument.

* Breakdown by transportation services revenue received

Business overview

Integre Trans organizes its revenue mix between contract and SPOT business according to economic trends and a certain logic.

Breakdown of transport services revenue by contract type

In the long term the Company expects to increase the share of contractual business as it provides more stable and recurring revenue stream.

Contractual agreements

Clients regularly issue tenders in which the Company participates as their trusted supplier. A number of common criteria are agreed on the basis of the successful tender:

- the price of the trip;
- minimum number of trips over a given period of time.

In the case of contracts, the fuel price is also indexed, i.e. the price of a trip can vary according to a formula, which is usually recalculated once a month, according to the way the fuel price fluctuates. Contracts are usually for a period of 12-18 months. The share of contractual business in the Group grows every year.

SPOT agreements

Every day, the Company's sales management communicates with the logistics management of strategic customers to negotiate business for the following days and weeks. When a customer has a need for a trip a few days from now, they call the Company's sales manager, and discuss the price at which such a deal can be done. These arrangements allow Integre Trans to react quickly to e.g., a rising cost base, as has been the case throughout 2021. It should be stressed that Integre Trans does SPOT business only with its existing, stable and strategic customers, which are well known to the Company.

Impact of external events on business

- **EU regulatory changes**

EU regulatory changes had virtually no financial effect on the Company's financial performance. The Company has a plan in place and ready to implement it if the Company would need to take concrete, serious action on the mobility package, i.e. there is a Polish company (Integre Trans Sp. z.o.o.), which was established a few years ago, and which is successfully growing, developing, expanding its fleet, its customer base, etc. The Company has permissions from its current lessors to re-register their trucks with the Polish company if necessary. There are about 200 trucks and 300 drivers registered/employed on Integre Trans Sp. z.o.o. By the end of 2023, there should be about 500 trucks and 800 drivers registered/employed in this enterprise. There are all needed partnerships in place, that might be needed for Integre Trans Sp. z.o.o to further expand – grow its customers base and fleet truck. That includes strategic partnerships with recruitment companies to higher drivers in large numbers.

- **Russia – Ukraine war impact**

The war in Ukraine did not have a negative impact on the Group in a direct way. The Group does not have and has not had any customers in Russia or Ukraine. The Group also does not have/had no routes to Russia and/or Ukraine. Therefore, a direct impact has been avoided. The indirect influence is that one can discuss that it is because of the war that we now have rising interest rates, the European energy price crisis, inflation, etc.

Sustainability

Integre Trans Group's strategy is guided by the ESG principles of environmental protection, social responsibility and good governance, ensuring equal opportunities for all employees without discrimination on the basis of race, religion, gender, sexual orientation or gender identity, age, disability or any other factor not directly related to the performance of work.

Group's approach to sustainability is also reflected in the integration of the United Nations Sustainable Development Goals (SDGs) into the Group's operations. They have integrated 11 of the 17 SDGs.

Certificates and assessments:

- Quality management system
- Environmental management system
- Supply chain security system
- Occupational safety and health management system
- Validation of quality, safety, security and environmental performance
- Transport property protection certificate

Awards:

- **EcoVadis Gold** – in 2021, Integre Trans was awarded the gold medal of the international company EcoVadis. This assessment indicates that Integre Trans is among the top 5% companies rated in four categories – environment, employee and human rights, ethics, sustainability.
- **Eco Performance Award 2021** – this competition is the initiative of St. Gallen University of Switzerland, which has been running for 13 years, evaluating the sustainability of the participants, the use of innovative technologies, and the ability to successfully combine ecological, economic and social issues in the company's activities.

Achievements of the Group:

- In 2021, Integre Trans was nominated for an Eco Performance Award as “THE TRANSFORMER OF THE YEAR 2020”.
- In 2020, Integre Trans was included in the Financial Times annual ranking of the TOP 1000 fastest growing companies in Europe.
- 2018, Integre Trans made it into the top three of the Sector Leaders ranking, as one of the strongest companies in the transport sector.

3.6 Investment projects' description

It is a strategy of Integre Trans Group to continuously invest in acquisition of new trucks and semi-trailers. This allows to achieve two goals – grow the fleet and maintain its young age. Fleet growth is important as it has direct correlation with growth in sales and revenues. Transportation is very much a scale business, thus fleet growth allows to attract higher quality customers and have a better quality customer portfolio as well as higher profitability numbers and stronger competitive advantages with regards to other service providers. Maintaining young fleet has a similar affect – it positively contributes to efforts in building strong client portfolio and has a positive effect on profitability ratios due to lower maintenance costs, better fuel consumption, higher driver-retention ratios, and similar.

In 2022 Integre Trans Group has added about 600 new trucks to its fleet which constituted about 108% in fleet growth. As a result, the Group finished 2022 with almost 1200 trucks in its own fleet and approximately 200 more trucks managed under subcontracting relationship. Integre Trans Group has a large and diversified client portfolio and continues to put much emphasis on further strengthening this area. Strong client portfolio is one of the main factors that enables the Group to grow its fleet at a fast pace, as historically 80-90% of fleet expansion has been employed with existing customers and only 10-20% of new fleet directed towards new client relationships. This is a strong risk mitigating factor as existing customers are well known to the Group, ways of cooperation are established and clear, customers are insured with debtor's insurance, and predictability of business volumes is stronger and less volatile.

In 2023 Integre Trans Group will continue to grow its fleet from around 1200 trucks in own fleet to around 2200 trucks. To accommodate truck fleet expansion, there will also be acquisition of around 1000 semi-trailers that are needed to form a full set required to service clients. Additionally, 200-300 trucks should continue to be managed under subcontracting relationships. The Group has signed multiple large contracts with its existing strategic customers and additional volumes should run throughout 2023 and into 2024. The Group continuously participates in new tenders with existing as well as new customers as some contracts are maturing and have to be reviewed, while other additional volumes get announced by clients and are up for taking. Trucks and semi-trailers are financed by local and foreign manufacturer financing arms such as Paccar Financial, Volvo Financial services, Schmitz Cargobull Finance, and similar. Local commercial banks also participate in the financing of trucks and semi-trailers.

It is important to note that truck fleet expansion comes with a need for additional working capital requirement. It varies depending on the deferred terms with suppliers and customers, but usually is in the range of EUR 15,000-20,000 per truck. The Group has historically paid no dividends as earned profits are reinvested back into business to enable the growth. Funds attracted through issuance of Bonds will be used to satisfy additional working capital requirement.

The Investors acknowledge that the fixed part of the interest rate of the Bonds shall be determined upon discretion of the Issuer after the end of the Subscription Period (Auction) of the first Tranche and within the range indicated above, considering received interest in each interest rate level. The Investors will be informed about the final cumulative interest applicable for the first interest period (i.e. fixed part of the interest rate + 6M EURIBOR (as indicated in the Auction Rules)) upon allocation of the Bonds as prescribed in Section “*Allotment of the Bonds to the Investors*” below. The relevant information on the interest rate and calculation of the interest within the relevant interest period is provided in part “*Interest rate and Interest Payment Dates and Reset Dates*” of Section 4.2 *Information concerning the securities to be offered and admitted to trading*.

Please note that the conditions of each consecutive Tranche will be indicated in the Auction Rules of the respective Tranche to be published on Nasdaq website www.nasdaqbaltic.com at least 1 (one) Business Day before opening of the Auction (Subscription Period) of the respective Tranche.

Subscription procedure; invalidity of the Subscription Orders

Pursuant to the published Auction Rules of the respective Tranche, the Subscription Orders shall be submitted to the Exchange Members to be entered in Nasdaq trading system during the Subscription Period of the respective Tranche.

Please note that upon providing Subscription Order to the Exchange Members the new Investors will be required to complete the relevant procedures (e.g., suitability and/or appropriateness tests, procedures related to the anti-money laundering or sanction) required and performed by the Exchange Member, that the Subscription Orders would be accepted.

The Subscription Orders whose form shall be provided by the Exchange Members shall be submitted to the Exchange Members during the indicated Subscription Period. The Subscription Orders shall be submitted by means accepted and used by the Exchange Members (e.g. physically, via the internet banking system or by any other available means).

All Subscription Orders shall be binding and irrevocable commitment to acquire the allotted Bonds, with the exceptions stated below.

Firms managing securities portfolios on a discretionary basis will have to place Subscription Orders containing all necessary information under the Auction Rules and/or requested by the Exchange Members. More information for the institutional Investors on the Subscription procedure during the relevant Auction shall be provided by the Exchange Members accepting the Subscription Orders.

The Subscription Order shall not be considered valid and shall not be processed in the following cases:

- (i) the purchase amount indicated in the Subscription Order is less than the Minimum Investment Amount; or
- (ii) the Subscription for the Bonds by the Investor (through the Exchange Member) has not been fully paid by the relevant Issue (Settlement) Date in accordance with this Document and the Auction Rules; or
- (iii) where the Issuer in its sole discretion decides on the applicable coupon rate in accordance with the Auction Rules and this Document and the Investor's Subscription Order is submitted for higher preferred coupon rate. For example, the Investor submits only one Subscription Order with preferred coupon rate 12% (fixed part of the interest rate) + 6M EURIBOR (as indicated in the Auction Rules), but the Issuer in accordance with this Documents decides on 11% (fixed part of the interest rate) + 6M EURIBOR (as indicated in the Auction Rules) (applicable only to the first Tranche of Bonds);
- (iv) the Issuer or the Exchange Member rejects the Subscription Order due to any other reasons as set forth in this Document and/or the Subscription Order provided by the Exchange Member.

The Issuer has no obligation to inform the Investor about the fact that Subscription Order is invalid and reason of invalidity and the announcement about allotment of the Bonds is conducted as disclosed in Section "*Allotment of the Bonds to the Investors*" below.

General information regarding the Subscription procedure

By placing a Subscription Order all Investors, shall make irrevocable instruction for transferring the Bonds to securities accounts opened with the entities licensed to provide such services within the territory of the Republic of Lithuania, if the Subscription Order has not been withdrawn until the end of the Subscription Period.

By placing a Subscription Order, each Investor will be deemed to have read this Document, the Issuer's constitutional documents, the BAS Financial Statements and Articles of Association of the Company incorporated in this Document by way of reference (please see Section 1.4 *Information incorporated by reference*). The Investor may also familiarize with the Agreement on Bondholders' Protection before or after placing a Subscription Order by requesting the Trustee via e-mail info@audifina.lt. Each Investor can review the Subscription Order submitted by her/him/it by requesting the Exchange Member to whom the Subscription Order was submitted, if the Exchange Member provides such a possibility.

By placing a Subscription Order the Investors shall be considered as have consented to being allotted a lower number of Bonds than the number specified in such Investor's Subscription Order, or to not being allotted any Bonds at all, pursuant to this Document.

By submitting a Subscription Order to the Exchange Member, every Investor (besides other acknowledgments and undertakings provided by the Investors in this Document):

- (i) authorizes and instructs the Exchange Member to which the Subscription Order is submitted to arrange the settlement of the Subscription on its/his/her behalf (taking such steps as are legally required to do so) and to forward the necessary information to the extent necessary for the completion of the Subscription;
- (ii) shall ensure that when submitting a Subscription Order there are sufficient funds on the cash account connected to its/his/her securities account to cover the amount subscribed (i.e. the Issue Price multiplied by the amount of the Bonds subscribed and where applicable, if multiple Subscription Orders are submitted for different preferred coupon rates, the Issue Price multiplied by the highest amount of the Bonds subscribed);
- (iii) authorizes and instructs the Exchange Member to which the Subscription Order is submitted to block the whole Subscription amount on the Investor's cash account connected to its/his/her securities account until the allotment of the Bonds pursuant to this Document and Auction Rules, and registration with the Register is completed on the Issue (Settlement) Date;
- (iv) authorizes the Exchange Member, Issuer, Lead Manager and Nasdaq to process, forward and exchange personal data (in respect to natural persons) and information in the Subscription Order in order to participate in the Offering, to accept or reject the Subscription Order and comply with this Document and fulfill the Issuer's obligations under this Document;
- (v) acknowledges that the Offering does not constitute an offer (in Lithuanian: *oferta*) of the Bonds by the Issuer in legal terms, and that the submission of a Subscription Order does not constitute the acceptance of an offer, and therefore does not in itself entitle the Investor to acquire the Bonds, nor results in a contract for the sale of the Bonds between the Issuer and the Investor, unless the Bonds are allotted to the Investor pursuant to this Document and Bonds are registered with the Register on the Issue (Settlement) Date;
- (vi) confirms that it/she/he has got familiarized with this Document and Auction Rules.

The Investors shall acknowledge that because of an Auction, payment for the Bonds subscribed and distribution of the Bonds are made by the DVP method, meaning that the settlement procedure is carried out by Nasdaq CSD and Exchange Members on the Issue (Settlement) Date in accordance with the Auction Rules and title to the Bonds purchased in the Subscription process is obtained upon Bonds transfer to respective securities account which is done simultaneously with making the cash payment for the purchased Bonds.

An Investor will be allowed to submit a Subscription Order either personally or via a representative whom the Investor has authorized (in the form required by law and Exchange Member) to submit the Subscription Order. More detailed information concerning the identification of Investors, including requirements concerning documents submitted and the rules for acting through authorized representatives, can be obtained by Investors from the Exchange Members accepting the Subscription Orders.

An Investor must ensure that all information contained in the Subscription Order is correct, complete and legible. The Issuer reserves the right to reject any Subscription Orders that are incomplete, incorrect, unclear or ineligible, or that have not been completed and submitted and/or have not been supported by the necessary additional documents, requested by the Exchange Member during the Subscription Period and in accordance with all requirements set out in the terms and conditions of the Offering.

Any consequences of a form of Subscription Order for the Bonds being incorrectly filled out will be borne by the Investor.

Withdrawal of the Subscription Orders

The Subscription Orders for the Bonds may be withdrawn (and new Subscription Orders placed) at any time until the end of the relevant Subscription Period. The Investor wishing to withdraw placed

Subscription Order shall submit a written statement to the Exchange Member where the Subscription Order was made.

The above right of Investors to withdraw their Subscription Order shall only apply to the relevant Tranche and not to any other Tranches of Bonds under this Document.

Pricing

The Nominal Value of a Bond is EUR 1,000. The Issue Price of a Bond shall be indicated in the Auction Rules of the respective Tranche.

Procedure and dates for payment for the Bonds

The Issue Price payable by the Investors subscribing to the Bonds through the Exchange Members is blocked in advance as prescribed in this Document and settled by the Exchange Members on the Issue (Settlement) Date in accordance with this Document and Auction Rules (i.e. DVP method). If an Investor has placed several Subscription Orders at different preferred coupon rates, the amount to be blocked will correspond to the investment value of Subscription Order with largest number of Bonds subscribed.

The funds received from the Subscription and payment of the Bonds by the Investors, shall be deposited in the Securities (Settlement) Account. The money of the Investors who paid for the Bonds offered and subscribed for under this Document and held within the Securities (Settlement) Account will be used for the purposes of the Offering as indicated in this Document.

The Investors who have not been allotted any Bonds or whose Subscription Orders have been reduced will receive reimbursements from the Exchange Members (i.e. block on the funds will be removed). For the avoidance of doubt, the Issuer or the Lead Manager shall not be responsible for any relationships between the Investor and Exchange Member in connection with any operations happening on the cash account connected to the Investors' securities account.

Allotment of the Bonds to the Investors

After expiry of the relevant Subscription Period, the Issuer together with the Lead Manager shall decide on which Investors, which have provided their Subscription Orders, shall be allotted with the Bonds and to what amount, and which Investors shall not be allotted with the Bonds (i.e. invalid Subscription Orders). The allocation of the Bonds for the Investors whose Subscription Orders are valid shall be made under pro-rata allocation method (except that the Issuer may give priority and satisfy the institutional Investors' Subscription Orders) considering the Subscription Orders received and Maximum Aggregate Nominal Value of the respective Tranche offered during the respective Auction and the Lead Manager shall calculate the exact amount of the Bonds allocated to each Investor. Each Investor whose Subscription Order is valid shall be allocated at least one Bond.

When the Maximum Aggregate Nominal Value of the respective Tranche is reached, no more Bonds of this Tranche shall be allotted to the Investors. Therefore, there can be the case that the number of the Bonds requested in the Subscription Order of any Investor in case of oversubscription will be reduced accordingly, so that the Maximum Aggregate Nominal Value of the respective Tranche is not exceeded, and Investor waives any right to complaint on any such decision of the Issuer.

If more than one Subscription Order is submitted by an Investor for the same preferred coupon rate, for the allocation purposes all such Subscription Orders will be pooled. If more than one preferred coupon level indicated in the Subscription Orders of the same Investor is subject to allocation, the largest Subscription Order amount will be used for allocation purpose. Please see examples of allocation presented below for clarification.
