From time to time, quantitative values have been rounded up to the nearest reasonable decimal or whole value in order to avoid excessive level of detail. As a result, certain values presented do not add up to total due to the effects of approximation. Exact numbers may be derived from the financial statements of the Group to the extent that the relevant information is reflected therein.

**Third party information and market information.** With respect to certain portions of this Information Document, some information may have been sourced from third parties, in such cases indicating the source of such information in the Information Document. If one or more of the risk factors described in this Information Document or any other risk factors or uncertainties would materialise or any of the assumptions made would turn out to be erroneous, the Group's actual business result and/or financial position may differ materially from that anticipated, believed, expected or estimated. ## II. RISK FACTORS

*The following is a disclosure of certain risk factors that may affect the Issuer's ability to fulfil its obligations under the Bonds. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, factors which are material for the purpose of assessing the risks associated with the Bonds are described below. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Bonds, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bonds may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to the Issuer or which it may not currently be able to anticipate. Prospective Investors should also read the detailed information set out elsewhere in this Information Document and reach their own views prior to making any investment decision.*

*Before deciding to purchase/subscribe the Bonds, Investors should carefully review and consider the following risk factors and other information contained in this Information Document. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders' equity, net assets, financial position and financial performance of the Issuer or the Group. Moreover, if any of these risks occur, the market value of the Bonds and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Bonds may decrease, in which case the Bondholders could lose all or part of their investments. Additional risks and uncertainties, which are not currently known to the Issuer or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer and/or the Group and have a material adverse effect on their cash flows, financial performance and financial condition. The order in which the risks are presented does not reflect the likelihood of their occurrence or the magnitude of their potential impact on the cash flows, financial performance and financial condition of the Issuer and/or the Group.*

### 2.1 General business risk factors

#### **General economic situation**

The Group's business, financial performance and financial condition may be materially affected by changes in general economic, political and financial market conditions, such as a global or local recession, inflation and/or fluctuations in interest rates. The demand for cleaning services, supply and production of equipment and materials of car wash generally correlates with economic activity, including growth in gross domestic product, in the countries in which the Group operates. Although the cleaning industry is normally considered to be less sensitive to economic cycles than number of other industries, both weak and strong economic activity, presents a challenge for the Group. Periods of recession may have an adverse impact on payment terms and on the demand for services. This may adversely affect the Group's financial performance and financial condition. In periods of rapid economic growth, the Group may encounter problems in recruiting qualified employees and tends to experience inflation-driven increases in certain of its costs, such as staff costs, that are sensitive to rises in the general price levels. In this situation, due to competitive pressures or increase of utility tariffs in case of car wash and/or premises cleaning sector, the Group may be not able to raise the prices it charges on its services sufficiently to preserve operating margins. Accordingly, high rates of inflation could increase the Group's costs and have a material adverse effect on the Group's financial performance and its financial condition.

#### ***Inflation, increase in the consumer price index***

The upcoming years may maintain considerable inflation. Relevant expenses of the Group, e. g., investment to car wash equipment and workforce, are closely related to the general price level. Continued inflation may prevent the Group from changing the prices of its products and/or services respectively to preserve the existing profit margin or may lead to higher losses. Thus, the Group's expenditures would increase considerably due to inflation and the Group entities would have to cover their increased costs from internal resources, unless the Group entities manage to increase their prices. The premises and real estate of the car wash are leased from the different lessors and their lease prices are yearly indexed. Thus, continued inflation and increase of the consumer price index may have a considerable adverse influence on the Issuer's financial situation and business results.

## 2.2 Group specific risk factors

### ***Company's liquidity***

In addition to other financial ratios, the Company calculates and presents comparative values of the current ratio in its annual reports. Since the values of the current ratio of the Company (on consolidated basis) as of 31 December 2024 are higher than 1 (1.1) (as of 30 June 2025 they are also higher than 1 (1.4)) company has enough current assets to fulfil its current obligations fully, therefore theoretical risk that circumstances could appear in which the Company would fail to fulfil its current obligations is very low.

In addition to the above-mentioned liquidity ratios, the values of the financial Net debt-to-EBITDA ratio of the Company (on consolidated basis, adjusted to eliminate impact of 20 BAS (Business Accounting Standard) on financial results) as of 31 December 2024 and as of 30 June 2025 are -0.2 and 1.1 respectively.

Even though the Group is not highly leveraged yet, there is a theoretical possibility that the Company could reach such a level of liabilities, where creditors and credit institutions would lend funds to the Company under less favourable conditions than they lend on the date of the Information Document. Appearance of such circumstances could have an adverse effect on the Issuer's possibilities to raise borrowed funds for investments.

### ***Dependence on external financing***

The Group's operations are partially financed by issued long-term bonds. The existing credit facilities and security agreements of the Group contain financial covenants (for example, restrictions on borrowing and dividends, ownership clause etc.) and provide for certain other obligations and representations the violation of which may lead to an event of default and acceleration of the loans or redemption of bonds. To balance the Group's cash flows, Company is using unsecured short term financing facilities. Usually for the external financing received, the borrower has to comply with some financial and non-financial covenants. In case if these are breached, immediate actions must be taken to correct the situation. The Group's ability to comply with covenants and restrictions contained in the bond subscription and loan agreements may be affected by events beyond its control, including, without limitation, prevailing economic, financial, legal and industry conditions. In the event that these obligations were to be breached, the creditors would be able to declare an event of default pursuant to the relevant agreements and require repayment of the entire outstanding amounts. Such events may cause interruptions in regular business activities, loss of collateral or, in extreme cases, a financial distress for the Issuer.

### ***Dependence on the team of top managers and key personnel***

Group's business depends on the team of the top managers, responsible for the development, growth of business and appropriate day-to-day activities. Therefore, the Group's ability to survive in the competitive environment and to implement its growth strategy is mostly determined by their experience, knowledge, personal relations and other characteristics. The Group's ability to attract and hire highly competent managers also contributes to the Group's success. The Group is also strongly dependent on its executives and other highly qualified and experienced personnel, having knowledge in car wash technology, premises cleaning management and development of franchise model of PRO BRO car wash. Additional time and financial resources would be needed to find and select their replacements which could have an adverse effect on the Group's business, prospects, financial performance and financial position.

### ***The Group entities are exposed to liability against clients***

The Group entities get an access to a number of customers' cars and premises with all equipment, personal belongings and other assets located inside those cars or premises under cleaning services contracts and as service provider the Group entities assume civil liability for the damage to the customers' property, operations, as well as to the persons that may be present in the facilities. Therefore, the Group entities have taken out civil liability insurance to protect itself against risks in an amount it believes is appropriate. However, there is no guarantee that the Group will be able to obtain corresponding coverage on acceptable terms in the future or that the insurance will provide sufficient coverage for all potential claims. If sufficient insurance coverage is not in place in any individual case, or the cover amount is not sufficient for a claim asserted against the Group, this could have a material adverse effect on the net assets, financial performance and financial position of the Group.

### ***Dependence on IT***

The Group is dependent on an efficient and uninterrupted operation of its information and communication systems. Information and communication systems are generally prone to failures, damage, power outages, computer viruses, fire and similar events. A failure or interruption in the operation of these systems can therefore not be ruled out. Failures or interruptions in the operation of the computer and data processing systems used by the Group could result in loss of business and/or cause reputational damage to the Group. This could have a material adverse effect on the net assets, financial position and financial performance of the Group.

### ***Risk of the change of the essential suppliers***

To ensure high-quality provision of services and the standard of franchise services, Group entities enter into agreements with individual suppliers for long-term cooperation. Although the contractual liability for violations of the supply agreements is provided in the agreements, however, there is a risk that the main suppliers of the technology and parts will change the terms of cooperation in such a way that this will negatively affect the consolidated results of the Group entities and accordingly the Group.

### ***The risk of master franchising***

The Group entities provide services of PRO BRO car wash franchising and conduct negotiations with potential investors in the franchise, assess their compliance with franchise standards, and financial stability. Group entities expand their activities to other countries and markets in Scandinavia, Baltic countries, Poland, and other markets, in which they have not been engaged in activities, therefore there are risks due to the proper selection of franchisees as partners and the stability and profitability of such partners. An incorrectly chosen partner or his violations of the master franchise agreement, non-compliance with PRO BRO standards may indicate a decision on a change in the development plan.

### ***Cash flow and operational difficulties of individual franchise-operated tunnel car washes***

Individual tunnel car washes operating under sub-franchise agreements are managed and operated by separate entities owned by independent shareholders or by partners acting under joint activity agreements. These entities pay royalties and other fees to the country's master franchisee and purchase technological equipment, spare parts, and cleaning chemicals and other supplies for car washing from Group companies. A decrease in the number of cars washed at individual sub-franchise locations and/or cash flow difficulties may affect the revenues and profitability of the Group companies. While the Company has a clearly defined debt collection process in place, solvency issues at individual locations may have a negative impact on the Group's financial performance. In certain cases, these solvency issues may result not only in delayed payments but also in operational disruptions, such as equipment downtime due to unsettled debts to suppliers, negatively impacting the entire PRO BRO express car wash network and its reputation.

### ***Competition risk***

The Group faces competition from number of different market players in many spheres of its activities in every business segment including competition for clients and employees. In each of the markets and business segments, the Group competes primarily based on its service range, pricing, established client relationships, technical knowledge and the operational efficiency. If the Group is unable to continue to provide its services to existing clients, to develop new services portfolios and to attract new clients, to respond to client trends, to increase its operating efficiency and to reduce its operating and overhead costs, it may not be able to successfully compete in the relevant markets. Should the Group fail to maintain its market position in the relevant markets and business segments, this could have a material adverse effect on the net assets, financial position and financial performance of the Group.

### ***Counterparty risk***

Counterparty risk is inherent to all business activities the Group is engaged in. Counterparty risk may result in financial losses (including, but not limited to, revenues not being received from customers, funds deposited at banks, partners failing to perform their obligations etc.) to the Group. Default of a Group counterparty may affect the quality of services provided by the Group or harm the Group's reputation. Although, the Group monitors and manages its counterparty risk, the occurrence of any of the mentioned counterparty risks may have an adverse impact on the Group's business and financial position.

## **2.3 Risk factors related to the Bonds**

### ***The Bonds may be not as suitable investment for all investors***

Each potential Investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential Investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained in this Information Document;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact such investment will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds;
- understand thoroughly the terms of the Bonds; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

A potential Investor should not invest in the Bonds unless it has the expertise (either alone or with the help of a financial adviser) to evaluate how the Bonds will perform under changing conditions, the resulting effects on the value of such Bonds and the impact this investment will have on the potential Investor's overall investment portfolio.

#### **Credit risk**

Credit risk should be evaluated as a possibility that the Issuer might become insolvent, go bankrupt, its business being suspended or terminated, and as a result, it would be impossible to redeem the Bonds and/or pay the accrued interest to the Bondholders. Moreover, should the Issuer become insolvent, legal protection proceedings or out-of-court legal protection proceedings of the Issuer are initiated during the term of the Bonds, an investor may forfeit interest payable on, and the principal amount of, the Bonds in whole or in part. An investor is always solely responsible for the economic consequences of its investment decisions. The Bonds constitute direct, unconditional and unsubordinated obligations of the Issuer, ranking *pari passu* without any preference among each other and with all other present and future unsecured, and unsubordinated obligations of the Issuer, which all times rank *pari passu* among themselves and at least *pari passu* with all other present and future unsecured obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application. In addition, the Bonds are not bank deposits in the Issuer and are not insured by the public entity "Deposit and Investment Insurance" (in Lithuanian: *Viešoji įstaiga "Indėlių ir investicijų draudimas"*). Thus, in case of insolvency of the Issuer, the Bondholders would not receive any payments, related to Bonds from this public entity.

#### **Risk of insufficient value of the Collateral**

The Bonds will be secured by the first ranking pledges of 60% of shares of the Issuer and 60% of shares of the Subsidiary UAB „Švaros broliai“ (see Clause 3(d) *Collateral* of the General Terms and Conditions of the Bonds Section 4.2 below). However, at the Issue Date the Bonds will be unsecured and there will be no Collateral. As of the date of the Information Document, the Collateral has been provided in favour of the bondholders of the Issuer's bonds ISIN LT0000409021. Nevertheless, the Issuer has the obligation to provide the Collateral, as the security for the Bondholders, no later than in 75 days following the Issue Date. Apart from the Collateral referred to above, there are no other collateral or guarantees of the Issue issued by third parties. Nevertheless, in case of enforcement on the Collateral, the costs of enforcement, including the expenses of the Trustee, will have to be covered from the proceeds of the sale of the Collateral prior to claims of the Bondholders. The procedure of enforcement on Collateral may also delay settlement with the Bondholders. Therefore, the provided Collateral does not guarantee that in the event of a default by the Issuer, the Collateral will be capable of being realised in such manner or that the liquidation value of the Collateral will be sufficiently high to satisfy in full all the claims of the Bondholders.

#### **Interest rate risk**

If interest rates in general or particularly with regard to obligations of corporate debtors or corporate debtors with activities in the industries sector for durations equal to the remaining term of the Bonds increase, the market value of the Bonds may decrease. The longer the remaining term of a debt instrument, the stronger is its market value affected by changes of the interest rate level. There are further factors which may affect the market value of the Bonds, including, but not limited to global or national economic factors and crises in the global or national financial or corporate sector. Bondholders should be aware that movements of the market interest rate can adversely affect the market price of the Bonds and can lead to losses for the Bondholders if they sell their Bonds.

#### **Inflation risk**

The inflation risk is the risk of future money depreciation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on the Bonds. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

#### **An active secondary market for the Bonds may not develop and the market price of the Bonds can vary**

The Bonds constitute a new issue of securities by the Issuer. Prior to Admission to trading on First North, which is an alternative market in Lithuania, there is no public market for the Bonds and other securities of the Issuer. Although application(s) will be made for the Bonds to be admitted to trading on First North, there is no assurance that such application(s) will be accepted, and the Bonds will be admitted to trading. In addition, Admission to trading the Bonds on an alternative market will not guarantee that a liquid public market for the Bonds will develop or, if such market develops, that it will be maintained, and neither the Issuer, nor the Arranger is under any obligation to maintain such market. If an active market for the Bonds does not develop or is not maintained, it may result in a material decline in the market price of the Bonds, and the liquidity of the Bonds may be adversely affected.

In addition, the liquidity and the market price of the Bonds can be expected to vary with changes in market and economic conditions, the financial condition and the prospects of the Issuer, as well as many other factors that generally influence the market price for securities. For example, even if the likelihood that the Issuer will be in

a position to fully perform all obligations under the Bonds when they fall due actually has not decreased, market participants could be of different opinion especially if the market participant is in the opinion that the creditworthiness of corporate debtors in general or debtors operating in the industries sector adversely changed. Accordingly, due to such factors the Bonds may be trade at a discount to the price at which the Bondholders purchased/subscribed the Bonds and the market value of the Bonds may therefore decrease. Therefore, investors may be not able to sell their Bonds at all or at a price that will provide them with a yield comparable to similar financial instruments that are traded on a developed and functioning secondary market. Further, if additional and competing financial instruments are introduced on the markets, this may also result in a material decline in the market price and value of the Bonds.

#### ***Early redemption risk***

According to the General Terms and Conditions of the Bonds, the Bonds may be redeemed prematurely on the initiative of the Issuer 1 year after the Issue Date, with the respective Early Optional Redemption Amount equal to 100% of Nominal Amount plus accrued Interest. The Issuer may choose to redeem the Bonds, subject to certain regulatory conditions and approvals, at times when prevailing interest rates may be relatively low. In such circumstances a Bondholder may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Bonds and may only be able to do so at a significantly lower rate. Therefore, if this early redemption right is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated.

In addition, this optional redemption feature is likely to limit the market value of the Bonds. During any period when the Issuer may, or is perceived to be able to, elect to redeem the Bonds, the market value of the Bonds generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

#### ***Amendments to the Bonds bind all Bondholders***

The Law on Protection of Interests of Bondholders requires and the terms of the Bonds contain provisions for calling Bondholders' Meetings to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Bondholders including Bondholders who did not attend and vote at the relevant Bondholders' Meetings and Bondholders who voted in a manner contrary to the majority. This may incur financial losses, among other things, to all Bondholders, including such Bondholders who did not attend and vote at the relevant Bondholders' Meetings and Bondholders who voted in a manner contrary to the majority.

#### ***Taxation of Bonds***

Potential purchasers/subscribers and sellers of the Bonds should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Bonds are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for financial instruments such as the Bonds. Potential investors are advised to ask for their tax advisers' advice on their individual taxation with respect to the acquisition, sale and redemption of the Bonds. Only these advisors are in a position to duly consider the specific situation of the potential investor.

#### ***Transaction costs/charges***

When the Bonds are purchased/subscribed or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the purchase/issue or sale price of the Bonds. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Bondholders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs). These incidental costs may significantly reduce or eliminate any profit from holding the Bonds.

#### ***Refinancing risk***

The Issuer may be required to refinance certain or all of its outstanding debt, including the Bonds. The Issuer's ability to successfully refinance its debt is dependent on the conditions of the debt capital markets and its financial condition at such time. Even if the debt capital markets improve, the Issuer's access to financing sources at a particular time may not be available on favourable terms, or at all. The Issuer's inability to refinance its debt obligations on favourable terms, or at all, could have a negative impact on the Group's operations, financial condition, earnings and on the Bondholders' recovery under the Bonds.

### **2.4 Legal and Taxation Risk Factors**

#### ***Litigation risks***

In the course of their ordinary business operations, companies of the Group might be involved in several court and official proceedings, as plaintiffs or defendants, the outcome of which cannot currently be predicted with any certainty. The Group may be required under a court order or settlement agreement to pay considerable

amounts, which may also exceed any provisions set up for this purpose. In addition to these amounts, the legal costs incurred by the Group and in some cases of its opponent would also have to be borne. This could have a material adverse effect on the net assets, financial position and financial performance of the Group.

#### ***Regulatory and legislation risk***

The Group's business is subject to extensive regulation and associated regulatory and legal risks (including the effects of changes in the laws, regulations, policies or their respective interpretations) which could have a material adverse effect on the Group's business, prospects, financial performance and financial position.

#### ***Compliance with legal acts***

The Company and the Subsidiaries are required to comply with large number of laws and regulations in numerous countries relating but not limited to operational procedures and quality standards. Any failure to comply with the applicable laws and regulations may expose the Company to administrative penalties and civil remedies including fines or injunctions, as well as in certain cases even minor infringement proceedings can be started. Although the Company has policies in place throughout its entire organization to protect against such non-compliance, the risk of failure to comply with all legal requirements may not be totally excluded. Should any material non-compliance be established by competent authorities and not rectified in due time, it may have serious financial consequences for the Group and negative impact on Company's and/or Subsidiaries' reputation.

#### ***Failure to meet its workplace health and safety obligations***

The Group currently operates in Lithuania, Latvia and Germany and is subject to laws and regulations in respect of health and safety in these jurisdictions. Additional or amended laws and regulations may increase the cost of compliance, adversely impact Group's ability to comply, or expose the Group to greater potential liabilities where for example, changes to the regulatory framework result in higher or more complicated regulatory standards. In the event the Group breaches these laws and regulations, any company of the Group could be subject to sanctions and penalties.

#### ***Tax risks***

The Group regularly reviews the applicable local and foreign taxation rules in order to identify new developments and make the relevant adjustments. Due to the complexity and dynamics of both tax legislation and the interpretation of applicable law by the tax authorities, it is possible that the outcome of the tax audits performed in the states where the Group operates may not be as expected and that the tax amounts determined by the tax authorities may exceed the provisions set up for this purpose, so that additional liquid funds must be applied to pay the tax owed, which would affect the net assets, financial position and results of operations of the Group.

## **3.3 Business Description**

### **The Issuer**

PRO BRO Group is the leading car and premises cleaning service network in Lithuania, with a presence in Latvia since 2023 and ambitious plans for further European expansion. It owns one of Europe's fastest growing express tunnel car wash networks, which is being developed through a franchise model. It has 24 operating sites across Lithuania and Latvia, with 28 franchises sold to date, and also has premises cleaning and self-service car wash businesses. PRO BRO Group is a diversified and dynamic group of companies that brings a unique cleaning experience to the market through its focus on innovation and sustainability.

### **Group History**

- In 1998, Švaros Broliai UAB was established and its first detailing car wash center began operations. It expanded rapidly, adding more car washes to its network.
- In 2001, the first new concept detailing location began operations and later expanded to six locations. That same year, Švaros Broliai diversified its offering by setting up a premises cleaning business.
- In 2015, the company diversified further by opening its first self-service car washes.
- In 2017, Švaros Broliai introduced express tunnel car washes to the Lithuanian market, opening 5 express car wash objects in one year.
- In 2019, the PRO BRO Express brand was launched as the international franchise brand of the company, and within one year 5 car washes were successfully sold as franchises.
- In 2022, PRO BRO Group UAB was established. The Group was comprised of Švaros Broliai UAB and three newly created specialized subsidiaries, PRO BRO Car Wash Systems UAB (equipment supply), PRO BRO Express UAB (franchise and operations management), and PRO BRO Asset Management UAB (real estate assets for car wash sites). Švaros Broliai UAB continued to operate some tunnel car washes. It established the following subsidiaries for its other car washing and cleaning services:

- o 4 Cars UAB for car cleaning centers,
- o Daily Spaces UAB for premises cleaning,
- o and Spindi Wash UAB and Spindi Well UAB for self-service car wash facilities. The facilities included those added to the network through Švaros Broliai UAB's 2022 acquisition of the Plaunu Pats self-service car wash network.

In 2022, the investment fund "Car Wash Fund Riga I" raised €4.9 million to invest in Express Car Washes in Riga.

- In 2023, the first PRO BRO express tunnel car wash opened in Latvia. By the end of 2023, the Group was operating a total of 19 express tunnel car washes.
- In 2024, the Group had sold 28 franchises.
- In 2025, the Group sold its shares in 4 Cars UAB, thus divesting it of its car detailing centres to focus on its high-growth express tunnel car wash operations.

As of 2025, the Group manages 24 express tunnel car wash locations in the Baltics (20 in Lithuania and 4 in Latvia), in addition to 21 self-service car wash locations in Lithuania. 7 of the tunnel car washes in Lithuania are operated under a joint venture model, with the Group, through its subsidiary, holding between 14% and 24% of the shares. As part of its tunnel car wash expansion plans, the Group entered the German market by establishing a local subsidiary with the aim of selling equipment. Further market entries are being actively considered for Poland, Estonia, and other European countries.

### **Core values, Business objectives**

PRO BRO Group is defined by its core values of integrity, passion, growth, and sustainability. These values guide all aspects of the way the Group operates and focuses its direction.

Integrity means being a reliable, trustworthy, and honest partner for all stakeholders, from customers to franchisees to employees. The Group sets itself ambitious goals for growth with the aim of taking a leadership position and continuously improving through innovation. This requires passion and commitment. The Group is socially responsible, with a focus on improving the sustainability of car washing and premises cleaning, while supporting the communities it works in.

The main goal of the PRO BRO Group is to deliver value through creating a culture of cleanliness. It strives to serve as many cars as possible, in the shortest possible time, and at the greatest convenience to customers. This means continually developing cutting-edge facilities for car washing and locating these facilities in the most convenient places. With over 4 million cars now washed annually, the Group is delivering on its goal. The Group believes that cars are an extension of personal identity, therefore ensuring their cleanliness enhances quality of life and brings value to individual customers and wider society.

The Group's long-term vision is to be the fastest growing international network of car washes.

### **Competitive advantages**

Going forward, the main focus for the Group will remain expanding the PRO BRO Express tunnel car wash franchise network internationally, while holding its strong position in the Lithuanian market in self-service car washes and premises cleaning.

The Group is leveraging multiple competitive advantages to realise this vision. These include:

- **First-mover advantage:** As the first company to establish an express tunnel car wash in Lithuania, and one of Europe's first express tunnel car wash brands, PRO BRO is well-positioned to capitalize on growing demand in Europe.
- **Unique technical innovations that lower costs and improve sustainability:** In today's market, most car wash users encounter outdated and inefficient services. Traditional washes often take up to 480 seconds per vehicle, offer rigid pricing structures, and lack modern sustainability standards. PRO BRO has developed a solution that not only addresses these inefficiencies but also unlocks new behavioral trends and market demand. PRO BRO's tech-first approach means its system features a number of innovations that give improved performance and user experience compared to other car washes. The wash process takes just 96 seconds, and 7 cars can be washed simultaneously. This compares to standard automatic car washes that need 8 minutes per wash and only wash one car at a time. As a result, express tunnel car washes offer radically improved capacity at each facility. This efficiency does not compromise on quality or sustainability: PRO BRO express tunnel car washes feature a water recycling system which enables up to 90% of water to be reused, allowing the group

and its franchisees to minimize costs and deliver on sustainability. Furthermore, smart scanning technology reduces chemical consumption by 50%.

- **A focus on customer experience:** Along with rapid car washing, PRO BRO customers also enjoy an effortless experience with a 100% automated service. Furthermore, convenient membership models, multiple payment methods, and attractive free services make effortless cleanliness accessible to all customers. Each PRO BRO facility features a unique architectural design with abundant natural light, creating a transparent and modern environment for both users and employees.
- **Increased demand for car washing:** Affordable membership plans enable unlimited washing for a flat monthly fee, which not only improves customer retention but also encourages higher washing frequency. In markets where PRO BRO enters, customers typically increase their car washing habits to three times per month, signalling the creation of a new car care culture. PRO BRO also responds to a growing shift in consumer behaviour — the move from DIY (do-it-yourself) services to “do it for me” experiences. Just like food delivery and ride-sharing replaced cooking and driving, express car washes are replacing hand washes and in-bay automatics. Customers want fast, reliable service that they don’t have to think about.
- **Low labor operations:** From an operational perspective, PRO BRO express car wash model is heavily automated and digitally managed, allowing the company to reduce labor to a minimum.
- **A proven system and franchise:** PRO BRO’s express tunnel car wash system has been in operation for 8 years, with ongoing optimisation ensuring its performance continually improves. With 24 objects in operation, the Group has the right set up and experience for further expansion.
- **End-to-end value chain:** By offering franchisees not only access to its brand and system but also support with real estate assets and the necessary equipment and supplies, PRO BRO is an attractive and convenient franchise option for local partners. Furthermore, this end-to-end value chain provides improved potential for optimisation and increased profitability.

## Development and growth opportunities

PRO BRO has the opportunity to tap into multiple opportunities for growth and development.

- **Strong potential in Europe:** The European car wash market is dominated by in-bay systems, which are slower and have much lower capacity than tunnel car washes. Express tunnel car washes are forecast to be the fastest growing segment in this sector in Europe, with CAGR projected to reach 7% by 2030 (Grand View Research).
- **Presence already developing in future markets:** PRO BRO already has a local subsidiary established in Germany and Estonia with a view to expansion into that market, and has firm plans for growth in Poland.
- **A flexible and versatile model:** PRO BRO has grown through both franchising and joint ventures, giving local partners a range of options for their investment. Furthermore, with different sized car wash models available to meet different location, traffic and population contexts, PRO BRO Express tunnel car washes can be adapted to fit multiple different locations.
